HIGH QUALITY DENTAL INSTRUMENTS

MEDESYS is the **story of a family**.  
MEDESYS is the **story of a great passion forged in steel**.  
MEDESYS sums up the **history of an entire village** which has been handling and transforming steel for more than 600 years.

At MEDESYS fundamental values are passed on from generation to generation: devotion to work, special attention to detail, respect and even self-denial, truly necessary for attaining constant improvements, these are indeed our main drivers.

At MEDESYS we all give our best every day, as we all know that just by giving our best we can satisfy our customers providing excellent quality products and dedicated service: we cannot be just good, we must be the best.

If today we are a much larger family it is mainly because of your preference, we feel grateful and proud for your loyalty, thanks and **welcome in our family!**

MEDESYS è la **storia di una famiglia**.  
MEDESYS è la **storia di una passione forgiata nell'acciaio**.

MEDESYS è la storia di un intero paese che da 600 anni lavora l'acciaio

In MEDESYS si trasmettono da generazioni i valori fondamentali che rendono unica la nostra produzione: la dedizione per il lavoro, la cura per i dettagli, il rispetto e anche il sacrificio, necessario per potersi costantemente migliorare.

Ogni persona in MEDESYS dà il meglio di se stessa, perché sappiamo che solo dando il massimo possiamo soddisfare i nostri clienti con la qualità dei nostri prodotti ed il nostro servizio: non basta essere bravi, bisogna essere i migliori.

Se siamo diventati una grande famiglia è grazie a voi ed alla vostra preferenza per i nostri strumenti: grazie e **benvenuti nella nostra famiglia!**

## MEDESYS TODAY

### MEDESYS OGGI

- Italian craftsmen
- More than 3.000 high quality instruments
- 600 Years of history and tradition
- 105 Countries presence
- 16 the network of companies which contribute to the realization of the MEDESYS instruments

- Artigiani italiani
- Oltre 3.000 strumenti di alta qualità
- 600 anni di storia e tradizione
- Presente in 105 Paesi
- 16 le aziende che contribuiscono alla realizzazione degli strumenti MEDESYS

## 105 COUNTRIES

### 105 PAESI

Nowadays MEDESYS is firmly present and appreciated in more than 105 international markets for the excellent quality of its products refined in all the details, from a technical point of view and in terms of design.

Al giorno d'oggi MEDESYS è radicata in 105 Paesi ed altamente apprezzata a livello internazionale per l'eccellente qualità dei suoi prodotti, rifiniti in ogni singolo dettaglio, sia dal punto di vista tecnico, sia prettamente di design.

## 30 INTERNATIONAL EXHIBITIONS

### 30 PRESENZE IN FIERE INTERNAZIONALI

Every year MEDESYS actively participates to more than 30 international exhibitions and scientific congresses, autonomously as MEDESYS trademark or in support of the activity of its precious partners during national dental events.

Ogni anno MEDESYS partecipa a più di una trentina tra fiere internazionali, congressi scientifici e conferenze, sia in autonomia sia in supporto all'attività svolta dai preziosi partner.

# BEYOND THE INSTRUMENT: MEDESYS IS MORE

## DIETRO GLI STRUMENTI: MEDESYS È MOLTO DI PIÙ

These are the **core values** and pillars which define and sustain MEDESYS and each single MEDESYS product is the essence of this precious heritage. The perfect combination and balance of these elements are the key factors enabling us to keep on creating unique and original high-quality instruments.

The **most important asset is our 600 years tradition**: there is no **better guarantee** for our customers, perfection of design and superior performance are not pure chance, but the patient distillation of our generous history and long tradition.

Questi sono i **valori fondamentali** che caratterizzano MEDESYS e si concretizzano in ogni suo strumento. La perfetta combinazione di questi elementi è il fattore chiave che ci permette di creare gli strumenti di qualità unici nel mercato.

L'ingrediente più importante ed unico è **la nostra tradizione di 600 anni**: **assoluta garanzia** sulla qualità e precisione dei nostri prodotti.

## WHY CHOOSE MEDESYS?

### PERCHÉ SCEGLIERE MEDESYS?

**Lucia**  
*Export dept. / Ufficio Export*

“Because you can breathe **our Italian heart and passion** in all our products and in our service.”

“Per lo stile italiano che contraddistingue il nostro servizio e i nostri prodotti.”

**Alba**  
*Accounting Manager / Responsabile contabilità*

“For the **excellent service**. We all bend over backwards to cover the needs and find the most precise solutions for our customers.”

“Per l’ottimo servizio. Tutti ci facciamo in quattro per dare servizio e trovare soluzioni al fine di accontentare in tutto e per tutto i clienti.”

**Veronica**  
*Logistic dept. / Reparto spedizioni*

“We are very flexible and we take pleasure in covering also specific requests such as **customized products** or personalized laser etching on the instruments.”

“Siamo molto disponibili alle esigenze di personalizzazione dei clienti, come strumenti realizzati su richiesta del cliente e marcature personalizzate.”

**Marinella**  
*Production dept. / Reparto produzione*

“Because it is a most reliable Company providing very good quality products: **each item is carefully checked** during each single manufacturing phase.”

“Per la serietà dell’azienda e la qualità degli strumenti: il prodotto è seguito in ogni singola fase, controllata nei minimi dettagli.”

**Franca** – Chief of Quality control dept.  
Responsabile controllo qualità

“Because we **are a TEAM**, and as they say, never change a winning team.”

“Perché siamo una squadra e squadra che vince non si cambia!”

**Sandra**  
Chief Logistics Officer / Responsabile logistica

“Because more than **105 Countries** keep on choosing us every day, we invite you to test us!”

“Perché ci hanno già scelto 105 Paesi! Metteteci alla prova!”

**Mario**  
Production Chief / Responsabile produzione

“Because the company has a **solid historical background** and looks to the future with the great enthusiasm of young generations.”

“Perché è un'azienda con una bella storia alle spalle e che guarda al futuro con occhi giovani e pieni di entusiasmo.”

**Stefano**  
Sharpening & finishing dept. / Reparto affilatura

“Because the Company carries on the value of **traditional artisanal work** and the **MADE IN ITALY** worldwide.”

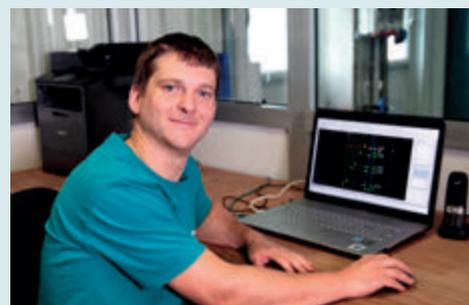

“Perché mantiene la tradizione che per anni ha reso il prodotto made in Italy eccellente, ineguagliabile e vantato da tutti: l'Artigianato.”

**Dylan**  
Production dept. / Reparto produzione

“Because we have adopted precise and **highly sophisticated processes** for the production, a real guarantee for efficiency and outstanding durability of our products.”

“Per gli svariati e sofisticati processi impiegati per la realizzazione dei suoi prodotti che ne garantiscono l'affidabilità e la durata nel tempo.”

**Ferruccio**  
CNC dept. / Reparto macchinari CNC

“Because it is a **dynamic Company** in constant evolution aiming at improving its products and services day by day.”

“Perché è un'azienda in continua evoluzione che punta al continuo miglioramento.”

## **BACK TO THE ORIGIN OF THE LEGEND OF MANIAGO**

**QUANDO NASCE LA LEGGENDA DI MANIAGO**

An old legend says that Maniago was already famous during the Roman period for its skills in the manufacture of knives and similar tools and that many Roman soldiers had their arms fabricated by these gifted smiths of the far North East. Maniago was so renowned that a nearby village dating back to around 1.000 AD, sited at the edge of the ancient Roman road linking Julia Concordia and the Alps, is still called today “Poffabro”, which means *pratum fabri* (smiths field).

La leggenda narra che la bravura di Maniago nel costruire coltelli ed altri attrezzi ad essi connessi fosse già famosa ai tempi dei Romani, i quali si facevano costruire le loro armi d’asta proprio a Maniago: tale era la sua fama che un villaggio ad esso confinante e risalente al 1.000 d.C., dove passava la strada Romana che da Julia Concordia si inoltrava nelle Alpi, si chiama ancor oggi ‘Poffabro’, ovvero *pratum fabri*.

## 600 YEARS OF HISTORY

### 600 ANNI DI STORIA

## 1380 AD

**The beginning**  
**L'inizio**

31<sup>st</sup> March 1380: 600 years ago the chiefs of the most important families of Maniago met to discuss and to take decisions on various matters: among them there was Nicolussio, the first smith of Maniago.

31 marzo 1380: 600 anni fa i capi famiglia di Maniago si incontrarono per deliberare su varie tematiche: tra essi c'era Nicolussio, il primo fabbro di Maniago.

## 1400 AD

**Water as an essential source of energy**  
**L'acqua, una fonte di energia indispensabile**

Thanks to water which gave power to an increasing number of helve hammers, the smiths' anvils, Maniago's blacksmiths increased their production and became more skilled day by day: at the beginning it was mostly tools related to agrarian work, such as ploughshares, axes and scythes, afterwards the technique rapidly progressed and specialized into what was later renowned as 'the smiths'art & craft workshop'.

Grazie all'acqua che alimentava un numero crescente di battiferri chiamati magli a testa d'asino, il lavoro dei fabbri di Maniago aumentò sensibilmente e soprattutto divenne più articolato e specializzato: dall'iniziale produzione degli attrezzi legati al lavoro agricolo, come vomeri, falci, coltellacci e roncole, la tecnica progredì rapidamente, si specializzò e pose le basi allo sviluppo dell'arte fabbrile e delle botteghe artigiane.

## 1450 AD

**The blacksmiths' anvils**  
**I battiferro**

### 1492

Italian navigator Cristoforo Columbus discovers the land today known as America. Il navigatore italiano Cristoforo Colombo scopre quella che oggi è l'America.

During the Middle Ages water had become an essential source of energy since it supplied power to drive mills, sawmills, bellows, spinning-mills and forges. The first anvil started to operate in Maniago thanks to the authorization given to Count Nicolò of Maniago by the Venetian Republic for the canalization of the Colvera stream into an irrigation ditch.

Nel Medioevo l'acqua diventò un'essenziale fonte di energia poiché alimentava mulini, segherie, mantici, filande e fucine. Il primo battiferro iniziò a lavorare a Maniago su autorizzazione attribuita dalla Serenissima Repubblica di Venezia al Conte Nicolò di Maniago.

## 1500 AD

**Arms for the Venetian Republic**  
**Armi per la Repubblica di Venezia**

During the XVI century the blacksmiths of Maniago were able to produce also tools of very great prestige, such as arms for the Venetian Republic. Nowadays the excellent ability of these skilled craftsmen is renowned even in Hollywood where the tool-creations of Maniago have been used for many movies, such as Braveheart, Robin Hood and The Lord of the Rings.

Durante il XVI secolo i fabbri di Maniago erano già in grado di realizzare prodotti di un certo prestigio, come le armi per la Repubblica di Venezia. Oggi le eccellenti abilità degli ingegnosi artigiani sono ammirate perfino a Hollywood, dove le riproduzioni di armi fatte a Maniago sono utilizzate in film famosi, come Braveheart, Robin Hood e Il Signore degli Anelli.

## 1700 AD

**The craft workshops**  
**Le botteghe artigiane**

The craft workshop appeared to satisfy a new demand of working tools increasingly small in size and dedicated to specific uses, such as pocket-knives, scissors and surgical instruments. These new small tools had to be extremely precise and also have a nice design: precision and an esthetical style defined the new production parameters of the smiths, then called '*fâvri da fin*'.

La crescente domanda di strumenti da lavoro sempre più piccoli, perfetti in ogni particolare e dediti a specifici utilizzi, come coltelli da tasca, forbici e strumenti chirurgici, diede l'input alla nascita delle botteghe artigiane: questi nuovi strumenti dovevano essere estremamente precisi ed allo stesso tempo gradevoli dal punto di vista del design; precisione e gusto estetico definirono i nuovi parametri per il lavoro dei fabbri, chiamati così '*fâvri da fin*'.

## 1800 AD

**The great economic growth**  
**Il grande sviluppo economico**

The work of smiths became so predominant as to further increase the importance of Maniago; since then the town has been renowned as 'the city of the cutleries'. As iron was not easily available on the territory, Maniago smiths preferred to focus on the concept of highest quality rather than on quantity and developed a superior technique: Maniago's products were indeed of a higher quality if compared with the production of other Countries.

L'arte fabbrile assunse sempre più prevalenza all'interno della comunità, tanto da far identificare Maniago come 'la città delle coltellerie'. Data la scarsità in loco del ferro, Maniago preferì focalizzarsi sull'elevata qualità delle sue creazioni, piuttosto che sulla quantità, sviluppando così una tecnica avanzata: i prodotti di Maniago erano sicuramente di qualità e design più elevato rispetto a quelli di altri Paesi.

# 600 YEARS OF HISTORY

## 600 ANNI DI STORIA

Grinding wheels / Finitura alle mole

### 1900 AD

**Smiths' art in Maniago**  
**L'arte dei fabbri di Maniago**

### 1935 AD

At the beginning of the XX Century metals started to be transformed into tools indispensable for surgery and agriculture: incandescent iron was wrought and shaped into rough tools which were then finished into well-refined instruments by skillful hands.

Agli inizi del XX secolo il metallo veniva lavorato per creare strumenti indispensabili per l'agricoltura e la chirurgia: il metallo incandescente era modellato in strumenti grezzi che venivano poi rifiniti in utensili raffinati da mani abili.

Technical drawings of surgical instruments made by Guglielmo Ghezzi in 1935.  
Disegni tecnici di strumenti chirurgici realizzati da Guglielmo Ghezzi nel 1935.

*The forgers / Forgiatori*

*Coarse smith / Fâvri da gros*

## 1970 AD

**Great economic expansion**  
**Grande espansione economica**

In the 70s the introduction of modern specific and precise machines brought about a huge increase in the overall production, Maniago was dynamic and blooming with more than 200 artisanal firms, 15 medium size enterprises and 4 industries. The new technologies paved the way to a diversification and specialization of the production to include other products in addition to classic knives, such as dental and surgical instruments, scissors and shears, kitchenware, corkscrews, potato-peelers, sports and sub knives, turbine-engine blades, fine arts spatulas and many more. In those years Maniago supplied the German Federal Republic Army with more than 380.000 bayonets.

Gli anni '70 furono caratterizzati da un incremento della produzione grazie all'inserimento di macchine moderne specializzate; la realtà produttiva era costituita da 200 aziende artigiane, 15 imprese di media dimensione e 4 aziende industriali. La produzione, non più limitata alla coltelleria, si diversificò specializzandosi in altri ambiti, come gli strumenti dentali, la posateria, le forbici, i pelapatate, i cavatappi, le pale per turbine, le spatole per belle arti, i coltelli per attività sportive, le forbici per giardinaggio e via dicendo. In quegli anni Maniago fornì l'Esercito della Repubblica Federale Tedesca di ben 380.000 baionette.

MANIAGO

# MANIAGO

**City of cutlery**  
**Città delle coltellerie**

*Founded in 981 d.C. / Fondato nel 981 d.C.*

Maniago's talent for blacksmith art has grown to the point that the town today is identified as the "**City of knives**" by definition.

In the last decades the ability and know-how of Maniago's smiths have been reshaped and adjusted to meet the current needs of modern market: diversification was the key to successfully face the new challenges; Maniago's manufacturers are nowadays leaders in the following sectors:

- Cutleries
- Surgical instruments
- Blades for turbines
- Spatulas for fine arts
- Corkscrews of refined design

L'abilità di Maniago nell'arte fabbrile è tale da avergli attribuito l'identificazione di "Maniago – Città delle coltellerie".

Negli ultimi anni le straordinarie abilità dei fabbri maniaghesi si sono adattate ai bisogni di un mercato sempre più esigente e la diversificazione è stata la chiave per poter affrontare con successo le nuove sfide; i produttori maniaghesi sono infatti leader mondiali nei seguenti settori:

- Coltellerie
- Strumenti chirurgici
- Pale per turbine
- Spatole per belle arti
- Cavatappi di design raffinato

# MUSEUM

Museum of cutlery

Il Museo delle coltellerie

The Museum of smith's art and cutlery is housed inside the building which was the first big cutlery industry in Maniago. The museum reconstructs the work environments and tools used from the beginning to the present day thus documenting the historical and technological evolution of the centenary cutlery tradition of Maniago, the different ways of working iron are widely illustrated. The Museum, hosting also several congresses, seminars and conferences, represent a great resource for the town Maniago because it strengthens the collective identity and transmits the values and the knowledge of the ancient blacksmiths to the new generations.

Il Museo dell'arte fabbrile e delle coltellerie è allestito all'interno della prima vera industria di Maniago: all'interno sono ricostruiti strumenti e ambienti di lavoro che documentano l'evoluzione storica e tecnologica della tradizione secolare di Maniago, con i vari metodi di lavorazione dell'acciaio. Il museo, sede anche di numerosi congressi, seminari e conferenze, è una risorsa importante per Maniago: sviluppa il senso di identità collettiva e trasmette alle generazioni a venire i valori e le conoscenze della secolare tradizione dei fabbri di Maniago.

# OUR 600 YEARS OF TRADITION ARE THE UTMOST GUARANTEE OF QUALITY FOR OUR CUSTOMERS

**I NOSTRI 600 ANNI DI TRADIZIONE  
SONO LA MIGLIORE GARANZIA  
DI QUALITÀ PER I NOSTRI CLIENTI**

- MEDESYS is the admirable result of 600 years of knowledge, skill and culture in the creation of surgical instruments.
- History smoothly flows in our products, tradition and culture the fundamental background for our work.
- 600 years of experience: the utmost guarantee for the quality of our products.
- For 600 years artisans have been forging and shaping: driven by passion to produce tools as an expression of art.
  
- MEDESYS è la concretizzazione di 600 anni di esperienza, abilità e cultura nella produzione di strumenti chirurgici.
- Noi siamo la nostra storia: noi siamo 600 anni di tradizione e cultura.
- I nostri 600 anni di esperienza: sono la tua miglior garanzia di ricevere qualità.
- Da 600 anni i nostri artigiani si dedicano al loro lavoro come se fosse un'arte.

We have refreshed our logo to better enhance the core elements featuring MEDESYS:

- Proud to be an **Italian** Company.
- Our **tradition** covering more than 600 years.

The word “guarantee” on our previous shield was restrictive and did not fully express the concept of essential historical and cultural heritage on which MEDESYS has laid its foundations.

Abbiamo rinnovato il logo focalizzando maggiormente questi elementi fondamentali che caratterizzano MEDESYS:

- L'**italianità** di MEDESYS.
- La **tradizione** di 600 anni.

La parola ‘garanzia’ in precedenza nello scudo era limitativa e non esprimeva bene il concetto di importante eredità storica e culturale di cui MEDESYS è l'espressione.

**600**  
**YEARS**  
**TRADITION**

®

## MEDESYS COMMITDENT

**A better world begins with each of us every day! Join our CommitDent philosophy too!**

**Un mondo migliore inizia ogni giorno con ognuno di noi. Partecipa anche tu alla filosofia CommitDent!**

### PERSONAL COMMITDENT COMMITDENT PERSONALE

Our employees are the most precious asset for MEDESYS. For this purpose, MEDESYS has acquired a **next-generation semiautomatic defibrillator** and hosted a utilization training course for the entire staff.

I nostri collaboratori sono la risorsa più preziosa di MEDESYS. A tal fine MEDESYS si è dotata di un **defibrillatore di nuova generazione semiautomatico** ed ha fatto un **corso di formazione al suo personale** per l'utilizzo dello stesso.

### SOCIAL COMMITDENT COMMITDENT SOCIALE

We are extremely proud to be participating to the **AMS Foundation** project, founded by Dr Alejandro Méndez Silva, which offers a fully free multidisciplinary program focusing on the treatment of children born with cleft palate or lip cleft condition.

Siamo fieri di partecipare al progetto della **Fondazione AMS**, fondata dal Dr Alejandro Méndez Silva, che mette a disposizione a titolo totalmente gratuito un programma multidisciplinare focalizzato nella cura dei bambini affetti da labbro leporino.

📷 **#fundacionams**

## ENVIRONMENTAL COMMITMENT COMMITMENT AMBIENTALE

A full respect for nature and environment are core themes of MEDESYS philosophy, to list some of them:

Il rispetto per la natura e l'ambiente è da sempre al centro della filosofia MEDESYS. Per citare alcuni esempi:

**NEW PACKAGING:** we have selected a new packaging entirely made with paper certified FSC®, sourced exclusively from well-managed forests in compliance with strict Forest Stewardship Council standards.

**NUOVO PACKAGING:** abbiamo scelto un nuovo packaging interamente costituito da carta certificata FSC® questo marchio (Forest Stewardship Council®) identifica che il prodotto proviene da foreste gestite in maniera corretta.

**GREEN ENERGY:** MEDESYS invests on renewable and sustainable sources, green energy such as photovoltaic panels.

**ENERGIA PULITA:** MEDESYS investe nelle risorse rinnovabili e nell'energia pulita, come i pannelli fotovoltaici.

**CENTRIFUGES:** MEDESYS has adopted some devices which clean the instruments from manufacturing residual oils, which are then recycled.

**CENTRIFUGHE:** MEDESYS si è dotata di alcune macchine che attraverso la forza centrifuga ripuliscono gli strumenti dall'olio utilizzato in precedenti fasi lavorative che viene poi riciclato.

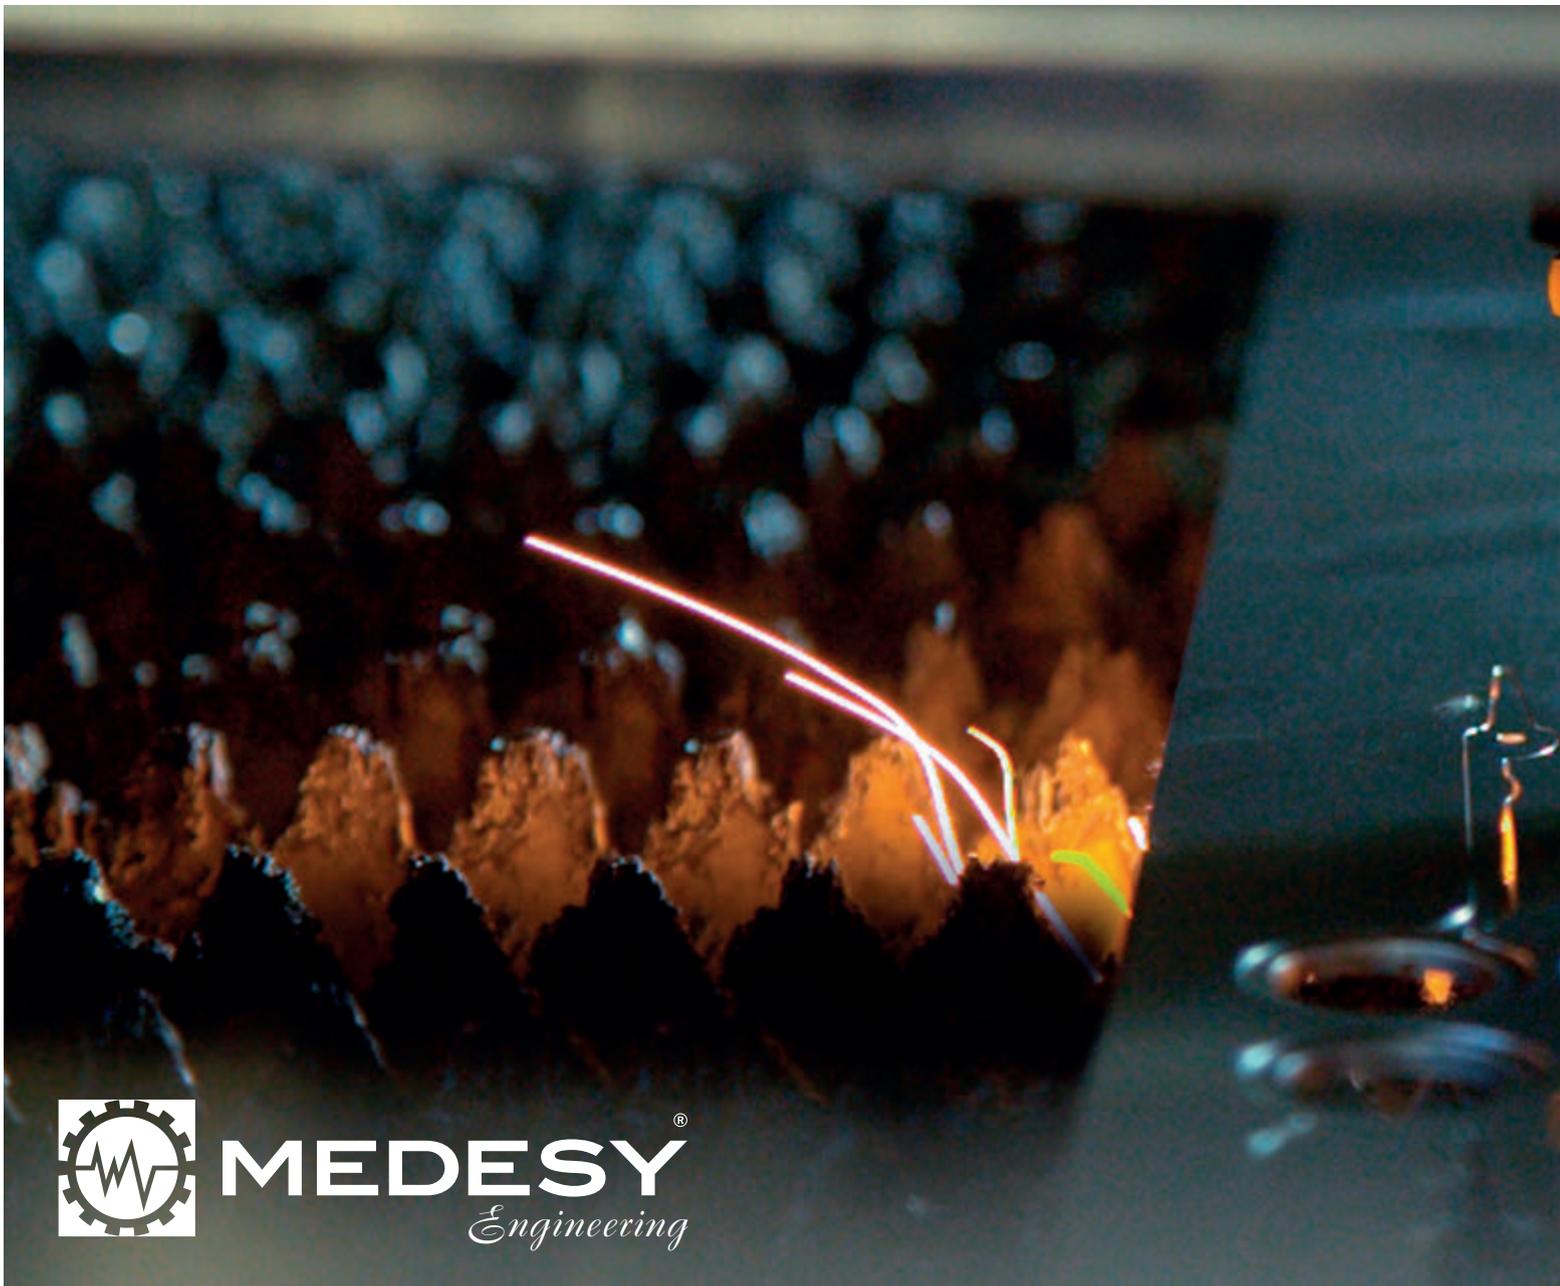

# MEDESY INNOVATION

## INNOVAZIONE MEDESY

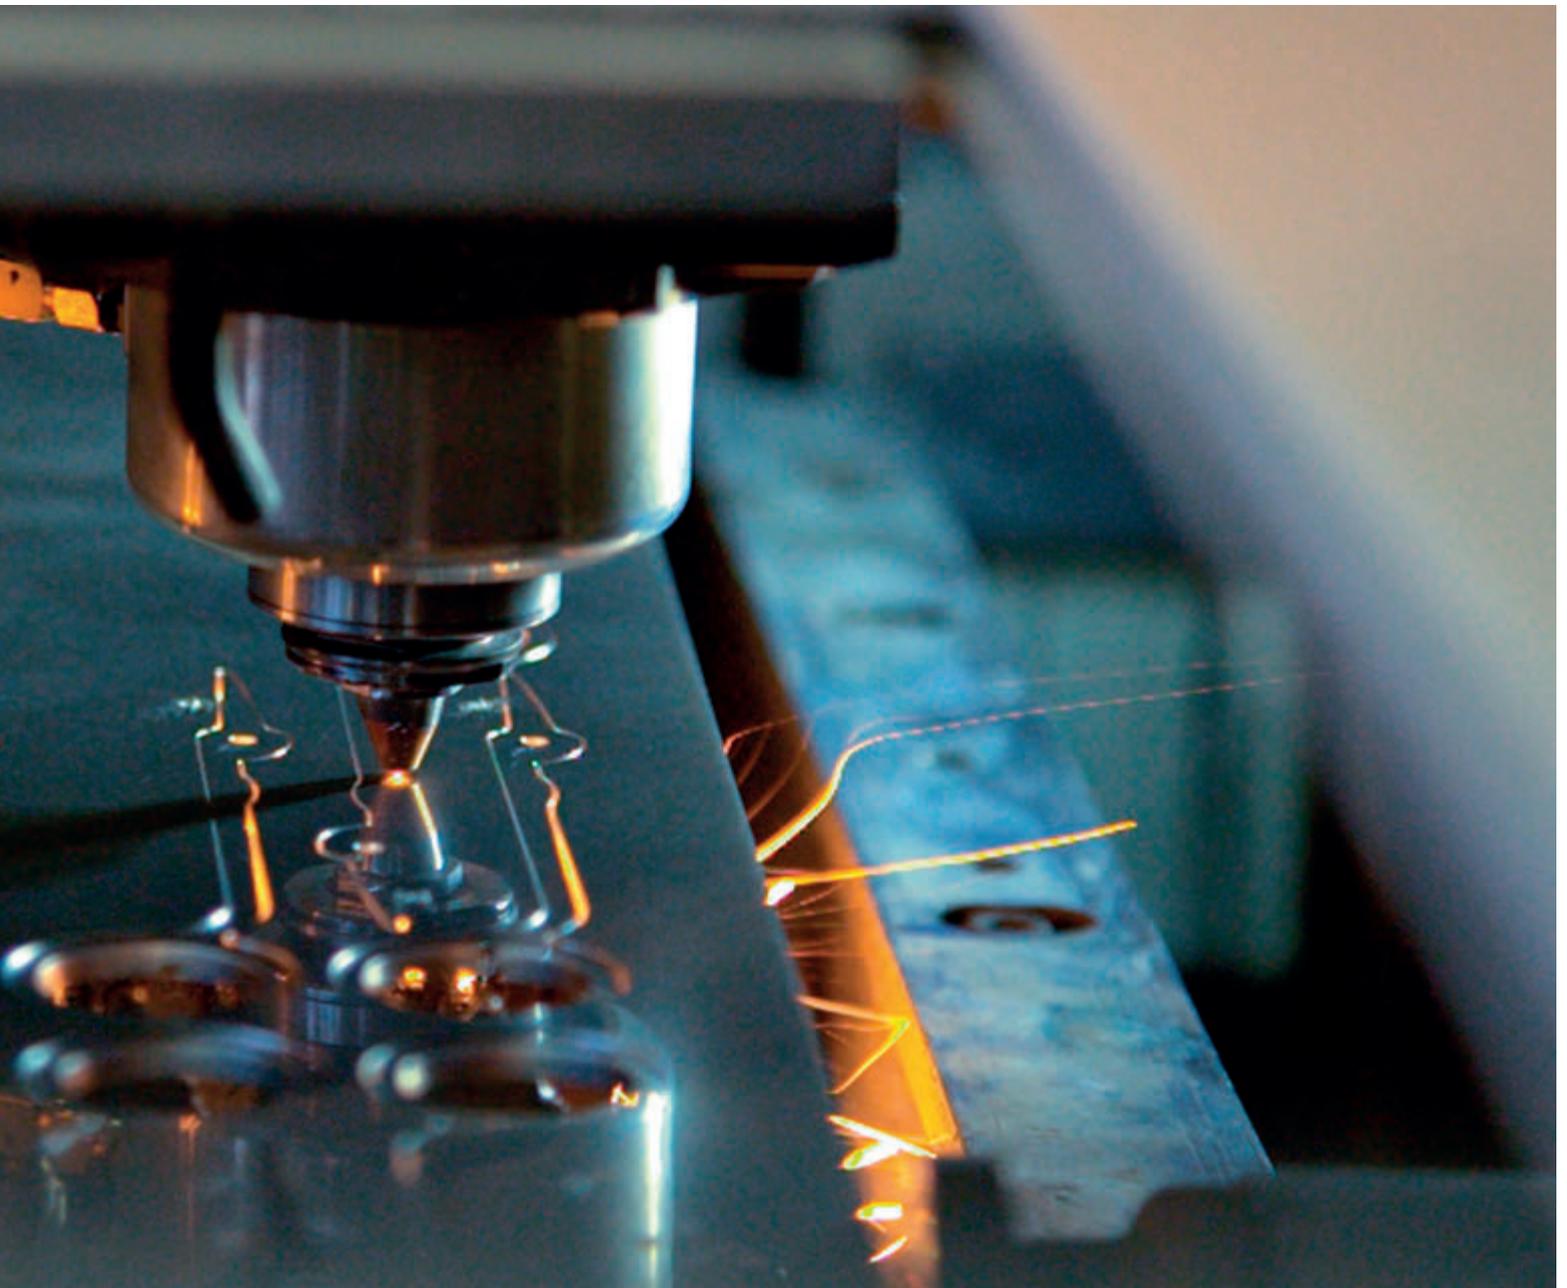

MEDESY is anchored to the values of the past but also oriented to the future: the huge investments on sophisticated technological machineries confirm MEDESY commitment on constant innovation.

MEDESY ha il cuore ben saldo nella propria cultura ma è al futuro che volge il suo sguardo: gli ingenti investimenti in nuovi sofisticati macchinari confermano l'impegno di MEDESY nell'innovazione continua.

**MEDESY**<sup>®</sup>

*Laser cut / Taglio laser*

## OUR RESEARCH

### LA NOSTRA RICERCA

From a daily contact with our customers and the special attention we confer to our partners' needs we draw the motivations and the suggestions to keep on improving our instruments with the purpose of facilitating the techniques and the daily tasks of dental practitioners. MEDESYS works in close cooperation with opinion leaders and professors of worldwide universities in order to design and produce the best innovative instruments, such as Dr. F. Comella's drop shape mirror, the new Inox syringe or the High Tech BLK.

We are constantly working on the research and development of:

- New instruments
- New materials
- Different surface treatments
- New surgical techniques

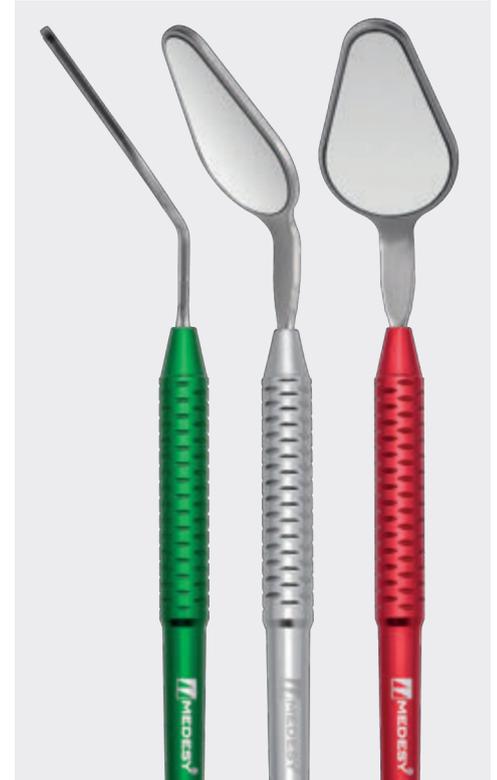

The huge investments on last generation technological machineries as well as the opening of a new production factory prove the great ambition and strong will of MEDESYS Management to keep on improving the Quality Standard.

Il quotidiano contatto con i nostri clienti e la speciale attenzione che dedichiamo alle singole esigenze dei nostri partner ci danno le motivazioni ed i giusti input per migliorare continuamente i nostri strumenti, con lo scopo ultimo di agevolare le tecniche e le attività quotidiane dei professionisti. MEDESYS lavora in stretta collaborazione con opinion leader e professori di università di tutto il mondo, al fine di progettare e produrre strumenti migliori ed innovativi, come lo specchio a forma di goccia Dr. F. Comella, la nuova siringa in inox e le nuove forbici High Tech BLK.

Lavoriamo ed investiamo costantemente su:

- Sviluppo di nuovi strumenti
- Sviluppo di nuovi materiali
- Sviluppo di differenti trattamenti di superficie
- Sviluppo di nuove tecniche chirurgiche

Gli enormi investimenti in macchinari di ultima generazione tecnologicamente avanzati e l'apertura del nuovo stabilimento di produzione dimostrano la forte volontà e l'orientamento del MEDESYS Management nel voler aumentare costantemente lo standard qualitativo dei nostri prodotti.

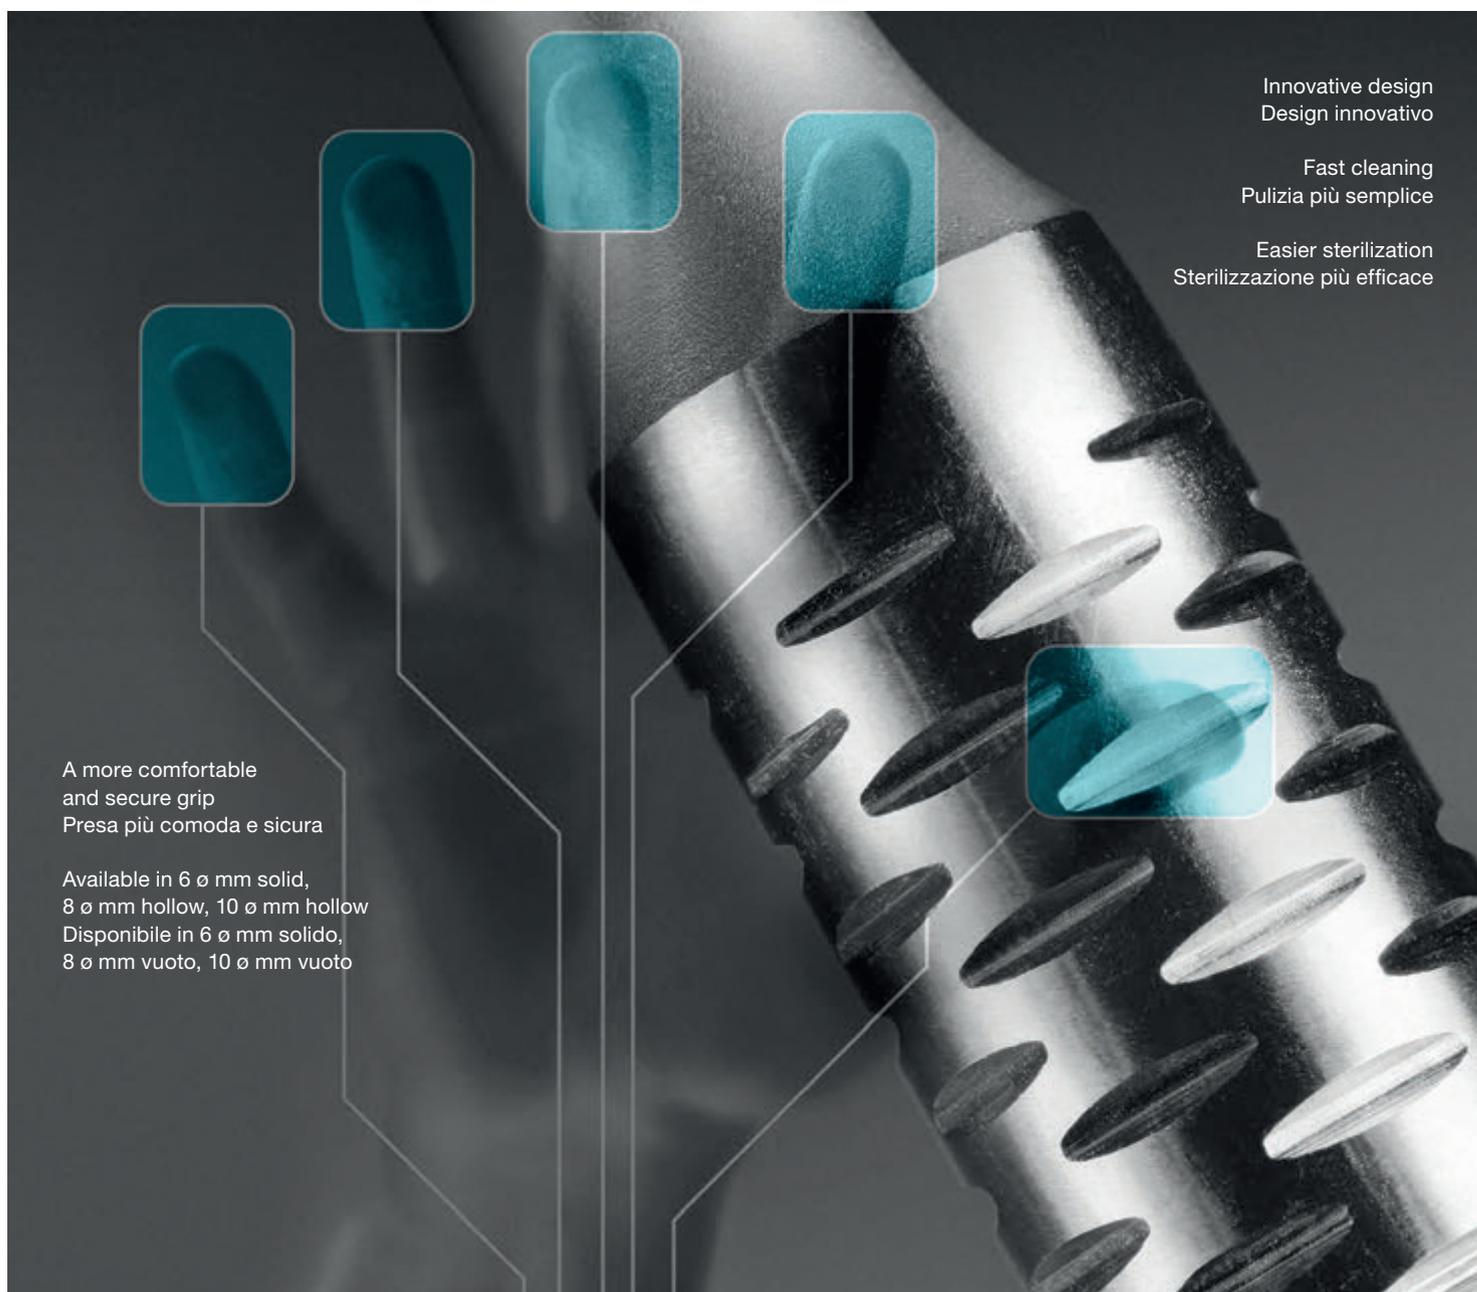

# DALILA<sup>®</sup>

## MEDESYS HANDLE

### MANICO MEDESYS

Our heritage and background are the pillars as well as the engine of MEDESYS production where each single instrument is the perfect combination between artisanal expertise and technological approach: the added value of our handle, DALILA, is the expression of our artisanal culture and a strong investment in innovation and research. Our purpose: offering you high-performance instruments which may improve and fully respond to your daily needs.

La nostra cultura e la nostra secolare esperienza sono i pilastri e la principale energia della produzione MEDESYS: ogni singolo strumento è la concretizzazione del perfetto equilibrio tra esperienza artigianale e sviluppo tecnologico; il valore aggiunto di DALILA, il nostro manico, testimonia sia la nostra cultura sia il nostro costante investimento in innovazione e ricerca, così da potervi offrire strumenti sempre più rispondenti alle vostre esigenze.

## Clinical Case – Caso Clinico

### Extraction of the tooth 36 (1<sup>st</sup> inferior molar)

Estrazione del dente 36  
(1° molare inferiore)

X-ray PRIOR and POST extraction, highlighted is the internal bone which is fully intact and above all the ALVEOLE SITE is PERFECTLY and TOTALLY UNDAMAGED.

Raggi X PRIMA e DOPO l'estrazione, dove si evidenzia l'osso interno perfettamente intatto. ALVEOLO perfettamente INTEGRO.

**1** The periodontal and alveolar tissues remain **fully undamaged** after the extraction, no lacerations, no huge bleeding, the neighboring tissues are practically perfect after the operation! I tessuti parodontali ed alveolari rimangono **perfettamente intatti** dopo l'estrazione, assenza di lacerazioni e sanguinamento copioso, anche i tessuti adiacenti rimangono praticamente perfetti!

**2** It is a fully reliable alternative technique allowing the immediate insertion of the implant in a perfect and undamaged alveolus. Possibilità di inserimento di un impianto subito dopo l'estrazione: questo perché l'alveolo rimane perfettamente integro.

**3** No need to perform a syndesmotomie and luxation before the extraction. Non è necessario effettuare la sindesmotomia e la lussazione prima dell'estrazione.

**4** Smaller in size than a forceps: no need for the patient to remain full open mouth as required with conventional techniques. Permette una minor apertura della bocca rispetto alla tecnica tradizionale che impiega le pinze per estrazione, quindi maggior comfort per il paziente.

**5** The extraction of **roots** and **damaged teeth** or **partially ruined teeth** is really easier and faster. L'estrazione di **denti**, anche **completamente o parzialmente scoronati**, è effettivamente più semplice e veloce.

**6** The extraction made with Exomed® does not require any special high pulling force of the dentist. Le estrazioni con Exomed® sono ottenute esclusivamente con la forza delle due dita: non è necessario pertanto alcuno sforzo.

**... and smaller in size than a forceps!**  
... ed è più piccolo di una pinza!

## SET OF TOOTH FORCEPS SERIE DI PINZE PER ESTRAZIONI

### 2500/SET-10

Contains / Contenuto:  
2500/74-13-22-79-33  
2-7-18A-67-51

The essential extraction Set including Medesy's most representative forceps:

- SET 10 pcs: for the basic extractions, from centrals to the third molars.
- SET 12 pcs: includes 2 additional forceps, the cow horn beak N-86 and the N-74 for lower roots and incisors.

Medesy experience and tradition aims at providing professional kits.

Set essenziale di pinze per estrazione di Medesy:

- SET 10 pezzi: permette di eseguire estrazioni primarie, dai denti centrali sino agli ottavi.
- SET 12 pezzi: composto da 2 ulteriori pinze, la corno di bue n-86 e la n-74 per l'estrazione di radici inferiori e incisivi.

Tutta l'esperienza e tradizione Medesy, da sempre indirizzata a fornire kit professionali a professionisti.

Dr. Fabrizio Comella: since the beginning of his career, as a dentist and researcher, he has been active in the specific field of technical development applied to dental instruments and devices. He is regularly cooperating with MEDESYS since 2007 for the study and the realization of innovative instruments conceived for use in surgery and implantology.

Dr. Fabrizio Comella: sin dall'inizio della sua carriera, come dentista e ricercatore, ha sfruttato le sue competenze tecniche nello sviluppo di strumenti in ambito odontoiatrico. Collabora attivamente con MEDESYS sin dal 2007, con la quale ha realizzato innovativi strumenti nel campo della chirurgia ed implantologia.

## TOOTH FORCEPS BY DR. COMELLA

### PINZE PER ESTRAZIONE DEL DR. COMELLA

**2400/70**

(1:1 scale / scala 1:1)

#### DR. FABRIZIO COMELLA'S FORCEPS

Dr Comella's forceps are the only forceps specifically designed for the extraction of the root and fragments of horizontal impacted third molars. The extraction of impacted third molars deserves a special attention for its complexity. Traditional tools and especially the elevators may be very unsafe as they may cause a damage to adjacent nerves and tissues, in the worst case even to the lingual nerve. Dr. Comella's forceps offer a secure and comfortable grip for an easy handling and healthy preservation of the surrounding tissues.

(Protected by International Patent)

#### LA PINZA DEL DR. FABRIZIO COMELLA

La pinza del Dr. Comella è stata sviluppata specificatamente per l'estrazione delle radici e frammenti dell'ottavo incluso. Nella pratica odontoiatrica, l'estrazione di un ottavo incluso richiede una precisione assoluta, essendo di fatto un intervento tra i più delicati. Particolarità di questa pinza è la possibilità di estrarre anche le radici che risultano meno accessibili con l'ausilio di strumenti tradizionali: in particolare l'uso delle leve può provocare lacerazioni dei tessuti molli adiacenti con interessamento (nei casi più estremi) del nervo linguale. La pinza del Dr. Comella offre una presa sicura, preservando i tessuti adiacenti.

(Protetta da Brevetto Internazionale)

## TOOTH FORCEPS BLADE BEAKS

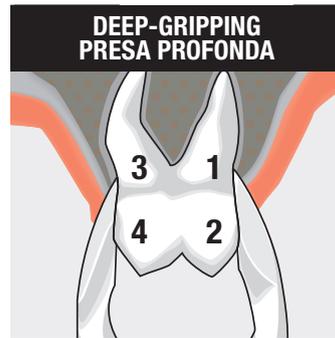

### PINZE PER ESTRAZIONE BLADE BEAKS

#### FORCEPS "BLADE BEAKS"

- 1 "Blade Beaks" smoothly penetrate in contact with the root.
- 2 They have larger contact surface for a secure grip.
- 3 They are delicate with surrounding tissues and minimize the risk of tooth fracture.
- 4 They give better control over the root during the extraction operations.

#### PINZE "BLADE BEAKS"

- 1 "Blade Beaks" penetrano facilmente sino al contatto della radice.
- 2 Hanno una maggior superficie di contatto per una presa più sicura.
- 3 Assicurano un maggior rispetto dei tessuti e riducono il rischio di frattura del dente.
- 4 Danno maggior controllo sulla radice durante le fasi di estrazione.

## FORCEPS FOR LOWER WISDOM TEETH PINZE PER DENTI DEL GIUDIZIO INFERIORI

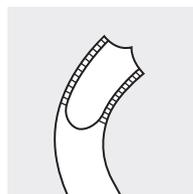

Both forceps are specifically projected for the extraction of lower wisdom teeth. Their special shape allows an easy and safe extraction even when the patient is unable to fully open the mouth. The forceps must be positioned between tooth # 7 and # 8. After checking if the dental arch is complete evaluate if tooth # 7 is healthy as it is often decayed. Squeeze the handles of the forceps while tilting them simultaneously, the tooth #8 will be levered out presenting the root in the distal position (as you will be able to verify through an x-ray image).

Entrambi i modelli di pinze sono ideali per l'estrazione dei denti del giudizio inferiori. La loro speciale sagoma permette di operare anche in caso di apertura limitata della bocca. La pinza si posiziona fra il 7 e 8 facendo attenzione che l'arcata sia completa ed il 7 sano (il quale spesso non è in ottime condizioni). Chiudendo ed inclinando la pinza, l'8 verrà sollevato e la radice si presenterà in posizione distale (come sarà poi possibile verificare con l'x-ray).

#### ROOT ELEVATORS "KOPP"

A distinct elevator having a sharp edged helical groove on the tip ensuring an easier penetration between the tooth and the alveolus. A safe and fast extraction of the root is obtained through moderate pressure and smooth rotation of the elevator. Available in 2 sizes, the small 3,6 mm and the large 4,2 mm.

#### LEVE PER RADICI "KOPP"

Si distinguono facilmente grazie alla forma elicoidale delle punte e zigrinatura interna. La penetrazione della punta tra dente ed alveolo risulterà facilitata, a tutto vantaggio di una estrazione sicura e veloce. Di fatto, con una moderata pressione e rotazione della leva stessa, la radice sarà estratta agevolmente. Disponibile in 2 misure, la piccola di 3,6 mm e la grande di 4,2 mm.

Lussatore elevators have extremely thin and sharp blade and better fit in tight apical spaces, as well as more efficient at cutting the periodontal ligament. The special shape ensures an easy widening of the alveolus, in many cases making the use of extraction forceps needless.

Leva che possiede una lama estremamente piatta e tagliente, permette una precisa penetrazione e taglio del ligamento periodontale. Il vantaggio del Lussatore risiede nella diminuzione dei traumi esercitati sui denti e gengive ed in molti casi esclude la necessità dell'uso delle tenaglie per estrazione.

### SERRATED TIPS PUNTE ZIGRINATE

Thanks to the serrated tips, elevators **LINDO LEVIAN** ensure a smooth extraction of the root and eliminate the need of any leverage procedure. A slight rotary movement of the tip, positioned between the alveolus and the root will produce an easy extraction.

Grazie alle punte zigrinate, con le leve **LINDO LEVIAN** si può ottenere l'estrazione della radice escludendo il classico effetto leva. Una volta inserita la punta in posizione, per mezzo di un delicato movimento rotatorio si potrà estrarre la radice.

# LUSSATORE LEVER FOR UPPER WISDOM TEETH

## LEVA D'ESTRAZIONE PER IL DENTE DEL GIUDIZIO SUPERIORE

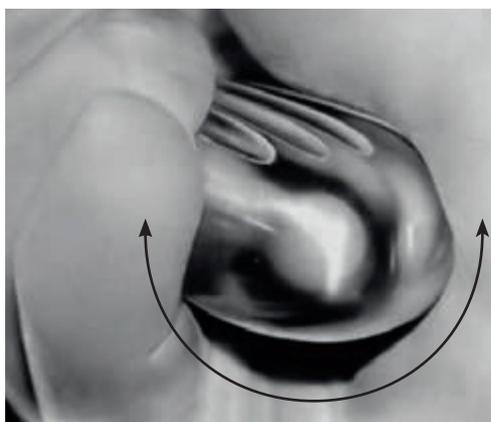

The luxating elevator is inserted vertically between the third molar and the second molar firmly pressed up to the level of the gingival tissue.

La leva viene inserita verticalmente tra il terzo e secondo molare, premendo fermamente sino alla gengiva.

The third molar is pulled out from the alveolus on its distal axis by rotating the luxating elevator.

Il terzo molare sarà estratto dall'alveolo in direzione distale rispetto il proprio asse, attraverso una leggera rotazione della leva.

The instrument must be used only by exploiting the rotating force in distal direction.

**IMPORTANT:** never use the second molar as a lever point for the instrument during the luxation.

Lo strumento deve essere usato con forza di rotazione in direzione distale.

**IMPORTANTE:** non considerare il secondo molare come punto di appoggio durante la lussazione.

**MIDELUX** minute elevators available in 3 different sizes.

A specific distal and mesial shape ensures an easy as well as rapid loosening of a tooth. The smaller size for standard general use while the 4 mm tips specific for loosening molar teeth. The set is completed by a special elevator having an arrow-shaped tip for detaching desmodontal fibres. All tips are in stainless steel and blue titanium coated.

**MIDELUX**, mini leve disponibili in 3 differenti forme. La lussazione risulterà facile e veloce grazie alla speciale forma sviluppata, mesiale e distale. La punta sottile risulta ideale per un utilizzo generico, mentre la punta larga da 4 mm è appositamente studiata per i molari. Il set si completa con una speciale punta a freccia per rimuovere tessuti. Gli strumenti hanno le punte in acciaio anodizzato con titanio.

mm 3,4	mm 3,4	mm 3,4	mm 3,4	mm 4,5	mm 4,5	mm 3,4
<b>Left</b> Sinistra	<b>Right</b> Destra	<b>Mesial</b> Mesiale	<b>Distal</b> Distale	<b>Distal</b> Distale	<b>Mesial</b> Mesiale	<b>Straight</b> Retta

The insertion of the new *MEDIMPLA* root elevators into the intraligamental zone is easier thanks to the extreme sharpness and perfect bending of the tip. These elevators have been conceived to perform a minimum traumatic extraction and therefore to preserve the alveolar site in perfect conditions. The special "pen form" assures very delicate movements. All the tips are in stainless steel and blue titanium coated.

L'inserimento della leva *MEDIMPLA* nel sito intraligamentale risulterà facilitato grazie ad una estrema finezza e particolare curvatura di questa nuova linea di mini leve. Tutto ciò al fine di garantire un'estrazione più atraumatica possibile, che permette quindi di conservare il sito alveolare in perfette condizioni. La speciale forma "a penna" assicura movimenti particolarmente delicati. Gli strumenti hanno le punte in acciaio anodizzato con titanio.

**“ MEDESYS IN SPOT**

*Medesy periosteal elevators have a special handle characterized by 2 flat sides, ensuring more comfortable grip and maximum control of the instrument. All the line is available in titanium coated, just add “Ti” after the code.*

*Scollaperiosteali in manico pieno, con 2 parti piatte, lunghezza 170 mm. A vantaggio dell'utilizzatore per una miglior percezione e presa dello strumento. Tutta la linea è disponibile ricoperta in titanio, aggiungere “Ti” dopo il codice.*

”

### PERIOTOME

Handle with 4 interchangeable blades, for atraumatic extraction of teeth with minimal damage to the surrounding alveolar bone. Thanks to the sharp and delicate blades, the marginal gingiva and periodontal ligament can be carefully detached. Its use is particularly important when considering dental implants. PERIOTOME IS USED FOR CUTTING, NOT FOR LEVERING.

### PERIOTOMO

Strumento con 4 lame intercambiabili, indirizzato alla fase di estrazione del dente senza compromettere o danneggiare il sito alveolare. Grazie alle lame efficacemente affilate e delicate, il taglio di gengiva e legamento parodontale risulterà semplice e sicuro. Il suo utilizzo è particolarmente indicato in tema di impianti dentali. IL PERIOTOMO È UNO STRUMENTO DA TAGLIO, NON UNA LEVA.

# SURGICAL SCISSORS, HI-TECH

## FORBICI CHIRURGICHE, HI-TECH

New surgical scissors HI-TECH, innovative and absolutely unique as they are entirely laser cut from stainless steel sheets instead of using classic hot forging processes. The laser cutting technique ensures a constant and higher quality standard as well as perfect geometrical uniformity on each item. The main features of the HI-TECH scissors are:

- Elevated hardness degree (56 HRC);
- Shape and size uniformity and accuracy;
- Assembly on elastic bases for a constant and smoother action.

Nuove forbici chirurgiche HI-TECH, innovative ed uniche nel loro genere in quanto ricavate da fogli di acciaio tagliati a laser anziché da metodo classico mediante forgiatura a caldo. Tale sistema di produzione assicura elevati standard qualitativi e geometrie perfette. Le principali caratteristiche che contraddistinguono le forbici HI-TECH sono:

- Elevata durezza (56 HRC);
- Garanzia di forma e misure;
- Assemblaggio su basi elastiche per costante scorrevolezza.

# SURGICAL SCISSORS, HI-TECH

## FORBICI CHIRURGICHE, HI-TECH

Medesy HI-TECH scissors are available also in the BLK variant: a special surface Diamond Like Carbon Coating, otherwise referred to as DLC coating which enables the following features:

- Prolonged edge sharpness;
- Cutting smoothness;
- High surface micro hardness (2000 HV);
- Stronger corrosion resistance;
- Reduction of light reflect.

Le forbici HI-TECH sono prodotte anche nella variante BLK: uno speciale trattamento superficiale (DLC = Diamond Like Carbon) che consente di ottenere le seguenti peculiarità:

- Affilatura prolungata;
- Fluidità di taglio;
- Microdurezza superficiale elevata (2000 HV);
- Maggiore resistenza alla corrosione;
- Superficie antibatterica;
- Riduzione della luce riflessa.

**MARILYN scissors, the lightest operating scissors, the extremely fine point ensures the utmost accuracy.**

Forbici serie MARILYN, si caratterizzano per la loro particolare leggerezza e delicatezza in uso.

The scissors here illustrated are characterized by a fine micro serration on one of the blades, specifically applied to firmly grasp the tissue while cutting and to preclude the risk of slipping.

Le forbici qui raffigurate si caratterizzano per la micro dentatura presente su una lama, specifica per trattenere il tessuto durante il taglio ed evitandone lo scivolamento dello stesso.

### MEDESY SUPERIOR CUT SCISSORS

Uniquely sharp scissors with superior cutting capacity: razor-shape blade on one side and fine serration on the other one. The ideal combination for a firm hold and neat cut of the tissue. For easy identification these scissors have one gold ring. Medesy has recently developed a SUPERIOR CUT line variant featuring open rings handles: the best synthesis between practicability and cutting efficiency.

### MEDESY SUPERIOR CUT FORBICI

Forbici uniche per le caratteristiche di affilatura: una lama estremamente affilata (effetto rasoio) e l'altra lama microdentata. Combinazione ideale per garantire la presa dei tessuti e tagli perfetti. Per l'immediata identificazione, un solo anello è dorato. Medesy ha recentemente sviluppato le forbici SUPERIOR CUT con anelli aperti: la miglior combinazione tra maneggevolezza e qualità di taglio.

**“ MEDESY IN SPOT**

*Did you know that a pair of scissors need about 90 working steps to be completely finished?*

*Lo sapevi che una forbice necessita di 90 passaggi produttivi, prima di ottenere il prodotto finito?*

”

Operation cycle of a forged piece.  
 Ciclo di lavorazione di un particolare forgiato.

Standard scissors are not suitable for left handers. Because of their overlapping blades they are not symmetric and therefore best suited for use with the right hand. For right-handed scissors held in the right hand, the thumb blade is closer to the user's body, so that the natural tendency of the right hand is to force the cutting blades together. Conversely, if right-handed scissors are held in the left hand, the natural tendency of the left hand would be to force the cutting blades laterally apart. Besides that, with right-handed scissors held by the right hand, the shearing edge is visible, but when used with the left hand, the cutting edge of the scissors is behind the top blade, and one cannot see what is being cut. This is why LEFT HANDERS specific scissors with reversed blades are produced.

Per le persone mancine l'uso delle normali forbici costituisce un problema perché lo strumento è asimmetrico. Se anche l'impugnatura fosse giusta, rimarrebbe il problema delle lame perché rovesciando lo strumento la lama superiore coprirebbe la linea di taglio. Usate normalmente le lame taglierebbero all'esterno delle forbici ed il punto di forza delle dita durante il taglio tenderebbe ad allontanare le 2 lame anziché stringerle, vanificando la capacità di taglio. Per questi motivi, vengono prodotte le forbici PER MANCINI.

# SURGICAL SCISSORS, RING LOCK

## FORBICI CHIRURGICHE, RING LOCK

**3590** (mm 95) (1:1 scale / scala 1:1)

Ring lock

Curved

Curva

The Ring Lock System® consists in 2 bearings (one in stainless steel and one in aluminum) and a Teflon ring: all 3 parts are assembled together under pressure.

The Ring Lock System® ensures that the blades stay aligned for a longer time and preserve a high cutting precision in the time. The blades rotate on a circumference that is 60% larger if compared to traditional scissors. This is the key for a smoother and more precise cut, allowing a longer duration of the cutting edge. The internal Teflon ring is auto lubricant and a not deformable material (used in the autoclave).

Il Sistema Ring Lock® consiste in 2 bussole sovrapposte (una in acciaio ed una in alluminio) unite da un anello in Teflon il tutto chiuso a pressione. Grazie a questo innovativo sistema, le lame ottengono una capacità di apertura maggiore del 60% circa rispetto ad una forbice tradizionale. Tale vantaggio permette di ottenere forbici più fluide con un taglio sempre preciso e lame affilate. L'anello interno in Teflon è auto lubrificante e non deformabile (uso in autoclave).

**“ MEDESY IN SPOT**

*The needle-holders in pure titanium are characterized by a special lightness and high endurance degree. Manufactured with smooth tips for very thin needles (8-0, 9-0, 10-0) and a safety double-wing locking system. Blue anodized.*

*I porta aghi in Titanio si contraddistinguono per la loro leggerezza e resistenza in genere. Presentano punte lisce per aghi molto sottili (8-0, 9-0, 10-0) ed un sistema di chiusura a doppia aletta. Anodizzati blu.*

# SOFT TISSUE RETRACTORS

## DIVARICATORI PER TESSUTI MOLLI

The tip pointing down allows more control of the grip, meanwhile it leaves you a better view for the operation. The convex and grooved shape of the blade provides a better support on the lip and makes the grip less traumatic.

La punta rivolta verso il basso permette un maggior controllo della tenuta, e nel contempo lascia maggior visuale per l'intervento. La forma scanalata e convessa della lama, permette un migliore appoggio al labbro e rende meno traumatica la tenuta.

925/1 (mm 7×25)

925/4 (mm 12×55)

925/2 (mm 10×35)

In line with our project of improving the quality, functionality and durability of the entire range of syringes we are now introducing a selection of innovative syringes made of specific stainless steels which can guarantee the below mentioned characteristics.

La ricerca finalizzata ad aumentare la qualità, funzionalità e durata delle siringhe Medesy, continua con l'introduzione di siringhe prodotte interamente con specifici acciai inossidabili, i quali garantiscono le peculiarità sotto indicate.

**Interchangeable tips: for European needles (Metric) characterized by a circular thread; for American needles (Inch) with fully smooth thread.**

Puntali intercambiabili: filettatura Europea (metrica) riconoscibili dal segno circolare; filettatura Americana (inch) completamente lisci.

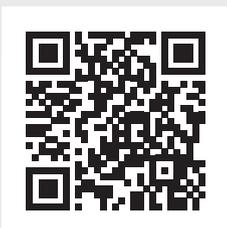

**Anchoring tip with very innovative helicoidal shape which has been specifically designed to enable a better hooking and unhooking of the carpule rubber seal, (hold by clockwise turning /release anti-clockwise turning). *Patented.***

Innovativo arpione elicoidale, ideato per agevolare l'aggancio ed il rilascio del gommino carpule: si aggancia avvitando in senso orario, mentre si rilascia avvitando in senso antiorario. *Brevettato.*

**Smooth and neat lines ensure a more practical handling and an extremely easy cleaning.**

Superfici lineari e levigate per maggior comfort d'uso e praticità di pulizia.

### ADVANTAGES OF INTRALIGAMENTAL ANESTHESIA:

- Automatic limitation of the power pressure.
- Anesthetizing of a single tooth.
- No numbness of the tongue, lips or cheek.
- Simultaneous treatment of teeth in different quadrants.
- Supports regional block anesthesia.
- Eliminates the risk of haematoma.
- Lower emotional impact on patient.
- Less anesthetic needed.

### FEATURES:

- Fully autoclavable.
- Removable headpiece with angled threaded nozzle for the injection needle.
- Viewing chamber with safety sleeve for carpule cartridge.
- Handle servo dosing lever with optimal support for index finger for a gradual advance of the dosing plunger resetting key.
- No waiting time between injections and beginning of treatment.
- Excellent depth of anesthesia combined with shorter duration.
- Much less pain than standard injections (infiltration anesthesia in hard palate, intrapulpal or intraseptal injections or for papillectomy).
- A smaller quantity of given anaesthetic.
- Needle suggested: 30G.

As opposed to a classical infiltration or block anesthesia, this method injects the local anesthesia directly into the dental ligament (periodontal ligament) and thus guarantees a rapid, profound and total anesthesia of a single tooth.

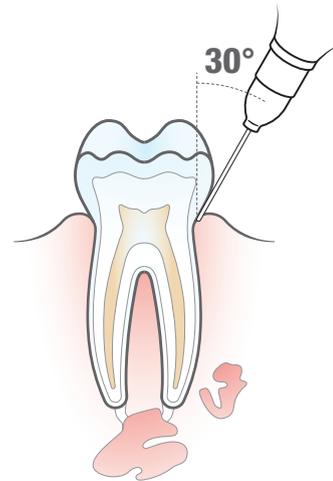

Contrariamente all'anestesia tradizionale che coinvolge un'intera zona, questo metodo inietta l'anestesia locale direttamente nel legamento del dente e ciò garantisce una rapida, profonda e totale anestesia di un solo dente.

### I VANTAGGI DELL'ANESTESIA INTRALIGAMENTALE:

- Limitazione automatica della potenza di pressione.
- Effetto circoscritto al solo dente da trattare.
- Assenza d'intorpidimento dei tessuti molli.
- Trattamento simultaneo di denti localizzati in zone diverse.
- Effetto rapido e profondo.
- Elimina il rischio di ematomi.
- Minore impatto emotivo sul paziente.
- Minor anestetico utilizzato.

### CARATTERISTICHE:

- Completamente sterilizzabile in autoclave.
- Parte terminale rimovibile con una punta angolata per l'inserimento dell'ago.
- Camera a vista con un astuccio di sicurezza per la cartuccia.
- Manico con leva di servo-dosaggio con un ottimo supporto del dito indice per un avanzamento graduale del pistone di dosaggio.
- Nessuna attesa tra l'iniezione e l'inizio del trattamento.
- Eccellente profondità dell'anestesia e breve durata.
- Molto meno dolore rispetto alle tradizionali iniezioni.
- Minore quantità di anestetico somministrato.
- Ago suggerito: 30G.

### DROP SHAPE MIRROR

The mirror is an indispensable tool for inspecting the oral cavity, soft tissues, anterior and posterior teeth and for all kind of conservative treatment. An improvement to these standard procedures has been achieved with the introduction of our new "drop shape" mirror which facilitates the control of the soft tissues, better protects the tongue wall and above all it offers a larger view of the superior molar portion and of the oral cavity in general. Furthermore the elongated "drop shape" guarantees a wider reflection surface and therefore a major visibility of the oral cavity. *(Protected by international patent)*

### SPECCHIETTO A GOCCIA

Lo specchietto odontoiatrico rappresenta lo strumento necessario per l'ispezione del cavo orale, dei tessuti molli, denti anteriori e posteriori e come protezione nelle manovre conservative. Una miglioria per tutte queste attività è ottenuta con l'introduzione del nuovo specchietto "a goccia" il quale agevola il controllo dei tessuti molli, protegge la lingua e offre una più ampia retrospettiva del versante vestibolare. In aggiunta, il nuovo specchietto "a goccia" garantisce una maggior luce riflessa aumentando così la luminosità del cavo orale. *(Protetto da brevetto internazionale)*

## NEW LINE OF GRACEY CURETTES

### NUOVA LINEA DI CURETTE GRACEY

#### COLOUR CODED

All the standard curettes are available plus two additional lines with different handle and colour-coded for easy identification.

#### CODICE COLORE

La gamma di curette standard è completata da due nuove linee con manico diverso e codice colore per una facile identificazione.

#### A SUPERIOR CURETTE

Using a special new steel alloy MEDESYS has managed to create a superior curette with even sharper edges; greater hardness and excellent wear resistance of the blade guarantee for a more efficient and durable scaling even in case of intensive use.

#### UNA CURETTE SUPERIORE

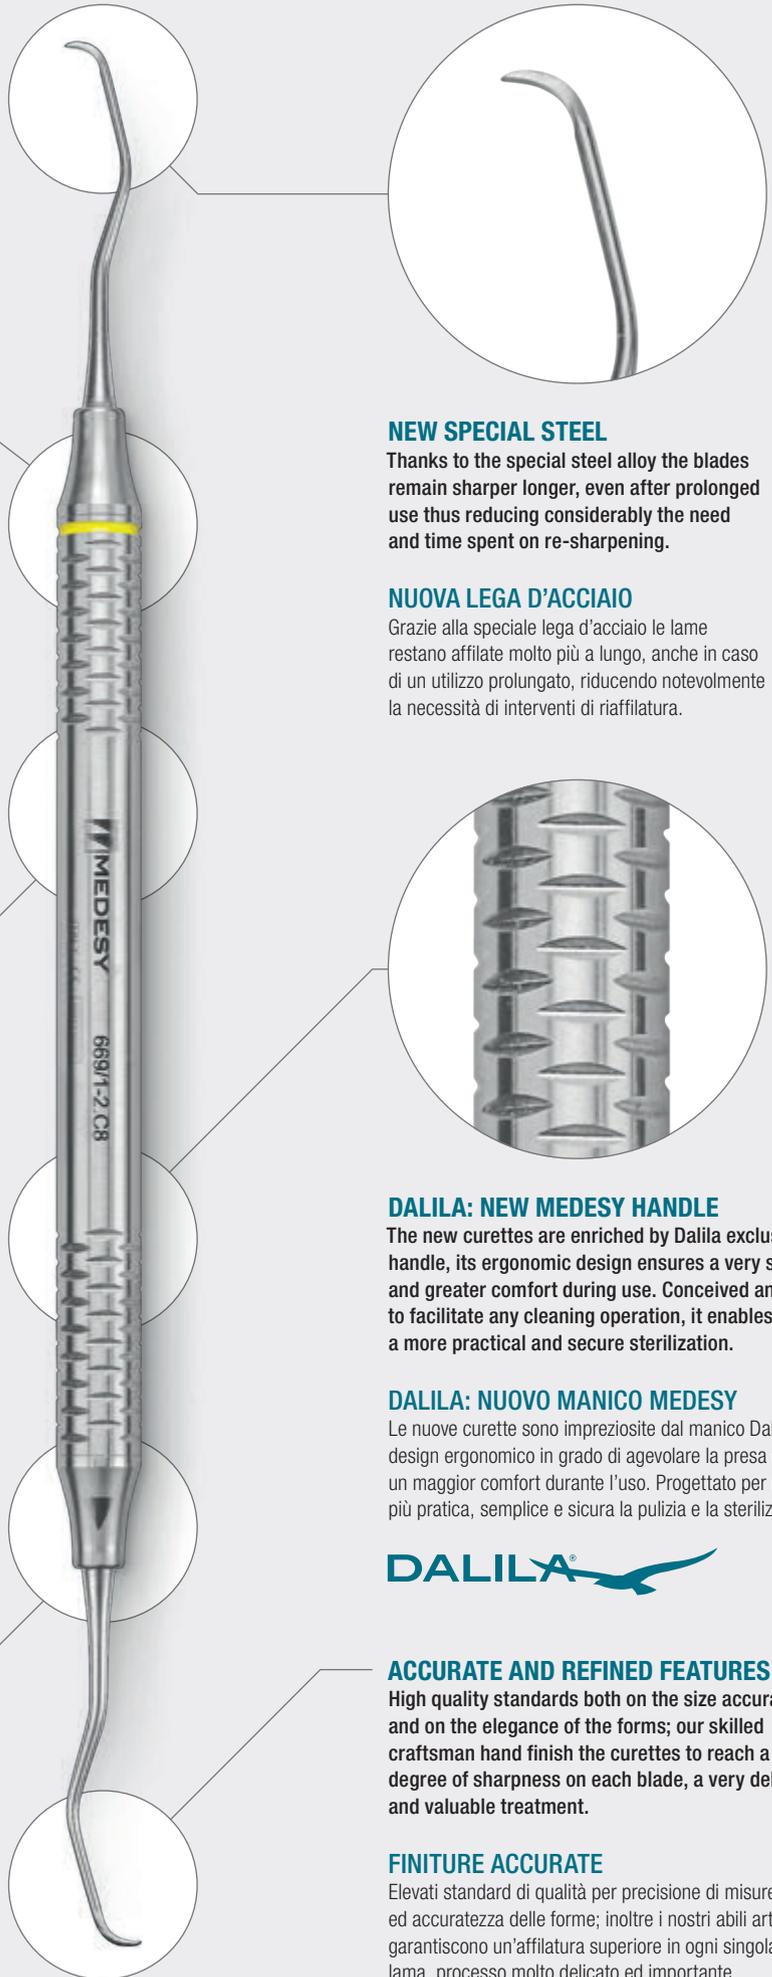

Utilizzando una nuova speciale lega d'acciaio MEDESYS è riuscita a creare una curette di altissima qualità con affilatura di grado superiore; la maggior durezza e quindi resistenza all'usura della lama garantisce un curettage più efficace e duraturo nel tempo anche in caso di utilizzo molto intenso.

#### ARROW-SHAPE INDICATOR

An arrow-shape indicator on the handle shows the sharp side.

#### INDICATORE PARTE AFFILATA

Una piccola freccia sul manico indica il lato affilato della punta.

#### NEW SPECIAL STEEL

Thanks to the special steel alloy the blades remain sharper longer, even after prolonged use thus reducing considerably the need and time spent on re-sharpening.

#### NUOVA LEGA D'ACCIAIO

Grazie alla speciale lega d'acciaio le lame restano affilate molto più a lungo, anche in caso di un utilizzo prolungato, riducendo notevolmente la necessità di interventi di riaffilatura.

#### DALILA: NEW MEDESYS HANDLE

The new curettes are enriched by Dalila exclusive handle, its ergonomic design ensures a very stable grip and greater comfort during use. Conceived and realized to facilitate any cleaning operation, it enables a more practical and secure sterilization.

#### DALILA: NUOVO MANICO MEDESYS

Le nuove curette sono impreziosite dal manico Dalila, un nuovo design ergonomico in grado di agevolare la presa e garantire un maggior comfort durante l'uso. Progettato per rendere più pratica, semplice e sicura la pulizia e la sterilizzazione.

#### ACCURATE AND REFINED FEATURES

High quality standards both on the size accuracy and on the elegance of the forms; our skilled craftsman hand finish the curettes to reach a superior degree of sharpness on each blade, a very delicate and valuable treatment.

#### FINITURE ACCURATE

Elevati standard di qualità per precisione di misure ed accuratezza delle forme; inoltre i nostri abili artigiani garantiscono un'affilatura superiore in ogni singola lama, processo molto delicato ed importante.

## GRACEY CURETTES COMPARISON

### CURETTE GRACEY A CONFRONTO

**GRACEY CURETTES "RIGID TYPE":** have a thicker and less flexible shank than standard Gracey. Used for treatments usually performed with a scaler.

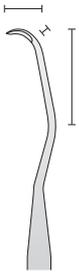

**GRACEY CURETTES "LONG TYPE":** have a longer shank, 3mm longer than standard Gracey and enable deep reaching into the periodontal pockets.

**GRACEY CURETTES "SHORT TYPE":** having the same characteristics as "long type" except for the cutting end, which is shorter to allow easier sub-gingival insertion even in the deepest and narrow periodontal pockets.

**GRACEY CURETTES "TIPO RIGIDO":** curette con stelo più grosso e meno flessibile rispetto la Gracey tradizionale. Utili in operazioni che abitualmente richiedono l'utilizzo di scalers.

**GRACEY CURETTES "TIPO LUNGO":** curette con stelo più lungo di 3mm rispetto la Gracey tradizionale, con lo scopo di intervenire in profondità nelle tasche parodontali.

**GRACEY CURETTES "TIPO CORTO":** curette con la stessa caratteristica della "tipo lungo" con la differenza di avere la parte terminale più corta, al fine di poter intervenire nelle tasche parodontali profonde e strette.

### KIT PERIMPLANTITE

The bacterial aggression observed on the neck portion of the implants is similar to the bacterial aggression observable at the muco-gingival junction of the tooth. The stainless steel instruments may contaminate the titanium made implants while plastic instruments do not fully remove the failing tissues around the implant. Hence the need of using instruments made of titanium, the unique solution for a real efficient and fully safe handling on and close to the implants sites. Blue colour for a simple and fast identification of titanium tips, from standard gray of stainless steel. MEDESY Perimplantite kit includes 4 curettes "Short Type"; 1 curette Columbia; 2 Scalers; 1 periodontal probe.

L'aggressione batterica osservata nel collo degli impianti è simile a quella presente a livello della giunzione muco gengivale del dente. Gli strumenti in acciaio possono contaminare il titanio degli impianti, mentre quelli in plastica non sono in grado di rimuovere in modo efficiente la parte in oggetto. Da qui la necessità di usare strumenti in titanio, la soluzione sicuramente più adeguata per una gestione del problema efficiente ed in piena sicurezza in prossimità degli impianti. Il colore blu delle punte, serve per identificare in modo semplice e sicuro il titanio impiegato, rispetto al tradizionale acciaio.

Il kit Perimplantite di MEDESY è composto da: 4 curettes "Tipo Corto"; 1 curette Columbia; 2 scaler; 1 sonda parodontale.

### “ MEDESY IN SPOT

#### HOW TO SHARPEN A GRACEY?

*After lubricating the stone with a specific sharpening oil, lay the tip of the curette on the upper part of the stone by angling the handle at 60°/70° to the stone.*

*To start the sharpening move the blade forwards and backwards over the stone through regular movements, but apply pressure when pushing the instrument backwards.*

#### COME AFFILARE UNA GRACEY?

*Dopo aver lubrificato la pietra con l'apposito olio, si procede ponendo la punta della curette nella parte alta della pietra formando un angolo di circa 60°/70°. Dopodiché con dei brevi movimenti regolari dall'alto verso il basso inizia l'operazione di affilatura, ricordiamoci che la pressione della mano si esercita solamente nel movimento dall'alto verso il basso.*

”

## COMPOSITE INSTRUMENTS TIN COATED

### STRUMENTI PER COMPOSITO RICOPERTI TIN

New line of Composite Instruments  
TiN coated (Titanium Nitride): the special  
coating reduces composite or resin  
stickiness, thus facilitating placement  
modelling, sculpting and contouring steps.

Nuova linea di strumenti per composito  
rivestiti con TiN (Nitrato di Titanio):  
tale rivestimento riduce l'attaccamento  
del materiale composito allo strumento stesso,  
rendendone più facile la modellazione.

The **DENTAL DAM**, invented more than a century ago by Dr. Barnum, is used in dentistry to reduce contamination due to the need for the area to remain dry and isolated.

The main function of the rubber dam is to isolate the tooth being treated from its environment, in particular from the bacteria of the oral cavity: this permits a clean and dry operative field from saliva or blood.

Another function of the rubber dam is to protect the patient's airway from any materials which may fall into it during treatment. The dental dam improve the visibility of the tooth under treatment, reducing any risk for cheek and tongue.

For adhesive dentistry procedures involving bonding dental composite it is to be encouraged as the operative field must avoid moisture contamination in order to get the maximum bond strength from restorative material to tooth substance.

The dental dam is today considered a fundamental advantage for the dentist and for the patient to the point that a dental treatment is not considered fully correct if performed without the device.

MEDESYS dental dams contain little latex protein and are powder-free to minimize the risk of skin allergies to sensitive patients.

La **DIGA DENTALE**, inventata oltre cento anni fa dal Dr. Barnum, è utilizzata in odontoiatria per ridurre il rischio di contaminazione e mantenere l'area in cui si sta operando in condizioni asciutte ed isolate.

La funzione principale della diga dentale è quella di isolare il dente da trattare dal suo ambiente, in particolare dai batteri del cavo orale: ciò consente un campo operatorio pulito ed asciutto senza contaminazione da sangue o saliva.

Un'altra funzione della diga dentale è di proteggere le vie aeree del paziente da tutti i materiali che possono essere ingeriti durante il trattamento. La diga migliora la visibilità del dente da trattare, spostando guance e lingua riducendone il rischio di tagliarle.

Per gli interventi di odontoiatria che coinvolgono l'utilizzo del composito dentale è da incoraggiare l'utilizzo della diga per evitare che il campo operatorio sia contaminato dall'umidità ed al fine di ottenere la massima resistenza e performance dal materiale di restauro.

La diga dentale è oggi considerata un vantaggio fondamentale per il dentista e per il paziente al punto che un trattamento dentale non viene considerato pienamente corretto se eseguito senza questo dispositivo.

Le dighe in lattice MEDESYS sono specificamente trattate per ridurre il contenuto della proteina del lattice e quindi minimizzare il rischio di allergie cutanee. Inoltre non contengono alcuna traccia di polvere per impedire che i fogli di diga si attacchino gli uni agli altri, la quale provocherebbe reazioni allergiche a pazienti sensibili.

Dr. Giuliano Corrozzatto, after completing the college studies and training as a dental technician he earned a degree in dentistry at the university of Trieste with a doctoral thesis on digital radiology applied for use in the dentistry procedures. A healthcare professional with a long track record of successfully diagnosing and treating patients' dental conditions gathered in many years of cooperation with several clinics and dental teams. He now practises and manages his own dental centre providing a full range of dental treatment to patients to help them maintain oral health. He has been regularly cooperating on many projects with MEDESYS Research and Development Department mainly in the field of conservative dentistry spending a significant amount of time evaluating and testing specialist innovative equipment. To review Dr. Corrozzatto's videos on the use and the placement of the dental dam click on [www.medesy.it](http://www.medesy.it)

Dr. Giuliano Corrozzatto, dopo aver conseguito il diploma di odontotecnico, si laurea in odontoiatria all'università di Trieste con tesi di laurea in radiologia digitale applicata all'odontoiatria. Dopo molteplici collaborazioni e ottimi risultati conseguiti nell'ambito odontoiatrico, diventa titolare di un proprio studio dentistico. Da diversi anni collabora con MEDESYS, sviluppando assieme al dipartimento di ricerca e sviluppo nuovi strumenti nel settore della odontoiatria conservativa. Per visionare i video sul montaggio della diga dentale del Dr. Corrozzatto, connettersi su [www.medesy.it](http://www.medesy.it)

## UPPER JAW / ARCATA SUPERIORE

## LOWER JAW / ARCATA INFERIORE

New clamps for MEDESYS dental dam, superior quality in all details.

The superior quality of the stainless steel and a special temper treatment preserve the elasticity of the new MEDESYS clamps and ensure a longer endurance to stress.

The anchorage holes are compatible with any type of clamp forceps; the edges are bevelled to offer more comfort during utilisation.

Also the new rubber dam clamps, as all the other MEDESYS instruments, have a life time warranty against manufacture or material defects.

Nuovi uncini per diga MEDESYS, alta qualità in ogni dettaglio.

Grazie all'acciaio di prima scelta ed un trattamento termico speciale, i nuovi uncini per diga MEDESYS mantengono inalterata la loro elasticità per molto tempo.

I fori di ancoraggio sono universalmente compatibili con le varie forme di pinze per uncini, mentre i bordi sono smussati per un maggior comfort.

Come tutti gli strumenti MEDESYS, i nuovi uncini per diga sono garantiti contro ogni eventuale difetto di materiale o lavorazione per tutta la durata della loro vita.

## SPREADERS

**SPREADER:** recognizable from its pointed tip and its stem, which is bended in many different ranges. The spreader is mostly used for the following applications: *cold working* to laterally compact the guttaperca into the endodontic canal; *heat carrier* to carry the heat into the endodontic canal through a previously heated tip.

**SPREADER:** si riconosce per la punta aguzza e stelo piegato in varie gradazioni. Le metodologie di applicazione più comuni sono: *uso a freddo* la cui funzione è di compattare lateralmente il cono master di guttaperca contro la parete del canale endodontico ricavando lo spazio per introdurre i coni accessori; *porta calore* la cui funzione è appunto di portare calore nel canale endodontico per mezzo della punta precedentemente scaldata.

The micro probe, thanks to its long and pointed tip, can be deeply inserted into the endodontic canal. It gives a better visibility when working with the microscope. The main application is the identification of access into root canals and to establish the position and the blocking force of broken endodontic instruments (as well as of silver pins) in root canals.

Grazie al lungo stelo ed alla punta particolarmente aguzza, questo specillo può essere inserito in profondità all'interno del canale endodontico. Non ostacola la visuale se utilizzato con il microscopio. La funzione principale è di identificare l'accesso nei canali e di stabilire l'esatta posizione degli strumenti endodontici rotti (così anche coni di argento) all'interno dei canali.

RESTORATIVE / CONSERVATIVA

The thin and long tips bent at 60° against the handle enable the instrument to be introduced deeply into the root canal. The total length of the tips is 20 mm with a diameter of 0.8 mm.

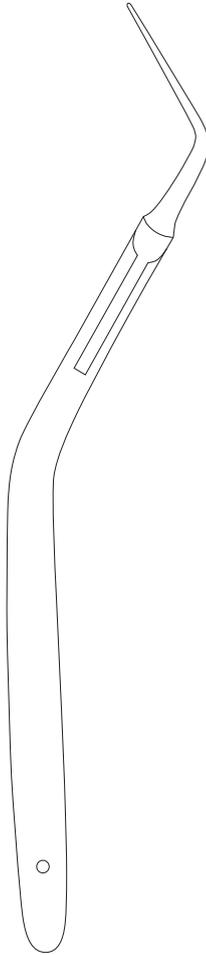

Le punte assottigliate e curvate a 60° rispetto l'asse dell'impugnatura, permettono alla pinza di essere introdotta in profondità nel canale. La lunghezza totale delle punte è di 20 mm con un diametro di 0.8 mm.

(1:1 scale / scala 1:1)

The forceps have been equipped with a special set of serrated edges positioned at an acute angle, which enables a firm seizing of a broken instrument, or a silver pin in the root canal. The total length of the serrated working part is 5 mm.

La speciale zigrinatura con angoli acuti assicura una presa perfetta del frammento o della punta, all'interno del canale. La lunghezza totale della parte zigrinata è di 5 mm.

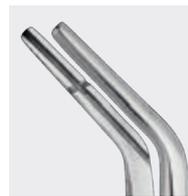

The internal pin prevents the side slipping of the tips. Il rivetto interno evita l'accavallarsi delle punte.

**1321/3** (mm 170)

A new tip for the osteotomes of the line Medoss: the terminal portion is now conical to facilitate the insertion in the sinus cavity and has minimal/maximal diameter scale, progressive depth markings from 8 to 18 mm, by 2 mm steps.

Nuova punta degli osteotomi linea Medoss: il terminale è ora conico per agevolare l'inserimento nella cavità, avente diametro minimo e massimo; le tacche di profondità hanno scala da 8 a 18 mm, con step di 2 mm.

### SINUS CONDENSING

Osteotomes conceived to compact the bone before the placement of an implant and aiming at reaching greater density, which is better for initial implant support. Thanks to the new conical shape with increasing diameters the bone condensation is obtained both laterally and apically. The terminal conical portion is slightly rounded to reduce the risk of perforation of the Schneiderian membrane.

Osteotomi progettati per compattare l'osso, prima dell'inserimento dell'impianto. La compattazione avviene sia in senso laterale che verticale, grazie alla nuova forma conica e progressiva della punta. Il terminale è arrotondato per ridurre il rischio di perforare la membrana di Schneider.

## SINUS ELEVATION

Osteotomes conceived to prepare the implant site. The specific tip shape with cutting edges enables as bone grafting on the implant cavity. Concave (Cupped-ended) osteotomes are used to collect and compress bone into the apical end of the osteotomy. A far less invasive technique compared to the Sinus lift obtained by performing a "later window" approach.

Osteotomi progettati per preparare il sito implantare. La forma della punta permette di innestare l'osso della cavità e di trasportarlo alla sommità, grazie ai bordi taglienti e al terminale concavo. Tecnica meno invasiva rispetto la "lateral window".

New MEDOSS osteotomes, equipped with a practical and easy blocking device extremely compact if compared to the traditional system thus ensuring a larger visual and operative field. The supplied screwdriver operates the locking and unlocking on the osteotome stopping device.

Nuovi osteotomi MEDOSS, progettati con un semplice e pratico sistema di bloccaggio: tale sistema è estremamente compatto se confrontato con il sistema tradizionale, aumentando il campo visivo ed operativo. Il cacciavite fornito in dotazione serve a bloccare e sbloccare il sistema di stop dell'osteotomo.

Spare part for 1325  
Ricambio per 1325

Bone scraper essential instrument for collecting autogenous bone used for bone-regeneration. Its unique shape and sharp blade empower the collection of the cortical bone in the device's chamber. The graft is harvested with coagulated blood for easy and safe immediate implantation.

Grattino per osso, indispensabile strumento per utilizzare osso autologo. Grazie alla sua struttura permette di rimuovere l'osso per mezzo della lama affilata e raccoglierlo nell'apposito contenitore. L'utilizzo di osso autologo sarà poi immediato.

### KIT PERIMPLANTITE

The bacterial aggression observed on the neck portion of the implants is similar to the bacterial aggression observable at the muco-gingival junction of the tooth. The stainless steel instruments may contaminate the titanium made implants while plastic instruments do not fully remove the failing tissues around the implant. Hence the need of using instruments made of titanium, the unique solution for a real efficient and fully safe handling on and close to the implants sites. Blue colour for a simple and fast identification of titanium tips, from standard gray of stainless steel. MEDESY Perimplantite kit includes 4 curettes "Short Type"; 1 curette Columbia; 2 Scalers; 1 periodontal probe.

L'aggressione batterica osservata nel collo degli impianti è simile a quella presente a livello della giunzione muco gengivale del dente. Gli strumenti in acciaio possono contaminare il titanio degli impianti, mentre quelli in plastica non sono in grado di rimuovere in modo efficiente la parte in oggetto. Da qui la necessità di usare strumenti in titanio, la soluzione sicuramente più adeguata per una gestione del problema efficiente ed in piena sicurezza in prossimità degli impianti. Il colore blu delle punte, serve per identificare in modo semplice e sicuro il titanio impiegato, rispetto al tradizionale acciaio.

Il kit Perimplantite di MEDESY è composto da: 4 curettes "Tipo Corto"; 1 curette Columbia; 2 scaler; 1 sonda parodontale.

# TREPHINE AND MUCOTOME

## TREPHINE E MUCOTOMI

(1:1 scale / scala 1:1)

ORTHODONTICS / ORTODONZIA

New rhombus design for MEDESYS's orthodontic pliers: a lighter and thinner shape for a better use.

Nuova forma romboidale per le pinze ortodontiche MEDESYS: sagoma alleggerita e assottigliata per un migliore utilizzo.

The sophisticated hand crafted BOX-JOINT system which characterizes our CENTURY LINE, ensures a higher stability of the instrument, safer use, longer duration and preserves the tips perfectly aligned.

Laborioso sistema di assemblaggio BOX-JOINT che caratterizza la nostra CENTURY LINE, garantisce affidabilità e lungo utilizzo della pinza, mantenendo le punte perfettamente allineate.

TC inserts on cutters and distal ends, electro-welded by utilizing the most advanced technologies. A wide range of cutters and distal ends offering different cutting functions.

Inserti in TC per tronchesi e distali, elettro-saldati con le più moderne tecnologie. Tronchesi e distali articolati in vari modelli aventi differenti capacità di taglio.

A special glass-microspheres surface treatment adds to the instrument an anti-glare and elegant finishing.

Finitura superficiale a microsferi di vetro, per ottenere un'ottima superficie pregiata ed anti-riflesso.

The golden handles, in line with the international standard codes, to identify that TC inserts have been welded on the cutting or working parts of the instrument.

I gambi dorati indicano secondo un codice internazionale l'inserimento di placche in TC nella parte lavorante o tagliente.

*Century line*

## SPECIFICATIONS ON THE CODES SPECIFICHE SUI CODICI

Code Codice	<b>3000/74 TC</b>
Type Modello	Flush slim
Thickness of wire Spessore del filo	ø max 0,41 × 0,55 mm / .016" × .021"
Length of the instrument Lunghezza dello strumento	(mm 125)

Yellow color for TC instruments  
Colore giallo per strumenti in TC

Grey color for standard instruments  
Colore grigio per strumenti tradizionali

# DISTAL END CUTTERS

## TRONCHESINI DISTALI CON RITENUTA

**3000/69 TC**  
(1:1 scale / scala 1:1)

### 3000/69 TC

ø max 0,55 × 0,64 mm / .021" × .025"  
(mm 125)

*This cutter cuts and holds the portion of wire in excess. Developed for stainless steel and NiTi wires.*

### 3000/69 TC LL

ø max 0,55 × 0,64 mm / .021" × .025"  
(mm 150)

*Same as 3000/69 TC but with long handle.*

### 3000/74 TC

Flush slim  
ø max 0,41 × 0,55 mm / .016" × .021"  
(mm 125)

*This cutter cuts and holds wire distally flush to the buccal tube.*

### 3000/76 TC

Flush  
ø max 0,55 × 0,64 mm / .021" × .025"  
(mm 125)

*Same as 3000/74 TC but with regular head.*

## PIN AND LIGATURE CUTTERS

**3000/89 TC**  
(1:1 scale / scala 1:1)

TC

**3000/89 TC**

∅ max 0,3 mm / .012"  
(mm 120)

*Delicate cutter, specially designed for the removal of soft stainless steel ligatures.*

TC

**3000/91 TC**

∅ max 0,3 mm / .012"  
(mm 125)

*Delicate cutter with a fine tip for easier access to difficult areas. Cut elastics, ligatures, pins and wire.*

TC

**3000/99 TC**

∅ max 0,4 mm / .016"  
(mm 130)

*Medium cutter ensuring accurate and precision cutting of elastics, ligatures, pins and wire.*

TC

**3000/85 TC**

∅ max 0,3 mm / .012"  
(mm 130)

*Standard cutter with slim profile, allowing an easy access and better view of the oral cavity.*

15°

TC

**3000/85 TC 15°**

∅ max 0,3 mm / .012"  
(mm 130)

Angled 15°

*Same as 85TC, but with a 15° offset tip enhancing a better access in difficult areas*

“  
**MEDESYS IN SPOT**  
*The orthodontic pliers are laser engraved with the maximum cut capacity (for cutters only) or applicable wire, in millimeters and inches.*

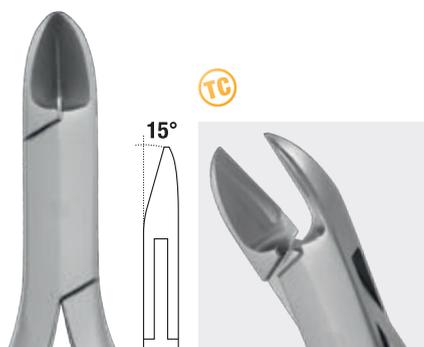

*Le pinze ortodontiche riportano la capacità massima di taglio (per i tronchesini) o il diametro massimo consentito, in millimetri e inches.*  
”

## HARD WIRE CUTTERS

### 3000/87 TC

(1:1 scale / scala 1:1)

### 3000/94 TC

ø max 0,4 mm / .016"  
(mm 130)

Angled 15°

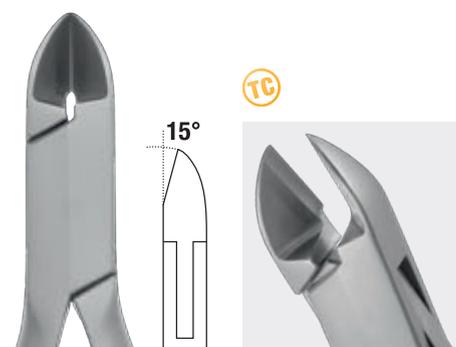

Medium cutter with rounded and slim tip. 15° offset tips help in posterior area.

### 3000/87 TC

ø max 0,7 mm / .028"  
(mm 130)

Suitable for cutting archwires or pins of any size. TC inserts ensuring longer duration.

### 3000/87 TC 15°

ø max 0,7 mm / .028"  
(mm 130)

Angled 15°

Same as 87TC, but with a 15° offset tip enhancing a better access in difficult areas

### 3000/92 TC

ø max 1,0 mm / .040"  
(mm 140)

For front cutting of heavy wires.

### 3000/18 TC

ø max 1,0 mm / .040"  
(mm 155)

For an easy cutting of any size of archwire or pin. 15° offset tips for an easier access to the posterior area.

### 9952/160 TC

ø max 1,5 mm / .060"  
(mm 170)

Double action system for heavy wires, reduce effort on cutting.

**3000/31**

(1:1 scale / scala 1:1)

**3000/31**

Weingart  
ø max 0,7 mm / .028"  
(mm 145)

*Versatile utility plier with very fine serration.*

**3000/32**

Weingart – Slim  
ø max 0,5 mm / .020"  
(mm 145)

*Weingart with fine points.*

TC

**3000/25 TC**

Weingart angled  
ø max 0,5 mm / .020"  
(mm 140)

*Weingart with TC tips, indicated also for placement and removal of archwires, because of the tapered angular design.*

**3000/84**

How plier – Straight  
ø max 0,7 mm / .028"  
(mm 140)

*Utility plier with round and serrated tips. Ideal for removal and placement of the archwires. Grasping all types of auxiliaries attachments.*

**3000/72**

How plier – Angled  
ø max 0,7 mm / .028"  
(mm 140)

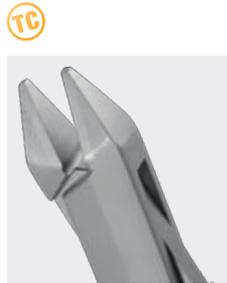

*45° angled tips for convenient access to lingual and others difficult posteriors areas.*

# WIRE BENDING PLIERS

## PINZE PIEGA FILI

**3000/39 TC**  
(1:1 scale / scala 1:1)

**3000/23**  
Adams  
ø max 0,7 mm / .028"  
(mm 125)

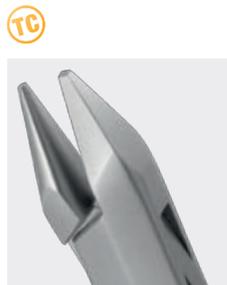

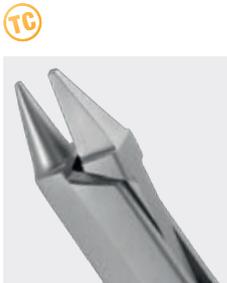

*Squared beaks, clasp and wire bending plier.*

**3000/23 TC**  
Adams  
ø max 0,7 mm / .028"  
(mm 125)

*Squared beaks, clasp and wire bending plier, TC inserts.*

**3000/47 TC**  
N.64  
ø max 1,0 mm / .040"  
(mm 140)

*Squared beaks, heavy type, TC inserts.*

**3000/39 TC**  
Angle N.139  
ø max 0,7 mm / .028"  
(mm 125)

*Bird beak plier, cone and pyramidal tips in TC. Indicated for loops and general bending of round wires.*

**3000/86 TC**  
Angle N.138  
ø max 1,0 mm / .040"  
(mm 130)

*Long bird beaks for heavy wire. TC inserts.*

**3000/21**  
ø max 0,7 mm / .028"  
(mm 130)

*4 grooved bird beaks used to form precise loops in round, squared or rectangular light wire.*

#### 3000/40C TC

Tweed  
 ø max 0,4 mm / .016"  
 (mm 130)

With cutter

*Ideal with round and square wire, for making consistent uniform loops. Section tips 1,2-1,8-2,0 mm.*

TC

#### 3000/38C TC

ø max 0,6 mm / .024"  
 (mm 135)

With cutter

*Light wire cutting and contouring plier. For round wire, to bend small ø loops. Contouring of loops and arches up to 0,55 x 0,64 mm.*

”

#### 3000/57

Aderer – Short  
 ø max 0,6 mm / .024"  
 (mm 120)

*3 jaw plier – Short. Slightly rounded tips, for contouring and bending without damaging the archwire.*

#### 3000/54

Aderer – Long  
 ø max 0,7 mm / .028"  
 (mm 130)

*3 jaw plier – Long. Slightly rounded tips, for contouring and bending without damaging the archwire.*

#### 3000/20

Jarabak  
 ø max 0,7 mm / .028"  
 (mm 140)

*Light wire bending plier. Versatile in different uses, as bending or closing loops. One beak partially serrated for safe grip.*

**3000/51**  
(1:1 scale / scala 1:1)

**3000/51**

Tweed – Short  
ø max 0,5 mm / .020"  
(mm 125)

*Arch forming plier – Short.  
Ideal for torquing and bending  
squared or rectangular wire.  
Parallel blades prevents  
crushing of wires.*

**3000/52**

Tweed – Long  
ø max 0,7 mm / .028"  
(mm 130)

*Arch forming plier – Long.  
As 3000/51 but for bigger wires size.*

**3000/30**

Schwarz  
ø max 0,7 mm / .028"  
(mm 130)

*Arrow clasp bending plier.*

**3000/34**

De La Rosa  
ø max 0,5 mm / .020"  
(mm 125)

*Contours and forms archwires,  
of light wire without torquing.*

**3000/35**

De La Rosa  
ø max 0,5 mm / .020"  
(mm 125)

*Same as 3000/34 with additional  
grooves measuring respectively  
0,41-0,46-0,56 mm.*

**3000/58**

ø max 0,7 mm / .028"  
(mm 125)

*Lingual arch forming plier for  
fast forming all lingual retainers.*

**3000/98**

(1:1 scale / scala 1:1)

**3000/98**

Tweed – Short  
 ø max 0,5 mm / .020"  
 (mm 135)

*Designed to form precise omega loops. Long grooved beak internally smoothed. Short type.*

**3000/95**

Tweed – Short  
 ø max 0,5 mm / .020"  
 (mm 135)

*Designed to form precise omega loops. Short grooved beak internally serrated. Short type.*

**3000/55**

Young – Short  
 ø max 0,7 mm / .028"  
 (mm 130)

*Ideal for labial arches and face bow. Universal plier for different size loops.*

**3000/96**

Tweed – Long  
 ø max 0,5 mm / .020"  
 (mm 145)

*Designed to form precise omega loops. Long grooved beak internally smoothed. Long type.*

**3000/97**

Tweed – O'Brein  
 ø max 0,7 mm / .028"  
 (mm 140)

*Graduated cone to form precise omega and closing loops. Micro serrated beaks to prevent wire slippage.*

**3000/81**  
(1:1 scale / scala 1:1)

**3000/53**

Optical  
⌀ max 0,7 mm / .028"  
(mm 140)

*Concave/convex loop forming plier, small-medium.*

**3000/79**

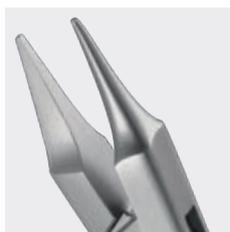

Optical  
⌀ max 0,7 mm / .028"  
(mm 135)

*Concave/convex loop forming plier, medium-large.*

**3000/70**

Hollow chop  
⌀ max 0,7 mm / .028"  
(mm 140)

*Contours and form arches of all sizes.*

**3000/81**

*Long and delicate beaks plier.*

⌀ max 0,5 mm / .020"  
(mm 135)

**3000/28**

*2 round beaks long.*

⌀ max 0,5 mm / .020"  
(mm 140)

**MEDESY IN SPOT**

*The new lubricant oil for orthodontic instruments. If used regularly it ensures a long product lifespan and optimal performances: facilitates the smooth and perfect function for all hinged instruments and helps to prevent freezing from corrosion and sediments.*

*Nuovo olio lubrificante per pinze ortodontiche. Se usato regolarmente prolunga la durata e l'efficienza dello strumento: l'olio favorisce il movimento scorrevole e delicato degli strumenti a snodo, proteggendo al tempo stesso da corrosione e sedimenti.*

**4160**

(1:1 scale / scala 1:1)

**3000/80**

Nance  
 ø max 0,7 mm / .028"  
 (mm 125)

*Loop bending plier.  
 Four step tips (3, 4, 5, 6 mm)  
 for loops forming.  
 Round and rectangular wire.*

**3000/63**

Cinch back  
 ø max 0,55 x 0,64 mm  
 ø max .021" x .025"  
 (mm 155)

*Cinch back utility plier.  
 For closing arches or cinch down a wire.  
 Use on round or rectangular wire.*

**3000/43**

ø max 0,5 mm / .020"  
 (mm 140)

*Closing loop plier.  
 Different loops in only one plier.*

**3000/60**

ø max 1,4 mm / .055"  
 (mm 130)

*3 prong plier. For hard wires.  
 Round tips prevents any  
 damage of archwire.*

**3000/56**

Nance  
 ø max 0,7 mm / .028"  
 (mm 135)

*Loop closing plier.  
 For bending of stop loops and  
 ideal for Adams clasps.*

**3000/61**  
(1:1 scale / scala 1:1)

**3000/59**

Johnson  
ø max 0,7 mm / .028"  
(mm 135)

*Crown and band contouring plier.*

**3000/61**

Reynolds  
ø max 0,7 mm / .028"  
(mm 130)

*Crown and band contouring plier.*

**3000/29**

Schwarz  
ø max 0,7 mm / .028"  
(mm 125)

*Arrow clasp bending plier.*

**3000/15**

Step plier  
ø max 0,55 × 0,64 mm  
ø max .021" × .025"  
(mm 140)

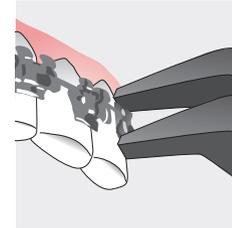

*Double side head to create steps in archwire.*

**3000/171**

V-Stop  
ø max 0,55 × 0,64 mm  
ø max .021" × .025"  
(mm 130)

*For bending archwire in V-form, in order to avoid any movement.*

**Pliers to remove the brackets: the extremely sharp tips allow an easy access under the flange of the bracket and facilitate its detachment.**

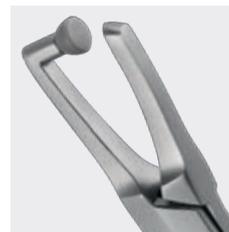

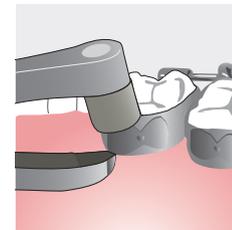

Pinze per rimozione attacchi: le punte affilate permettono di entrare sotto la flangia dell'attacco e ne consentono il distacco con estrema facilità.

**3000/83**

Bracket remover – Straight  
(mm 135)

**3000/82**

Bracket remover – Angled  
(mm 130)

**Pliers to remove the bands available in two sizes, short and long. The rubber insert fully autoclavable sticks perfectly to the crown and allows an optimal position of the tip during the removal of the band.**

Pinze per la rimozione di bande disponibili in 2 misure, lunga e corta. Il gommino sterilizzabile, rimane perfettamente in contatto con la corona, permettendo una ottimale posizione della punta, per la rimozione della banda.

**3000/49**

Posterior band remover – Short

MEDESYS offers a very practical solution for handling your pliers during cleaning and sterilization sections. Our GAMMAFIX trays help on organizing your pliers in practical set ups and handle them safely. Just some of the specific benefits of our GAMMAFIX trays: inserts made of special non-toxic silicon and open corners to facilitate the outflow of residuals and water and therefore reduce the drying time. More info on [www.medesy.it](http://www.medesy.it)

MEDESYS presenta un'ottimale soluzione per maneggiare le pinze ortodontiche durante il processo di pulizia e sterilizzazione. I vassoi della serie GAMMAFIX risultano estremamente pratici e versatili per contenere le pinze ortodontiche in tutta sicurezza. I vassoi GAMMAFIX si distinguono per la loro praticità d'uso ed importanti accorgimenti, tra i quali il silicone atossico e angoli aperti atti a defluire acqua e residui. Maggiori informazioni su [www.medesy.it](http://www.medesy.it)

# ARTICULATORS

## ARTICOLATORI

Medesy new anatomic articulator, solidly manufactured in cast aluminium, about 400 gr in weight. Projected and realized to ensure the largest visual field on the lingual surfaces as well as maintaining complete stability of the upper frame also at full open position: coiled springs facilitate the return to starting aligned position.

Technical details:

- Opening 125°
- Fixed condylar inclination of 30°
- Intercondylar distance of 110 mm
- Incisal base inclination of 10°
- Bennet angle of 7°
- Distance between the mounting plates 85 mm
- Spare parts available upon request

Questo è il nuovo articolatore anatomico di Medesy, prodotto in alluminio pressofuso dal peso di 400 gr circa. È stato progettato e realizzato in modo da lasciar ampia visibilità alle superfici linguali, preservando la stabilità in posizione aperta: il ritorno in asse è agevolato grazie a delle molle di richiamo.

Dettagli tecnici:

- Apertura 125°
- Inclinazione condilare fissata a 30°
- Distanza intercondilare di 110 mm
- Inclinazione base incisale 10°
- Angolo di Bennet fissato a 7°
- Distanza tra le piastre di montaggio 85 mm
- Parti di ricambio su richiesta

# STAINLESS STEEL REGULAR IMPRESSION TRAYS WITH RETENTION RIM – SATIN FINISH

PORTAIMPRONTE FORATE REGOLARI INOX CON IL BORDINO RITENTIVO, SATINATE

6000/KIT-SB

New micro sandblasted surface on the stainless steel impression trays of range 6000: the special treatment ensures a higher adhesion of the impression materials and thus a finest quality of the final imprint.

Nuova superficie microsabbata per le portaimpronte in acciaio inox della serie 6000: tale trattamento assicura una migliore adesione del materiale da impronta e conseguentemente la qualità del lavoro finale.

# GAMMAFIX<sup>®</sup>

by MEDESYS<sup>®</sup>

The revolutionary GAMMAFIX trays are characterized by excellent quality and functionality features, specifically conceived to facilitate the cleaning and sterilization process. Their special shape ensures a fully safe handling of the surgical instruments during the washing and sterilization phase, considerably reducing the risk of accidental injuries for the user. Thanks to the GAMMAFIX trays you can reduce the preparation time as you can organize them in handy and practical set-ups including the different items for each specific dental treatment. The range consists of 5 modular models, studied to offer the best versatility and efficiency. The type of silicone we selected for our trays meets the approval of the strictest Food & Drug standards (FDA).

I rivoluzionari vassoi della linea GAMMAFIX si caratterizzano per l'alta qualità e funzionalità, specificatamente studiati per facilitare il processo di pulizia e sterilizzazione. La loro speciale forma permette di maneggiare lo strumentario chirurgico in massima sicurezza, anche durante le procedure di disinfezione e sterilizzazione, riducendo considerevolmente il rischio di ferite accidentali per l'utilizzatore. Grazie ai vassoi GAMMAFIX si riesce a limitare il tempo di preparazione, in quanto gli strumenti necessari per ogni attività odontoiatrica potranno essere riposti in pratici sets pronti all'uso. La gamma si articola in 5 modelli modulari, studiati al fine di offrire la massima versatilità. Il tipo di silicone prescelto è conforme ai severi requisiti Food & Drug (FDA).

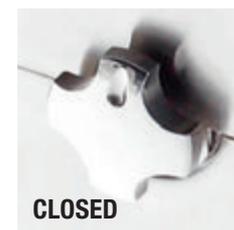

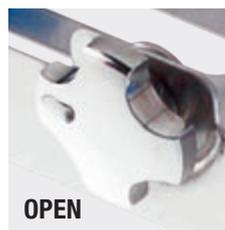

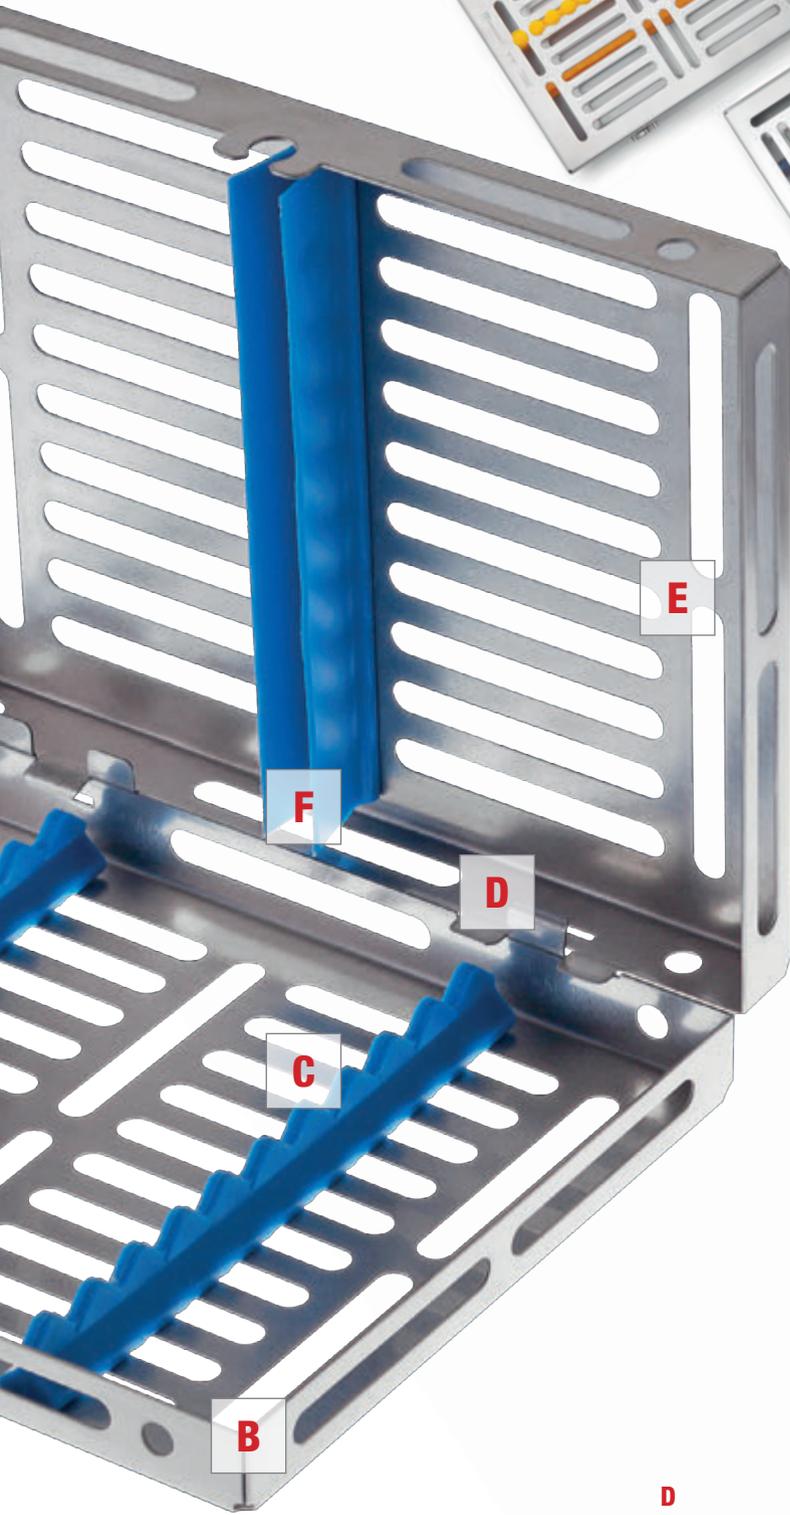

**A**  
The exclusive locking system, keeps the tray perfectly closed. The mark on the locking knob shows the open / close position.

L'esclusivo ed efficace sistema di chiusura. La fresa indica la posizione di apertura / chiusura.

**B**  
Open corners facilitate the outflow of residuals and water, reduce the drying time.

Angoli aperti agevolano l'uscita di acqua e residui, riducendo i tempi di asciugatura.

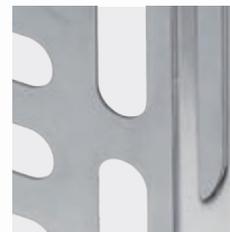

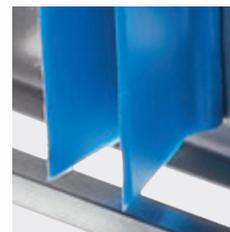

**C**  
The type of silicone we use for our trays meets the approval of the strictest Food & Drug standards (FDA).  
Il silicone utilizzato rispetta la severa normativa Food & Drug (FDA).

**D**  
A safe and easy joint system.  
Sicuro e semplice meccanismo di chiusura.

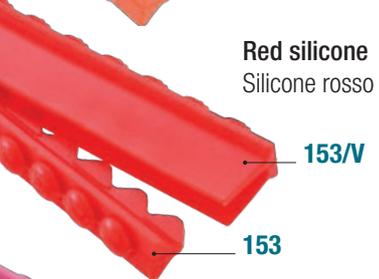

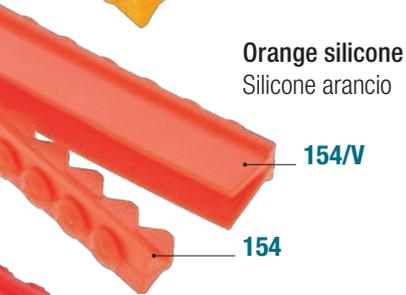

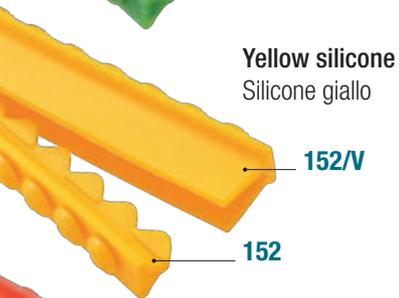

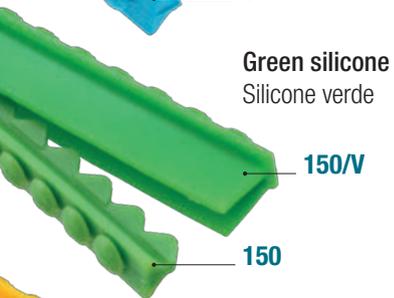

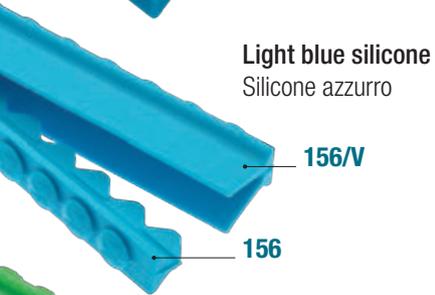

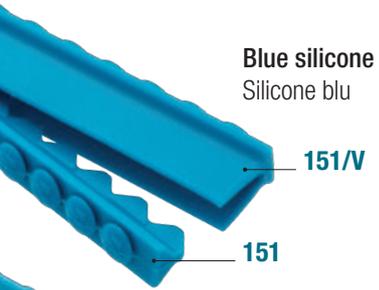

**E**  
The enlarged holes offer more open space for a perfect washing process and a safe sterilization.  
I fori di dimensione maggiore assicurano una maggiore capacità di lavaggio ed una efficace sterilizzazione.

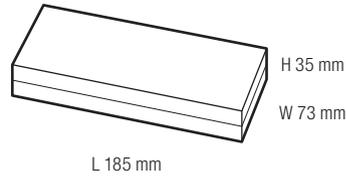

**F**  
Improved top flexible V-Shape for the silicone profile, specifically conceived for storing instruments having different sizes.  
Barretta in silicone forma V migliorata, concepita per trattenere strumenti di sezioni diverse.

**Medesy new containers: both tray and lid are perforated to facilitate all type of sterilization; all made in aluminium, which offer special versatility a low weight, characteristic. The containers are supplied with a filter and may be used to hold sterile instruments as well as contaminated tools prior to sterilization.**

I nuovi container Medesy sono perforati sia sul coperchio sia sulla base per agevolare tutti i tipi di sterilizzazione; abbiamo scelto di produrli in alluminio in quanto miglior compromesso in termini di peso e versatilità. I container sono utili sia per contenere strumenti sterili sia per riporre strumenti contaminati. I container vengono forniti già con un filtro.

Our polysulfone trays are made of the best engineered polymers which grant excellent thermal and mechanical resistance. The trays have no sharp edges, facilitating cleaning and sanitizing procedures as well as ensuring safe transportation and handling of the surgical products. The trays are autoclavable up to 134°C / 273°F.

I nostri vassoi in polysulfone sono prodotti con i migliori polimeri, i quali garantiscono una eccellente resistenza termica e torsione meccanica. I vassoi hanno gli angoli smussi, i quali facilitano le procedure di pulizia in tutta sicurezza, anche durante il trasporto dello strumentario chirurgico. I vassoi sono autoclavabili fino a 134°C / 273°F.

## LUBRICANT OIL WITH SPECIAL THIN DISPENSER NOZZLE

Lubricant oil: when used regularly it protects reliably from wear and prolongs the efficiency of the instrument.

The lubricant oil ensures that all hinged and jointed instruments keep operating smoothly and delicately and also protects them from corrosion and residues.

It is advisable to use the oil prior to sterilization procedures. Physically inert.

## OLIO LUBRIFICANTE CON SPECIALE EROGATORE SOTTILE

Olio lubrificante: se usato regolarmente prolunga la durata e l'efficienza dello strumento.

L'olio lubrificante di Medesy favorisce il movimento scorrevole e delicato degli strumenti a snodo, proteggendo al tempo stesso da corrosione e sedimenti.

Si raccomanda di utilizzarlo antecedentemente la fase di sterilizzazione; è fisicamente inerte.

New display case divided into 4 different sections (trays) which can be used to arrange instruments of various type. Each section (tray) has Velcro strips on the rear side and therefore the sections are interchangeable and you can combine the case according to each specific need. With this new system, you can remove from the case just and exactly the single tray you need.

Nuova valigetta, dispone di 4 singole sezioni (vassoi) che possono essere composte con strumenti assortiti. Ogni singola sezione (vassoio) ha delle strisce di velcro nella parte posteriore, rendendole intercambiabili e combinabili secondo preferenza.

Con questo nuovo sistema si possono comporre le valigette sulla base delle singole esigenze.

Power ultrasonic / Potenza ultrasuoni: 200/400 W – 38 KHz

#### 7120

Specifications / Specifiche

Capacity / Capacità: 12 litre

Internal dimensions / Dimensioni interne: 300 × 230 × 200 (h) mm

Power ultrasonic / Potenza ultrasuoni: 250/500 W – 38 KHz

### ATTENTION!

- Check volts and plugs
  - Check standards required (CE-UL)
- before order!**

Our new ultrasonic baths are available in two tank sizes: 6 and 12 litres. Extremely compact and easily operated, these ultrasonic baths provide a high standard cleansing of surgical and dental instrumentation. Made of stainless steel this product stands out for its solidity and use safety. Equipped with microprocessor control for precision cleansing time and temperature controlled operation, the digital control panel displays accurately also power and frequency of the ultrasounds. Ultrasonic cleaning involves the use of high-frequency sound waves and is considered the most efficient system nowadays as it guarantees the full and accurate removal of all dirt residuals even inside the joints of the surgical instruments (such as needle-holders, pliers and scissors) and it reduces the risk of cutting injuries which may occur during manual cleansing. The optimal performance and longer duration of an instrument depends also on the adopted cleaning procedures.

Nuove vasche per lavaggio ad ultrasuoni, disponibili in 2 varianti: 6 o 12 litri. Estremamente compatte e facili da utilizzare, garantiscono il perfetto lavaggio dello strumentario chirurgico ed odontoiatrico. Sono prodotte in acciaio inossidabile e si contraddistinguono per solidità e sicurezza d'uso. Fornite di regolazione digitale della temperatura e dei tempi di lavaggio, sono dotate anche di display digitale dove si evidenzia la potenza e la frequenza degli ultrasuoni. Il lavaggio ad ultrasuoni è il sistema più efficace: garantisce infatti la pulizia anche all'interno degli snodi degli strumenti (come porta aghi, pinze e forbici) e riduce il rischio di tagli causati da una pulizia manuale. Un perfetto lavaggio contribuisce alla buona funzionalità e durata nel tempo degli strumenti.

## PROTECT YOUR CAPITAL PROTEGGI IL TUO PATRIMONIO

### PRESERVE AND ADD VALUE TO YOUR INVESTMENT ON MEDESYS

All MEDESYS instruments are manufactured only with high quality stainless steel and accurately checked during each manufacturing phase. Observance of the recommended cleaning, sterilization and lubrication practices will help to ensure the best product performance. Misuse, abuse, improper use or unsuitable care and poor maintenance will VOID WARRANTY claims.

### PROTEGGI E VALORIZZA IL TUO INVESTIMENTO MEDESYS

Tutti gli strumenti MEDESYS sono realizzati solo con il migliore acciaio e accuratamente controllati durante tutte le fasi di produzione. È importante attenersi alle raccomandazioni per la sterilizzazione, pulizia e lubrificazione aiuterà a mantenere gli strumenti in perfetta efficienza! Tutti gli strumenti MEDESYS sono garantiti contro ogni difetto di materiale e/o produzione per l'intera vita utile dello strumento. La garanzia **NON È GARANTITA** in caso di: abuso, uso improprio degli strumenti e/o manutenzione inaccurata e sterilizzazione errata.

WATCH THE VIDEO ON  
YouTube MEDESYS CHANNEL!

## SUGGESTED DISINFECTION AND STERILIZATION PROCEDURES PROCEDURE DI DISINFEZIONE E STERILIZZAZIONE

Instruments must be separated according to the materials they are made of. Joined or hinged instruments must be opened before placing in the container. Gli strumenti vanno suddivisi per materiale. Eventuali strumenti con cerniere o snodi devono essere posti nel contenitore in posizione aperta.

### 1 COLLECTING THE INSTRUMENTS RACCOLTA DEGLI STRUMENTI

**ATTENTION!**

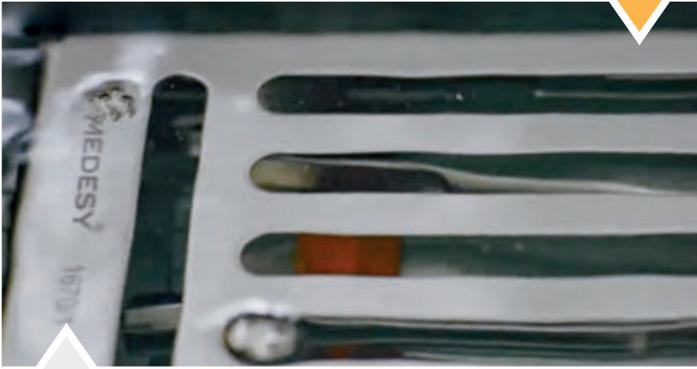

*Instruments made of different materials (ex: stainless steel – titanium or aluminium) must be kept separated since each material reacts differently to chemical solutions. We advise to choose the correct cleansing product in relation to the instrument material.*

*Non maneggiare contemporaneamente strumentario di materiali diversi (es. acciaio Inox – alluminio – titanio): la loro reazione alle soluzioni chimiche utilizzate è diversa. Utilizzare prodotti specifici in base al materiale dello strumento.*

**Dilution; time of action.**  
*Diluizione; tempo di immersione.*

**Disinfection bath or ultrasound bath. Make sure you are choosing the appropriate disinfectant depending on the instrument material and carefully follow the dilution percentages indicated on the solution labels. Do not disinfect Aluminium or Titanium instruments in ultrasonic baths.**

In vasche di disinfezione o vasche ad ultrasuoni. Attenersi alle istruzioni indicate sul prodotto scelto rispettando le percentuali di diluizione e i tempi di immersione a seconda del materiale di cui è composto lo strumento. Non mettere gli strumenti in alluminio o in titanio nella vasca ad ultrasuoni.

## 2 DISINFECTION

### DISINFEZIONE

**The disinfected material must be rinsed thoroughly before washing.**  
 Il materiale disinfettato deve essere sciacquato abbondantemente prima di procedere alla fase di lavaggio.

## 3 RISING

### RISCIACQUO

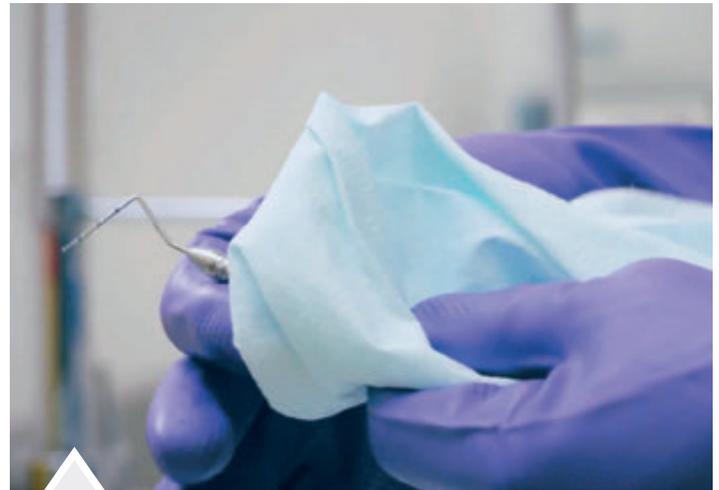

**The aim of washing is to remove organic and inorganic residues and micro-organisms. This can be done either manually or automatically in instrument washers or thermal disinfectors.**

Il lavaggio rimuove residui organici, inorganici e microrganismi. Può avvenire in maniera manuale o automatica in lavastumenti o termodisinfettori.

## 4 WASHING

### LAVAGGIO

**Moisture could compromise the outcome of sterilization and lead to the formation of marks on the surface of the instrument. Dry the instrument manually, preferably with a disposable cloth which does not leave fibers, or with compressed air.**

L'umidità può compromettere l'esito della sterilizzazione e causare la formazione di macchie. Asciugare gli strumenti manualmente preferibilmente con panni monouso che non rilasciano fibre o con aria compressa.

## 5 DRYING

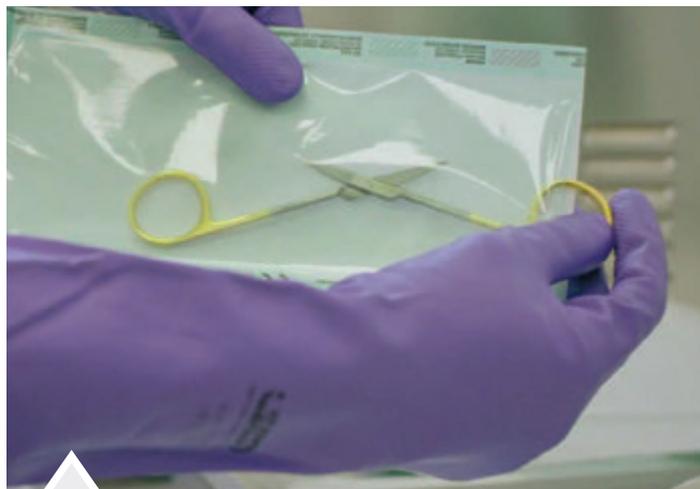

### ASCIUGATURA

Apply specific lubricants. If the material is steam-sterilised, the products must be silicone free.

Applicare prodotti specifici lubrificanti a freddo.

## 6 MAINTENANCE MANUTENZIONE

Sort the instruments into pouches. For each pouch, indicate the sterilisation and expiry date and the operator performing and verifying the process. All pouches must also have a chemical process indicator and sterilisation integrator.

Seguire il confezionamento degli strumenti indicando: data di sterilizzazione e di scadenza e l'operatore che ha eseguito e verificato il processo.

## 7 PACKING CONFEZIONAMENTO

**Time; temperature; bar pressure.**  
*Tempo; temperatura; pressione bar.*

We suggest using a class B fractioned vacuum wet heat autoclave. We recommend sterilizing instruments at 134°C a 2.1 bars, or 121°C at 1.1 bars.

Si consiglia l'utilizzo di un autoclave a calore umido a vuoto frazionato di classe B, sterilizzando gli strumenti a 134°C a 2.1. bar, oppure 121°C a 1.1 bar.

## 8 STERILISING STERILIZZAZIONE

At the end of the process the pouches with sterile instruments must be kept in a dry dust-free, light and heat protected storage areas.

Le buste contenenti gli strumenti sterili vanno infine conservate al riparo da luci e fonti di calore, in ambienti asciutti e privi di polveri.

Vassoi universali	H10
Vestibulum divaricatori	A99
Vetro per impasti	D27
Volkman cucchiaini alveolari	A60

<b>W</b>	
Wahl lime per osso	A56
Wakefield scalpelli	E10
Ward per amalgama	D21
Warwick-James leve	A37
Washington pinze uncini	D36
Wassmund divaricatori	A102
Wedelstaedt	D22
Weingart pinze	F6
Westcott strumento composito	D7, D20
White leve	A29
White otturatori	D20
White pinze uncini	D36
Wieder divaricatori	A99
Wiland per amalgama	D22
Williams sonda	B10
Williger cucchiaini alveolari	A60
Williger scalers	C14
Williger scollaperiosteai	A48
Winter leve	A33
Witzel pinze	A16
Wood pinza per estrazione	A12
Woodson spatole	D5
Wynman per corone	D38

<b>Y</b>	
Young pinze	F10
Young tiralingua	A96
Younger-Good currettes	C9

<b>Z</b>	
Zahle per cera	G5
Zed forbici	A73
Zerfing scalpelli	C21
Zuricher calibri	G20
