Our story / La nostra storia

Story of a family and a passion forged in the steel of Maniago, for 600 years a reference point internationally recognized for the production of blades. We combine this centuries-old craft tradition with the constant development of innovative solutions in terms of design, ergonomics and functionality. Competence, care and dedication are the values that have guided our commitment for three generations and guide our relationship with our customers.

Storia di una famiglia e di una passione forgiata nell'acciaio di Maniago, da 600 anni punto di riferimento riconosciuto a livello internazionale per la produzione di lame. Combiniamo questa secolare tradizione artigianale con lo sviluppo costante di soluzioni innovative in termini di design, ergonomia e funzionalità. Competenza, cura e dedizione sono i valori che da tre generazioni guidano il nostro impegno e orientano il rapporto con i nostri clienti.

Our values /
I nostri valori

We create excellent solutions to meet the needs of the most up-to-date dental techniques, enhancing the work of professionals and the health of their patients.

Creiamo soluzioni d’eccellenza per rispondere alle esigenze delle più aggiornate tecniche odontoiatriche, valorizzando il lavoro dei professionisti e la salute dei loro pazienti.

HIGH QUALITY
Selected raw materials, know-how and workmanship of excellence: each MEDESY tool is born from the will and ability to give the best.

ALTA QUALITÀ
Materie prime selezionate, know-how e lavorazioni d’eccellenza: ogni strumento MEDESY nasce dalla volontà e dalla capacità di dare il meglio.

INNOVATION
Constant research and development to create increasingly advanced and complete solutions, able to best meet every specific need.

INNOVAZIONE
Ricerca e sviluppo costanti per realizzare soluzioni sempre più avanzate e complete, in grado di rispondere al meglio ad ogni esigenza specifica.

MADE IN ITALY
Design, creativity, and tailoring care: in MEDESY beats a generous Italian heart appreciated all over the world.

30

Participation in international fairs, scientific congresses and conferences. Independently and in support of the activities carried out by the precious partners.

Partecipazioni tra fiere internazionali, congressi scientifici e conferenze. Sia in autonomia sia in supporto all'attività svolta dai preziosi partner.

L’arte dei fabbri di Maniago / Smiths’art in Maniago

003

600 years of tradition / 600 anni di tradizione

MEDESY fully embodies the tradition of Maniago blacksmith art: six centuries of excellence in the processing of cutting tools and in the creation of the highest quality blades, a superior knowledge which has led to the birth of a highly specialized district.
A tradition of artisanal techniques, skills, and processes that today MEDESY applies to the production of increasingly efficient and innovative tools, highly appreciated all over the world for their cutting quality, precision and reliability over time.

In MEDESY vive la tradizione dell’arte fabbrile di Maniago: sei secoli di expertise nella lavorazione di strumenti da taglio e nella creazione di lame di altissima qualità che hanno portato alla nascita di un distretto altamente specializzato.
Una tradizione di tecniche artigianali, competenze e lavorazioni che oggi MEDESY applica alla produzione di strumenti sempre più efficienti e innovativi, apprezzati in tutto il mondo per la qualità di taglio, la precisione e l’affidabilità nel tempo.

600 year / 600 anni

From the Renaissance to nowadays, Maniago has been the country of steel processing. A centuries-old tradition - from the production of weapons for the Republic of Venice to those of the scene for Hollywood films - which has seen Maniago establish itself as an international center of excellent cutlery.
In recent decades, the historical skills of Maniago blacksmiths have adapted to the needs of an increasingly demanding market. Diversification and specialization were the essential keys for a successful approach to the new challenges.

Dal Rinascimento a oggi Maniago è il paese della lavorazione dell'acciaio. Una tradizione secolare - dalla produzione di armi per la Repubblica di Venezia a quelle di scena per i film di Hollywood - che ha visto Maniago imporsi come centro internazionale della coltelleria d'eccellenza.
Negli ultimi decenni le storiche abilità dei fabbri maniaghesi si sono adattate ai bisogni di un mercato sempre più esigente. Diversificazione e specializzazione sono state la chiave per poter affrontare con successo le nuove sfide.

1970 AD

600 year / 600 anni

1380

First official document that testifies to iron working in Maniago.

Primo documento ufficiale che testimonia la lavorazione del ferro a Maniago.

1450

The first “battiferro” begins to work in Maniago with the authorization of the Serenissima Republic of Venice granted to Count Nicolò di Maniago.

Il primo battiferro inizia a lavorare a Maniago su autorizzazione della Serenissima Repubblica di Venezia al Conte Nicolò di Maniago.

1700

The creation of weapons and blades is soon integrated and superseded by new productions of increasingly precise and functional tools, fundamental in new areas such as modern surgery.

Alla creazione di armi e lame si aggiunge quella di strumenti sempre più precisi e funzionali, fondamentali in nuovi ambiti come la moderna chirurgia.

1935

THE BEGINNINGS OF MEDESY ARE TO BE FOUND IN THE FIRST DRAWINGS OF PLIERS AND NEEDLE HOLDERS MADE BY A VERY YOUNG GUGLIELMO GHEZZI.

Gli albori di Medesy iniziano ad intravedersi nei disegni di pinze e porta aghi realizzati da un giovanissimo Guglielmo Ghezzi.

1970

Production grows in Maniago thanks to the inclusion of specialized modern machines. The production reality is made up of 200 artisan companies, 15 medium-sized companies and 4 industrial companies. The production, no longer limited to cutlery, diversifies by specializing in areas such as dental tools, cutlery, scissors, corkscrews, turbine blades, spatulas for fine arts, knives for sports activities.

A Maniago cresce la produzione grazie all’inserimento di macchine moderne specializzate. La realtà produttiva è costituita da 200 aziende artigiane, 15 imprese di media dimensione e 4 aziende industriali. La produzione, non più limitata alla coltelleria, si diversifica specializzandosi in ambiti come gli strumenti dentali, la posateria, le forbici, i cavatappi, le pale per turbine, le spatole per belle arti, i coltelli per attività sportive.

1984

Medesy takes its current name.

Medesy prende il suo nome attuale.

1987

MEDESY INAUGURATES THE BIRTH OF ITS ICONIC DOUBLE-BLADED LOGO, A TRIBUTE TO THE SECTOR OF SPECIALIZATION BUT ALSO TO THE TRADITION OF THE DISTRICT THAT SAW IT BORN.

Medesy inaugura la nascita del suo iconico logo a due lame, omaggio al settore di specializzazione ma anche alla tradizione del distretto che l’ha vista nascere.

1998

Medesy is the first Italian company to take part in AEEDC DUBAI, the second most important world fair in the dental sector.

Medesy è la prima azienda italiana a prendere parte ad AEEDC DUBAI, la seconda fiera mondiale per importanza nel settore dentale.

2008 - 2009

THANKS TO THE COLLABORATION WITH DR. COMELLA, THE EXCLUSIVE COMELLA DROP MIRROR IS PATENTED,

destined to be very successful thanks to its design that enhances its functionality and compactness. The following year, the famous DALILA handle was conceived and manufactured, redefining the design of the handles dedicated to dentistry.

Viene brevettato lo specchio a goccia Comella, in collaborazione con il Dr. Comella. L’anno successivo viene ideato e realizzato il celebre manico DALILA che ridefinisce il design dei manici dedicati all’odontoiatria.

2013

UNICREDIT GIVES MEDESY THE “OK ITALIA” AWARD,

the exclusive recognition reserved for the best Italian companies that have achieved excellent results.

Unicredit conferisce a Medesy il premio “OK ITALIA”, l’esclusivo riconoscimento riservato alle migliori aziende italiane che hanno raggiunto risultati d’eccellenza.

2014

THE COMPANY INAUGURATES THE NEW HEADQUARTERS OF 5,000 SQUARE METERS LOCATED IN A LARGE AREA OF OVER 20,000 SQUARE METERS.

The most important extension is dedicated to the production department which can now house new latest generation machinery and advanced technologies, but also internalize the artisan workshops in order to ensure maximum control, greater efficiency and the highest production standards.

L’azienda inaugura la nuova sede di 5.000 mq collocata in una grande area di oltre 20.000 mq. L’ampliamento più importante è dedicato al reparto produttivo che può ora ospitare nuovi macchinari di ultima generazione e tecnologie avanzate, ma anche internalizzare i laboratori artigianali per poter garantire il massimo controllo, una maggior efficienza e i più alti standard produttivi.

600 year / 600 anni

2018

FROM THE COLLABORATION WITH THE CREATIVE GENIUS OF PININFARINA STUDIO LEVANTE IS BORN,

the new Medesy line that expresses the perfect meeting point between design, functionality and ergonomics.

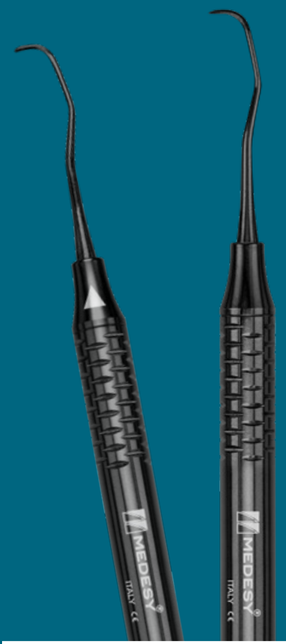
Dalla collaborazione con il genio creativo dello studio PININFARINA nasce LEVANTE, la nuova linea Medesy che esprime il punto d'incontro perfetto tra design, funzionalità ed ergonomia.

2019

MEDESY EXPANDS AND BECOMES A GROUP BY ACQUIRING LEADER,

a 3-generations company based in Maniago, specialized in the production of professional scissors for hairdressers and hair stylists.

MEDESY diventa gruppo acquisendo LEADER, azienda di Maniago alla 3ª generazione, specializzata nella produzione di forbici professionali per parrucchieri e hair stylist.



2020

THE COMELLA SPATULA IS LAUNCHED,

designed by Dr. Comella at the beginning of his career and perfected in over 30 years of work, this spatula responds to the needs of flexibility and functionality by optimizing every aspect of modeling practice.

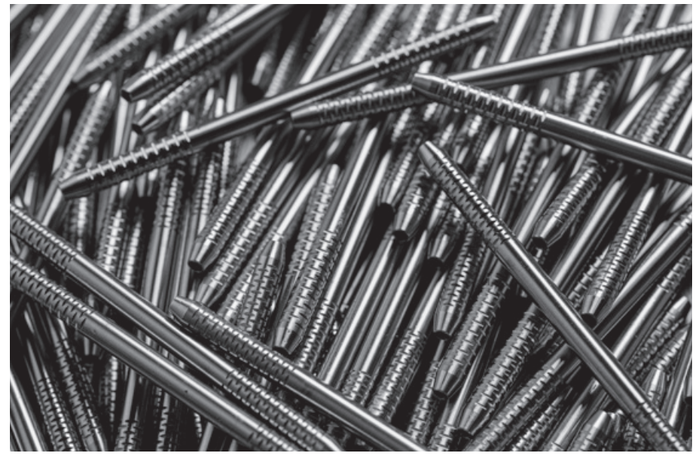
Viene lanciata la SPATOLA COMELLA, ideata dal Dr. Comella agli inizi della sua carriera e perfezionata in oltre 30 anni di lavoro, questa spatola risponde alle esigenze di flessibilità e funzionalità ottimizzando ogni aspetto della pratica di modellazione.

2022

THE NEW BORN FROM MEDESY RESEARCH, NERISSIMO

a line of dental instruments treated with the innovative DLC (Diamond Like Carbon) finish: the special biocompatible coating that guarantees extraordinary quality of resistance, precision and reliability over time.

Dalla ricerca MEDESY nasce NERISSIMO, la linea di strumenti odontoiatrici trattati con l'innovativa finitura DLC (Diamond Like Carbon): lo speciale rivestimento biocompatibile che garantisce straordinari qualità di resistenza, precisione e affidabilità nel tempo.



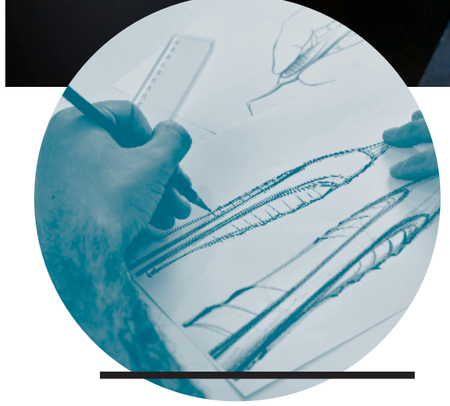
Esempi di produzione / Production details

004

The art of renewing / L’arte di rinnovare

In Medesy the centennial art of Maniago steel meets the intelligence of the most advanced and sustainable production technologies.
We treasure the craftsmanship of our district, an expertise of excellence that today can count on highly specialized resources and advanced production systems, able to preserve the best product characteristics, while ensuring maximum efficiency, sustainability and flexibility at every stage.

In Medesy l’arte secolare dell’acciaio di Maniago incontra l’intelligenza delle tecnologie produttive più evolute e sostenibili.
Facciamo tesoro della maestria artigianale del nostro distretto, un’expertise d’eccellenza che oggi può contare su risorse altamente specializzate e sistemi produttivi avanzati, in grado di conservare le migliori caratteristiche di prodotto, garantendo al contempo massima efficienza, sostenibilità e flessibilità in ogni fase.



Research /
Ricerca

The dialogue with our customers, partners and authorities in the dental field allows us to constantly improve and update our offer.

Il dialogo con i nostri clienti, partner e autorità in campo odontoiatrico, ci consente di migliorare e aggiornare costantemente la nostra offerta.

Development /
Sviluppo

Shared skills, experiences and creativity to achieve one great goal together: to ensure the customer the best in every aspect.

Competenze, esperienze e creatività condivise per raggiungere insieme un solo grande obiettivo: garantire al cliente il massimo in ogni aspetto.

Innovation /
Innovazione

Medesy is anchored to the values of the past but also oriented to the future: the huge investments in new technologically advanced and sophisticated machineries, developed in collaboration with our technical staff, confirm Medesy strong commitment to continuous innovation.

Medesy ha il cuore ben saldo nella propria cultura ma è al futuro che volge il suo sguardo: gli ingenti investimenti in nuovi macchinari tecnologicamente avanzati, ideati e sviluppati con la collaborazione del nostro personale tecnico, confermano l'impegno di Medesy nell'innovazione continua.

Our commitment / Il nostro impegno

“Commitment” means engagement, at MEDESY for all of us it means implementing strategies and initiatives to improve people’s well-being and to protect the environment as well as its resources. MEDESY CommitDent is our way of making a difference, a daily commitment that translates into concrete actions and projects, sharing values that aim at ethical and sustainable progress.

“Commitment” significa impegno, per noi di Medesy significa attuare strategie e iniziative per migliorare il benessere delle persone e tutelare l’ambiente e le sue risorse. Medesy CommitDent è il nostro modo di fare la differenza, un impegno quotidiano che si traduce in azioni concrete, progetti, una condivisione di valori che mira a un progresso etico e sostenibile.

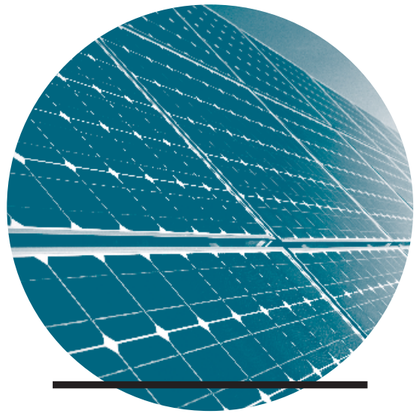
We know how important bees are for our ecosystem, so Medesy decided to collaborate on a local project that involves the placement of new hives on our territory, some of which have already been installed in the large green area of our company.

Sappiamo quanto le api siano importanti per il nostro ecosistema per questo Medesy ha deciso di collaborare ad un progetto locale che prevede il collocamento di nuove arnie sul nostro territorio, alcune delle quali sono già state installate nella grande area verde della nostra azienda.

Social / Sociale

One of the most important projects in which our company participates is for the Fundación AMS para labio y paladar hendido a.c. in Mexico, a non-profit association that deals with the treatment of children suffering from cleft lip and cleft palate. A close relationship of meetings and commitments binds us to the foundation, to which we supply surgical and dental instruments for the treatment of children of needy families.

Uno dei progetti più importanti ai quali partecipa la nostra azienda è quello per la Fundación AMS para labio y paladar hendido a.c. in Messico, un’associazione senza fini di lucro che si occupa del trattamento di bambini affetti da labbro leporino e palatoschisi. Un fitto rapporto di incontri e impegni ci lega alla fondazione, alla quale forniamo strumenti chirurgici e dentali destinati alle cure destinate ai bambini di famiglie bisognose.



Environmental / Ambientale

We invest in the use of renewable resources and clean energy sources, such as photovoltaic panels. We aim to reduce the environmental impact in all production phases thanks to the adoption of more efficient processes and systems for reusing water and used vegetable oils. Our new washing system is GREEN: it avoids the consumption of water and its disposal in the sewer system, using a vacuum system of modified alcohols that are filtered and distilled to be reused in a continuous cycle within the system itself. The packaging of Medesy products consists entirely of FSC®-certified paper, a brand that identifies products from sustainably managed forests.

Investiamo nell’utilizzo di risorse rinnovabili e fonti di energia pulita, come i pannelli fotovoltaici.
Miriamo a ridurre l’impatto ambientale in tutte le fasi produttive grazie all’adozione di processi più efficienti e sistemi di riutilizzo dell’acqua e degli oli di origine vegetale utilizzati.
Come ad esempio il nuovo impianto per il lavaggio sostenibile che evita il consumo di acqua e il suo smaltimento nelle rete fognaria, utilizzando un sistema sottovuoto di alcoli modificati che vengono filtrati e distillati per essere riutilizzati a ciclo continuo all’interno dell’impianto stesso.
Il packaging dei prodotti Medesy è interamente costituito da carta certificata FSC®, marchio che identifica prodotti provenienti da foreste gestite in maniera sostenibile.

2500/SET PEDO

Set children tooth forceps (10 forceps)
Set pinze per bambini (10 pinze)

Content / Contenuto:

2500/13-S	Lower incisors and premolars
2500/29-S	Upper roots
2500/37	Upper incisors
2500/38	Lower incisors and canines
2500/39-L	Upper molars left
2500/39-R	Upper molars right
2500/123	Lower roots and incisors, wide beaks
2500/158	Upper molars, narrow beaks
2500/160	Lower molars
2500/162	Lower roots and incisors

The company was using this tooth forceps “Master sample exposer” in 1930s, to verify dimensions and shapes along production process. Displayed today at the museum, in Maniago.
Espositore utilizzato negli anni ‘30 per verificare forme e dimensioni delle pinze in produzione. Esposto attualmente presso il museo, a Maniago.

2500/86	Lower molars, deep gripping lateral, cow horn

SET 12 pcs: includes 2 additional forceps, the cow horn beak N-86 and the N-74 for lower roots and incisors.
SET 12 pezzi: composto da 2 ulteriori pinze, la corno di bue n-86 e la n-74 per l'estrazione di radici inferiori e incisivi.

TOOTH FORCEPS BLADE BEAKS
PINZE PER ESTRAZIONE BLADE BEAKS

FORCEPS "BLADE BEAKS"
1 **"Blade Beaks" smoothly penetrate in contact with the root.**
2 **They have larger contact surface for a secure grip.**
3 **They are delicate with surrounding tissues and minimize the risk of tooth fracture.**
4 **They give better control over the root during the extraction operations.**

PINZE "BLADE BEAKS"
1 "Blade Beaks" penetrano facilmente sino al contatto della radice.
2 Hanno una maggior superficie di contatto per una presa più sicura.
3 Assicurano un maggior rispetto dei tessuti e riducono il rischio di frattura del dente.
4 Danno maggior controllo sulla radice durante le fasi di estrazione.

TOOTH FORCEPS BY DR. COMELLA
PINZE PER ESTRAZIONE DEL DR. COMELLA

2400/70
(**1:1 scale** / scala 1:1)

DR. FABRIZIO COMELLA'S FORCEPS

Dr Comella's forceps are the only forceps specifically designed for the extraction of the root and fragments of horizontal impacted third molars. The extraction of impacted third molars deserves a special attention for its complexity. Traditional tools and especially the elevators may be very unsafe as they may cause a damage to adjacent nerves and tissues, in the worst case even to the lingual nerve. Dr. Comella's forceps offer a secure and comfortable grip for an easy handling and healthy preservation of the surrounding tissues.
(Protected by International Patent)

LA PINZA DEL DR. FABRIZIO COMELLA

La pinza del Dr. Comella è stata sviluppata specificatamente per l'estrazione delle radici e frammenti dell'ottavo incluso. Nella pratica odontoiatrica, l'estrazione di un ottavo incluso richiede una precisione assoluta, essendo di fatto un intervento tra i più delicati. Particolarità di questa pinza è la possibilità di estrarre anche le radici che risultano meno accessibili con l'ausilio di strumenti tradizionali: in particolare l'uso delle leve può provocare lacerazioni dei tessuti molli adiacenti con interessamento (nei casi più estremi) del nervo linguale. La pinza del Dr. Comella offre una presa sicura, preservando i tessuti adiacenti.
(Protetta da Brevetto Internazionale)

Dr. Fabrizio Comella: since the beginning of his career, as a dentist and researcher, he has been active in the specific field of technical development applied to dental instruments and devices. He is regularly cooperating with MEDESY since 2007 for the study and the realization of innovative instruments conceived for use in surgery and implantology.

Dr. Fabrizio Comella: sin dall'inizio della sua carriera, come dentista e ricercatore, ha sfruttato le sue competenze tecniche nello sviluppo di strumenti in ambito odontoiatrico. Collabora attivamente con MEDESY sin dal 2007, con la quale ha realizzato innovativi strumenti nel campo della chirurgia ed implantologia.

ROOT ELEVATORS
LEVE PER RADICI

1 **Hollow handles featuring 2 symmetric parts welded by laser technology; satin finish to improve the grip level.**

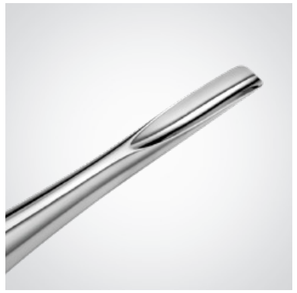
Manici vuoti composti da 2 parti simmetriche saldate laser; finitura satinata per aumentare la presa.

2 **Points welded to the handles using laser technology, which prevents:**

- **Infiltration of residuals (as it may happen for tips assembled to the handle by pressure).**
- **Rounded corners and edges.**

Punte saldate al manico con laser:

- Rende impossibili infiltrazioni di residui (come invece può accadere su punte inserite a pressione).
- Arrotondamento di angoli e spigoli.



3 **Points made with hardened stainless steel to prevent bending and fractures.**

Punte in acciaio inox temprato per evitare piegature e rotture.

Thanks to the serrated tips, elevators LINDO LEVIAN ensure a smooth extraction of the root and eliminate the need of any leverage procedure. A slight rotary movement of the tip, positioned between the alveolus and the root will produce an easy extraction.

Grazie alle punte zigrinate, con le leve **LINDO LEVIAN** si può ottenere l'estrazione della radice escludendo il classico effetto leva. Una volta inserita la punta in posizione, per mezzo di un delicato movimento rotatorio si potrà estrarre la radice.

“ MEDESY IN SPOT

All elevators points are in scale 1:1

Tutte le punte delle leve sono in scala 1:1 **”**

ROOT ELEVATORS LUSSATORE
LEVE PER RADICI LUSSATORE

Lussatore elevators have extremely thin and sharp blade and better fit in tight apical spaces, as well as more efficient at cutting the periodontal ligament. The special shape ensures an easy widening of the alveolus, in many cases making the use of extraction forceps needless.

Leva che possiede una lama estremamente piatta e tagliente, permette una precisa penetrazione e taglio del ligamento periodontale. Il vantaggio del Lussatore risiede nella diminuzione dei traumi esercitati sui denti e gengive ed in molti casi esclude la necessità dell'uso delle pinze per estrazione.

ROOT ELEVATORS *MEDIMPLA*
LEVE PER RADICI *MEDIMPLA*

The insertion of the new *MEDIMPLA* root elevators into the intraligamental zone is easier thanks to the extreme sharpness and perfect bending of the tip. These elevators have been conceived to perform a minimum traumatic extraction and therefore to preserve the alveolar site in perfect conditions. The special "pen form" assures very delicate movements.

L'inserimento della leva ***MEDIMPLA*** nel sito intraligamentale risulterà facilitato grazie ad una estrema finezza e particolare curvatura di questa nuova linea di mini leve. Tutto ciò al fine di garantire un'estrazione più atraumatica possibile, che permette quindi di conservare il sito alveolare in perfette condizioni. La speciale forma "a penna" assicura movimenti particolarmente delicati.

PERIOTOME
Handle with 4 interchangeable blades, for atraumatic extraction of teeth with minimal damage to the surrounding alveolar bone. Thanks to the sharp and delicate blades, the marginal gingiva and periodontal ligament can be carefully detached.
Its use is particularly important when considering dental implants.
PERIOTOME IS USED FOR CUTTING, NOT FOR LEVERING.

PERIOTOMO
Strumento con 4 lame intercambiabili, indirizzato alla fase di estrazione del dente senza compromettere o danneggiare il sito alveolare.
Grazie alle lame efficacemente affilate e delicate, il taglio di gengiva e legamento parodontale risulterà semplice e sicuro.
Il suo utilizzo è particolarmente indicato in tema di impianti dentali.
IL PERIOTOMO È UNO STRUMENTO DA TAGLIO, NON UNA LEVA.

SURGICAL SCISSORS, HI-TECH
FORBICI CHIRURGICHE, HI-TECH

New surgical scissors HI-TECH, innovative and absolutely unique as they are entirely laser cut from stainless steel sheets instead of using classic hot forging processes.
The laser cutting technique ensures a constant and higher quality standard as well as perfect geometrical uniformity on each item.
The main features of the HI-TECH scissors are:

- **Elevated hardness degree (56 HRC);**
- **Shape and size uniformity and accuracy;**
- **Assembly on elastic bases for a constant and smoother action.**

Nuove forbici chirurgiche HI-TECH, innovative ed uniche nel loro genere in quanto ricavate da fogli di acciaio tagliati a laser anziché da metodo classico mediante forgiatura a caldo. Tale sistema di produzione assicura elevati standard qualitativi e geometrie perfette. Le principali caratteristiche che contraddistinguono le forbici HI-TECH sono:

- Elevata durezza (56 HRC);
- Garanzia di forma e misure;
- Assemblaggio su basi elastiche per costante scorrevolezza.

SURGICAL SCISSORS, HI-TECH
FORBICI CHIRURGICHE, HI-TECH

Medesy HI-TECH scissors are available also in the BLK variant: a special surface Diamond Like Carbon Coating, otherwise referred to as DLC coating which enables the following features:

- **Prolonged edge sharpness;**
- **Cutting smoothness;**
- **High surface micro hardness (2000 HV);**
- **Stronger corrosion resistance;**
- **Reduction of light reflect.**

Le forbici HI-TECH sono prodotte anche nella variante BLK: uno speciale trattamento superficiale (DLC = Diamond Like Carbon) che consente di ottenere le seguenti peculiarità:

- Affilatura prolungata;
- Fluidità di taglio;
- Microdurezza superficiale elevata (2000 HV);
- Maggiore resistenza alla corrosione;
- Superficie antibatterica;
- Riduzione della luce riflessa.

MARILYN scissors, the lightest operating scissors, the extremely fine point ensures the utmost accuracy.

Forbici serie MARILYN, si caratterizzano per la loro particolare leggerezza e delicatezza in uso.

The scissors here illustrated are characterized by a fine micro serration on one of the blades, specifically applied to firmly grasp the tissue while cutting and to preclude the risk of slipping.

Le forbici qui raffigurate si caratterizzano per la micro dentatura presente su una lama, specifica per trattenere il tessuto durante il taglio ed evitandone lo scivolamento dello stesso.

SURGICAL SCISSORS, SUPERIOR CUT
FORBICI CHIRURGICHE, SUPERIOR CUT

MEDESY SUPERIOR CUT SCISSORS
Uniquely sharp scissors with superior cutting capacity: razor-shape blade on one side and fine serration on the other one. The ideal combination for a firm hold and neat cut of the tissue. For easy identification these scissors have one gold ring. Medesy has recently developed a SUPERIOR CUT line variant featuring open rings handles: the best synthesis between practicability and cutting efficiency.

MEDESY SUPERIOR CUT FORBICI
Forbici uniche per le caratteristiche di affilatura: una lama estremamente affilata (effetto rasoio) e l'altra lama microdentata. Combinazione ideale per garantire la presa dei tessuti e tagli perfetti. Per l'immediata identificazione, un solo anello è dorato. Medesy ha recentemente sviluppato le forbici SUPERIOR CUT con anelli aperti: la miglior combinazione tra maneggevolezza e qualità di taglio.

Standard scissors are not suitable for left handers. Because of their overlapping blades they are not symmetric and therefore best suited for use with the right hand. For right-handed scissors held in the right hand, the thumb blade is closer to the user's body, so that the natural tendency of the right hand is to force the cutting blades together. Conversely, if right-handed scissors are held in the left hand, the natural tendency of the left hand would be to force the cutting blades laterally apart. Besides that, with right-handed scissors held by the right hand, the shearing edge is visible, but when used with the left hand, the cutting edge of the scissors is behind the top blade, and one cannot see what is being cut. This is why LEFT HANDERS specific scissors with reversed blades are produced.

Per le persone mancine l'uso delle normali forbici costituisce un problema perché lo strumento è asimmetrico. Se anche l'impugnatura fosse giusta, rimarrebbe il problema delle lame perché rovesciando lo strumento la lama superiore coprirebbe la linea di taglio. Usate normalmente le lame taglierebbero all'esterno delle forbici ed il punto di forza delle dita durante il taglio tenderebbe ad allontanare le 2 lame anziché stringerle, vanificando la capacità di taglio. Per questi motivi, vengono prodotte le forbici PER MANCINI.

MEDESY IN SPOT

The needle-holders in pure titanium are characterized by a special lightness and high endurance degree. Manufactured with smooth tips for very thin needles (8-0, 9-0, 10-0) and a safety double-wing locking system. Blue anodized.

I porta aghi in titanio si contraddistinguono per la loro leggerezza e resistenza in genere. Presentano punte lisce per aghi molto sottili (8-0, 9-0, 10-0) ed un sistema di chiusura a doppia aletta. Anodizzati blu.

Atraumatic tissue tweezer,
for gripping membrane and tissue safely. The special serration prevents the perforation of the tissue.

Pinzette per tessuti atraumatiche,
per una salda e sicura presa di membrane e tessuti. La speciale zigrinatura evita la perforazione dei tessuti stessi.

The tip pointing down allows more control of the grip, meanwhile it leaves you a better view for the operation.

La punta rivolta verso il basso permette un maggior controllo della tenuta, e nel contempo lascia maggior visuale per l'intervento.

SYRINGES INOX
SIRINGHE INOX

In line with our project of improving the quality, functionality and durability of the entire range of syringes we are now introducing a selection of innovative syringes made of specific stainless steels which can guarantee the below mentioned characteristics.

La ricerca finalizzata ad aumentare la qualità, funzionalità e durata delle siringhe Medesy, continua con l'introduzione di siringhe prodotte interamente con specifici acciai inossidabili, i quali garantiscono le peculiarità sotto indicate.

Anchoring tip with very innovative helicoidal shape which has been specifically designed to enable a better hooking and unhooking of the carpule rubber seal, (hold by clockwise turning /release anti-clockwise turning). ***Patented.***

Innovativo arpione elicoidale, ideato per agevolare l'aggancio ed il rilascio del gommino carpule: si aggancia avvitando in senso orario, mentre si rilascia avvitando in senso antiorario. *Brevettato.*

Interchangeable tips: for European needles (Metric) characterized by a circular thread; for American needles (Inch) with fully smooth thread.

Puntali intercambiabili: filettatura Europea (metrica) riconoscibili dal segno circolare; filettatura Americana (inch) completamente lisci.

EU European – **METRIC** thread
Puntale europeo – **METRICO**

AM American – **INCH** thread
Puntale americano – **INCH**

Smooth and neat lines ensure a more practical handling and an extremely easy cleaning.

Superfici lineari e levigate per maggior comfort d'uso e praticità di pulizia.

INTRALIGAMENTAL SYRINGES
SIRINGHE PER ANESTESIA INTRALIGAMENTARE

As opposed to a classical infiltration or block anesthesia, this method injects the local anesthesia directly into the dental ligament (periodontal ligament) and thus guarantees a rapid, profound and total anesthesia of a single tooth.

Contrariamente all'anestesia tradizionale che coinvolge un'intera zona, questo metodo inietta l'anestesia locale direttamente nel legamento del dente e ciò garantisce una rapida, profonda e totale anestesia di un solo dente.

Features:
- ▷ **50% lighter than type code 4962**
- ▷ **Handle made of PEEK, autoclavable and offering a higher resistance to wear and tear**
- ▷ **Ergonomic grip**
- ▷ **Easier and very practical operation**

Caratteristiche:
- ▷ Oltre il 50% più leggera del modello 4962
- ▷ Manico in PEEK più resistente all'usura ed autoclavabile
- ▷ Impugnatura ergonomica
- ▷ Funzionamento più pratico e semplice

DIAGNOSTIC
DIAGNOSTICA

MOUTH MIRRORS BY DR. COMELLA
SPECCHIETTO DEL DR. COMELLA

DROP SHAPE MIRROR
The mirror is an indispensable tool for inspecting the oral cavity, soft tissues, anterior and posterior teeth and for all kind of conservative treatment.
An improvement to these standard procedures has been achieved with the introduction of our new "drop shape" mirror which facilitates the control of the soft tissues, better protects the tongue wall and above all it offers a larger view of the superior molar portion and of the oral cavity in general. Furthermore the elongated "drop shape" guarantees a wider reflection surface and therefore a major visibility of the oral cavity.
(Protected by international patent)

SPECCHIETTO A GOCCIA
Lo specchietto odontoiatrico rappresenta lo strumento necessario per l'ispezione del cavo orale, dei tessuti molli, denti anteriori e posteriori e come protezione nelle manovre conservative.
Una miglioria per tutte queste attività è ottenuta con l'introduzione del nuovo specchietto "a goccia" il quale agevola il controllo dei tessuti molli, protegge la lingua e offre una più ampia retrospettiva del versante vestibolare. In aggiunta, il nuovo specchietto "a goccia" garantisce una maggior luce riflessa aumentando così la luminosità del cavo orale.
(Protetto da brevetto internazionale)

PERIODONTAL PROBES
SONDE PARODONTALI

Periodontal probes with technical coating DLC (Diamond Like Carbon):

- **Black background to highlight the contrast ratio for better reading**
- **Rounded tip to prevent traumatic issue**
- **Accurate millimeter scale markings realized by laser**
- **Atraumatic scale non-grooved for a smooth transition**
- **Non fading scale**

Sonde parodontali con rivestimento tecnico DLC (Diamond Like Carbon):

- Base nera per elevare il contrasto di lettura
- Punta arrotondata per non creare traumi
- Scala metrica precisa realizzata a laser
- Scala metrica non traumatica per assenza scanalature
- Non scolora

NEWS

Plastic periodontal probes realized with high quality polymers, approved for medical use.

- ▷ **Best indicated for use in implantology to avoid damages on implants**
- ▷ **Rounded tip to prevent traumatic issues**
- ▷ **Black scale markings on white background for better contrast reading**

Sonde parodontali plastiche realizzate con polimeri di alta qualità approvati per uso medico.

- ▷ Indicate in implantologia per non danneggiare l'impianto
- ▷ Punta arrotondata per non creare traumi
- ▷ Scala metrica nera su una base bianca migliora la lettura

The periodontal tips can be assembled on all mirrors handles having metric thread. The tips are reusable until the scale markings are readable and / or the tips start to deform.

Le punte parodontali possono essere utilizzate su tutti i manici per specchietti aventi filettatura metrica. Le punte sono riutilizzabili fintanto che la scala rimane leggibile e/o la punta non si deforma.

PERIODONTAL
PARODONTOLOGIA

LEVANTE
BY PININFARINA

PININFARINA is a design house of international repute, a symbol of Italian style in the world.
With over 80 years of experience, its activities focus on all-around design, product engineering and research.
FERRARI, MASERATI, ROLLS-ROYCE & BENTLEY are among its prestigious customers.

BATTISTA "PININ" FARINA: «*You ask me what Italian style means. It means sense of proportion, simplicity and harmony of lines, such that after a considerable time, there is still something which is more alive than just a memory of beauty*».

SERGIO PININFARINA: «*The beauty of the shape is the result of a deep engagement aimed to reach the highest quality and the design is itself the meeting point between shape and technology, taste and functionality. Nothing seems to be more adapt to the so-called Italian genius than this permanent tension to harmonize beauty and functionality*».

PININFARINA è una design house di fama internazionale, emblema dello stile italiano nel mondo.
Con oltre 80 anni di esperienza, le sue attività si concentrano sul design, sui servizi di ingegneria, progettazione e ricerca.
FERRARI, MASERATI, ROLLS-ROYCE & BENTLEY sono tra i suoi prestigiosi clienti.

BATTISTA "PININ" FARINA: «*Voi mi chiedete che cosa significhi stile italiano. Significa accordo di linee e senso della proporzione, semplicità e armonia di linee, sicché quando è trascorso un tempo considerevole si può ancora notare qualcosa che risulta più vivo del ricordo della bellezza*».

SERGIO PININFARINA: «*La bellezza della forma è il risultato di un profondo impegno volto a raggiungere la massima qualità, ed il design stesso diventa punto d'incontro tra forma e tecnologia, gusto e funzionalità. Nulla sembra adattarsi al cosiddetto genio italiano più di questa permanente tensione per armonizzare bellezza e funzionalità*».

www.pininfarina.com

PROJECT

LEVANTE was created and sculpted in the same way the artist shapes its work of art, finely removing the superfluous elements in search for the essence of pure form.

The handle perfectly reflects **PININFARINA** passion as well as strong expertise in combining elegance of forms with technology, where «innovation is indeed humanized by the design originality».

LEVANTE denotes a double approach:

- ▷ A distinct focus on **ergonomics** through the valorisation of the materials.
- ▷ A strong resolution to design an **iconic** product.

Pure balance between ergonomic efficiency of the grip and delicate design which emphasizes smooth lines, perfectly fitting the hand palm while holding.

PROGETTO

LEVANTE è stato creato con lo stesso principio delle forme scultoree: si è partiti dal pieno togliendo gradualmente il superfluo, così da concentrarsi sull'essenza della forma.

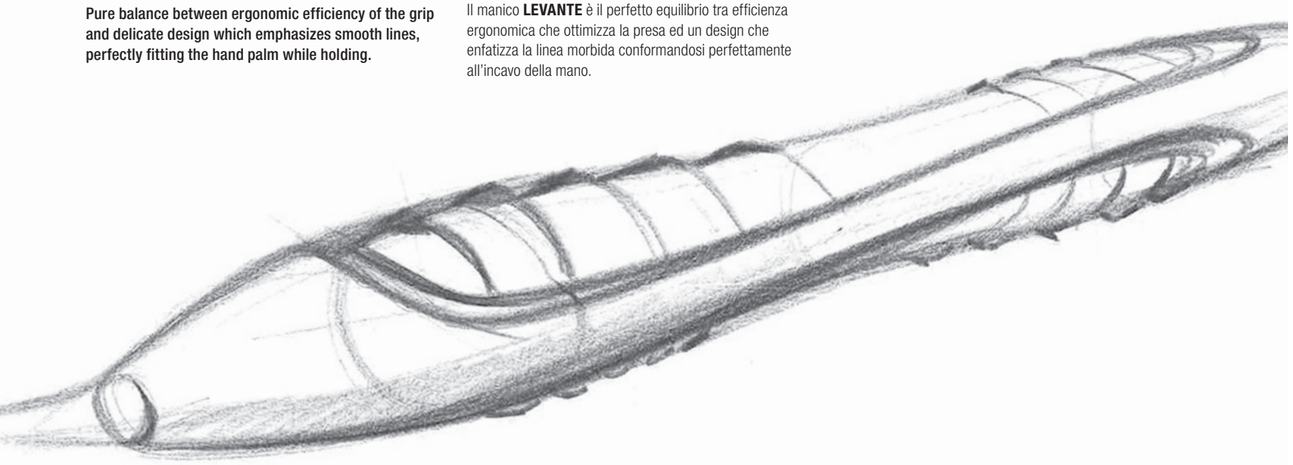
Il manico esprime il punto d'incontro di forma e tecnologia, di gusto e funzionalità, in totale accordo con la filosofia di **PININFARINA**, per cui il «design è lo strumento per umanizzare l'innovazione».

L'approccio per creare **LEVANTE** è stato duplice:

- ▷ Valorizzare il materiale per focalizzarsi sull'**ergonomia**.
- ▷ Disegnare un prodotto che fosse **iconico**.

Il manico **LEVANTE** è il perfetto equilibrio tra efficienza ergonomica che ottimizza la presa ed un design che enfatizza la linea morbida conformandosi perfettamente all'incavo della mano.

LEVANTE™ by pininfarina



ERGONOMICS

The project scope was to create a new design for the handle that could ensure the preservation of a high standard functionality as well as improving the ergonomics to fulfill the needs for major comfort of the end-user.

A detailed analysis of available materials on the market, on their surface texture and on their specific features was carried out until a superior type of Silicone was selected. A safe material, certified and approved by FDA, fitting also utilization on alimentary sector. On the ergonomics side an accurate study was performed to define the different forces which are required while the dentist hand is holding and using the instrument.
Exact data analysis related to the pulling and pushing force and on the rotation capacity, was essential to the creation of a design where the silicone texture increases the grip and maximises the hold of the object even while wearing gloves.

ERGONOMIA

L'obiettivo o project scope: creare un nuovo design che potesse mantenere la precisa funzionalità del manico ed inoltre migliorarne il comfort e l'ergonomia dell'impugnatura, caratteristiche essenziali per l'utilizzatore finale.

Varie le fasi per la realizzazione di LEVANTE, a partire da un'analisi dettagliata sulle caratteristiche dei prodotti similari presenti sul mercato, forma, ergonomia e texture di superficie. Una valutazione ancor più precisa sull'efficienza ergonomica attraverso un attento studio della superficie al fine di ottimizzare la presa delle dita con un design che suggerisca tale scopo.
Infine l'attenta misurazione di forze di trazione, di spinta e di rotazione necessarie durante la fase di utilizzo dell'oggetto stesso, tutto questo hanno permesso la creazione di un manico originale, in silicone atossico, certificato per uso alimentare, approvato FDA, dalle elevate proprietà antiscivolo grazie alla speciale texture per una maggiore grip anche con i guanti.

Triangular profile: high pulling force. Ensuring a stronger grip on the anterior portion of the handle.

Profilo triangolare: forte trazione. Permette una presa più salda nella porzione anteriore del manico.

Circular profile: delicate push/rotation. Ensuring wider holding options to the dentist.

Profilo circolare: delicata spinta/rotazione.
Permette al dentista di scegliere con maggiore libertà come impugnare il manico.

NEW LINE OF GRACEY CURETTES
NUOVA LINEA DI CURETTE GRACEY

2 COLOUR CODED
All the standard curettes are available plus two additional lines with different handle and colour-coded for easy identification.

CODICE COLORE
La gamma di curette standard è completata da due nuove linee con manico diverso e codice colore per una facile identificazione.

3 A SUPERIOR CURETTE
Using a special new steel alloy MEDESY has managed to create a superior curette with even sharper edges; greater hardness and excellent wear resistance of the blade guarantee for a more efficient and durable scaling even in case of intensive use.

UNA CURETTE SUPERIORE
Utilizzando una nuova speciale lega d'acciaio MEDESY è riuscita a creare una curette di altissima qualità con affilatura di grado superiore; la maggior durezza e quindi resistenza all'usura della lama garantisce un curettage più efficace e duraturo nel tempo anche in caso di utilizzo molto intenso.

5 ARROW-SHAPE INDICATOR
An arrow-shape indicator on the handle shows the sharp side.

INDICATORE PARTE AFFILATA
Una piccola freccia sul manico indica il lato affilato della punta.

1 NEW SPECIAL STEEL
Thanks to the special steel alloy the blades remain sharper longer, even after prolonged use thus reducing considerably the need and time spent on re-sharpening.

NUOVA LEGA D'ACCIAIO
Grazie alla speciale lega d'acciaio le lame restano affilate molto più a lungo, anche in caso di un utilizzo prolungato, riducendo notevolmente la necessità di interventi di riaffilatura.

DALILA®

4 DALILA: NEW MEDESY HANDLE
The new curettes are enriched by Dalila exclusive handle, its ergonomic design ensures a very stable grip and greater comfort during use. Conceived and realized to facilitate any cleaning operation, it enables a more practical and secure sterilization.

DALILA: NUOVO MANICO MEDESY
Le nuove curette sono impreziosite dal manico Dalila, un nuovo design ergonomico in grado di agevolare la presa e garantire un maggior comfort durante l'uso. Progettato per rendere più pratica, semplice e sicura la pulizia e la sterilizzazione.

6 ACCURATE AND REFINED FEATURES
High quality standards both on the size accuracy and on the elegance of the forms; our skilled craftsman hand finish the curettes to reach a superior degree of sharpness on each blade, a very delicate and valuable treatment.

FINITURE ACCURATE
Elevati standard di qualità per precisione di misure ed accuratezza delle forme; inoltre i nostri abili artigiani garantiscono un'affilatura superiore in ogni singola lama, processo molto delicato ed importante.

NEWS

DLC COATING: THE FORCE OF CARBON AND HARDNESS OF A DIAMOND

DLC coating provides outstanding performances. A very low temperature during the coating transfer process, the friction coefficient, one of the lowest for the existing coating technologies, the elevated ratio H/E, indicator of excellent wear and stress resistance, just to outline some of the main features which make this treatment at cutting edge of today's coating technology.

IL RIVESTIMENTO DLC: LA FORZA DEL CARBONIO E LA DUREZZA DEL DIAMANTE

Il rivestimento DLC garantisce prestazioni davvero eccezionali. Citando solo alcune delle principali caratteristiche che lo rendono all'avanguardia rispetto ad altre soluzioni, è possibile riscontrare: una bassissima temperatura di applicazione, un coefficiente d'attrito tra i più bassi dei coating esistenti, un elevato rapporto H/E, indice di ottima resistenza all'usura e allo stress.

NEWS

DLC FEATURES AND BENEFITS:

- ▷ Exceptional hardness for a maximum resistance to abrasion for cutting edge instruments: perfect sharpeness guaranteed over time.
- ▷ Low friction coefficent provides high fluidity during the procedure. The result is an excellent non-stick coating that prevents materials residues on the surface.
- ▷ Great endurance to corrosion creating a real barrier against chemical agents.
- ▷ Unaltered precision of the instrument, since the DLC layer bonds and compacts completely with the inox steel.
- ▷ Optimal biocompatibility suitable for the dental procedure as DLC has hypoallergenic proprieties, avoiding medical rejections and tissue damages.

CARATTERISTICHE E BENEFICI DEL DLC:

- ▷ Durezza elevata per massimizzare la resistenza all'abrasione degli strumenti da taglio: affilatura perfetta garantita nel tempo.
- ▷ Il basso coefficiente di attrito incrementa la scorrevolezza e l'anti-aderenza durante le procedure: nessun residuo di materiale rimane attaccato alla superficie.
- ▷ Eccellente resistenza alla corrosione, una vera e propria barriera contro gli agenti chimici.
- ▷ Precisione inalterata dello strumento, poiché il sottilissimo strato DLC aderisce e si compatta perfettamente con l'acciaio inox sottostante.
- ▷ Biocompatibilità ottimale, particolarmente adatta alle prestazioni odontoiatriche, garantita dalle proprietà ipoallergeniche del DLC, non crea rigetto e non danneggia i tessuti.

KIT PERIMPLANTITE

The bacterial aggression observed on the neck portion of the implants is similar to the bacterial aggression observable at the muco-gingival junction of the tooth. The stainless steel instruments may contaminate the titanium made implants while plastic instruments do not fully remove the failing tissues around the implant. Hence the need of using instruments made of titanium, the unique solution for a real efficient and fully safe handling on and close to the implants sites. Blue colour for a simple and fast identification of titanium tips, from standard gray of stainless steel.

L'aggressione batterica osservata nel collo degli impianti è simile a quella presente a livello della giunzione muco gengivale del dente. Gli strumenti in acciaio possono contaminare il titanio degli impianti, mentre quelli in plastica non sono in grado di rimuovere in modo efficiente la parte in oggetto. Da qui la necessità di usare strumenti in titanio, la soluzione sicuramente più adeguata per una gestione del problema efficiente ed in piena sicurezza in prossimità degli impianti. Il colore blu delle punte, serve per identificare in modo semplice e sicuro il titanio impiegato, rispetto al tradizionale acciaio.

CLINICAL CASE
CASO CLINICO

TUNNEL TECHNIQUE, DR. STABLUM

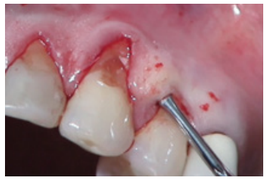
Gingival recession is defined as the apical displacement of the soft tissue margin from its normal position on the crown of the tooth to levels on the root surface beyond the cemento-enamel junction. It has a high incidence among the population and often leads to severe aesthetic problems, tooth sensitivity and /or cervical carious lesions. In the last years several surgical techniques have been developed aiming at performing good root coverage. The unfolding of the "Tunneling technique" represent an interesting improvement for the correction and management of this kind of mucogingival problems. The technique can be performed for single recessions or Miller Class I and Class II multiple recessions, it has been shown to be efficacious combination with subepithelial connective tissue graft (SCTG) or with acellular dermal matrices (ADMS).

TECNICA TUNNELING, DR. STABLUM

Le recessioni gengivali sono definite come uno spostamento in senso apicale del margine gengivale, hanno un'alta incidenza nella popolazione e spesso creano grossi problemi di estetica, sensibilità dentinale e/o carie cervicali. Negli anni sono state sviluppate numerose tecniche finalizzate alla copertura radicolare. Lo sviluppo della "Tecnica a Tunnel" rappresenta un interessante miglioramento nella gestione di queste problematiche; può essere utilizzata sia per recessioni singole sia per quelle multiple di grado I e II di Miller e può essere eseguita in associazione ad innesti di tessuto connettivo e/o matrici dermiche acellulari.

1 **Multiple recession Miller class I and II (21/22/23)**
Recessioni multiple classe I e II di Miller (21/22/23)

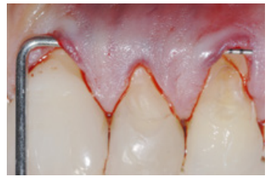
2 **Sulcular incision at T bone depth crest cutting the connective tissue fibers with blade 3638/69**
Incisione sulculare fino alla cresta ossea sezionando le fibre connettivali con lama 3638/69



3 **Papilla elevation performed according to the tunneling technique (698/1.HL8)**
Elevazione della papilla secondo tecnica a tunnel (698/1.HL8)

4 **Tunnel elevation at full thickness in the coronal part for preserving integral tissue volume (698/2.HL8)**
Scollamento del tunnel a spessore totale nella parte più coronale del lembo per mantenere inalterato lo spessore (698/2.HL8)

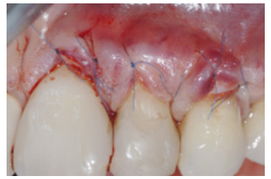
5 **Moving beyond the mucogingival line at split thickness in order to increase the flap mobility in the coronal direction (698/2.HL8)**
Si oltrepassa la linea mucogengivale mantenendo il lembo a spessore parziale per aumentare la mobilità in senso coronale (698/2.HL8)



6 **Checking the mobility with periodontal probe**
Si verifica la mobilità del tunnel con sonda parodontale

7 **Root scaling of the coronal part of recession in order to remove the contaminated cement**
Rimozione del cemento contaminato con curette nella parte coronale delle recessioni

8 **Insertion of the connective tissue graft in the tunnel**
Inserimento dell'innesto connettivale all'interno del tunnel



9 **Graft suturing in order to stabilize it with the overlying coronal gingival flap**
Innesto ancorato al tunnel e posizionato coronalmente tramite suture

Graduated in 1993, University of Verona, Faculty of Dentistry and Prosthodontics. Active member of SIO/IAO (Italian Society for Osteointegration/ Italian Academy of Osteointegration), active member of Florence Perio Group, active member of AIIP (Italian Academy of Implant Prosthesis), active member of GIR (group Implant Research), member of SIDP. From 1999 to 2001, he cooperated with Dr. Giano Ricci in Florence and active as tutor at biennial courses. In 2013 he co-authored the SIO book: IMPLANT SUCCESS: DIAGNOSIS, TREATMENT PLANNING AND OPERATIVE PROTOCOLS. Dr. Stablum currently writes for National and International Dental magazines and is engaged as regular speaker at congresses, in Italy and abroad. He manages his own dental practice in Borgo Valsugana (TN) as specialist in periodontics and implantology.

Laurea in Odontoiatria e Protesi Dentaria nel 1993 conseguita presso l'Università di Verona. Socio attivo SIO/IAO (Società Italiana Osteointegrazione/Italian Academy of Osteointegration), Socio attivo del FLORENCE PERIO GROUP socio attivo AIIP (Academia Italiana Impianto Protesi), socio attivo GIR (Group Implant Research), socio SIDP. Dal 1999 al 2001 collabora presso lo studio del Dott. Giano Ricci a Firenze dove svolge anche attività di tutor ai corsi biennali. Nel 2013 Coautore nel libro della Società Italiana di Osteointegrazione: "IL SUCCESSO IN IMPLANTOLOGIA: DIAGNOSI PIANO DI TRATTAMENTO E PROTOCOLLI OPERATIVI. Pubblica su riviste nazionali ed internazionali, relatore a congressi in Italia e all'estero e svolge la libera professione a Borgo Valsugana (TN) occupandosi prevalentemente di parodontologia e implantologia.

DLC COATING: THE FORCE OF CARBON AND HARDNESS OF A DIAMOND

DLC coating provides outstanding performances. A very low temperature during the coating transfer process, the friction coefficient, one of the lowest for the existing coating technologies, the elevated ratio H/E, indicator of excellent wear and stress resistance, just to outline some of the main features which make this treatment at cutting edge of today's coating technology.

IL RIVESTIMENTO DLC: LA FORZA DEL CARBONIO E LA DUREZZA DEL DIAMANTE

Il rivestimento DLC garantisce prestazioni davvero eccezionali. Citando solo alcune delle principali caratteristiche che lo rendono all'avanguardia rispetto ad altre soluzioni, è possibile riscontrare: una bassissima temperatura di applicazione, un coefficiente d'attrito tra i più bassi dei coating esistenti, un elevato rapporto H/E, indice di ottima resistenza all'usura e allo stress.

DLC FEATURES AND BENEFITS:

- Exceptional hardness for a maximum resistance to abrasion for cutting edge instruments: perfect sharpeness guaranteed over time.
- Low friction coefficent provides high fluidity during the procedure. The result is an excellent non-stick coating that prevents materials residues on the surface.
- Great endurance to corrosion creating a real barrier against chemical agents.
- Unaltered precision of the instrument, since the DLC layer bonds and compacts completely with the inox steel.
- Optimal biocompatibility suitable for the dental procedure as DLC has hypoallergenic proprieties, avoiding medical rejections and tissue damages.

CARATTERISTICHE E BENEFICI DEL DLC:

- Durezza elevata per massimizzare la resistenza all'abrasione degli strumenti da taglio: affilatura perfetta garantita nel tempo.
- Il basso coefficiente di attrito incrementa la scorrevolezza e l'anti-aderenza durante le procedure: nessun residuo di materiale rimane attaccato alla superficie.
- Eccellente resistenza alla corrosione, una vera e propria barriera contro gli agenti chimici.
- Precisione inalterata dello strumento, poiché il sottilissimo strato DLC aderisce e si compatta perfettamente con l'acciaio inox sottostante.
- Biocompatibilità ottimale, particolarmente adatta alle prestazioni odontoiatriche, garantita dalle proprietà ipoallergeniche del DLC, non crea rigetto e non danneggia i tessuti.

COMPOSITE INSTRUMENTS TIN COATED
STRUMENTI PER COMPOSITO RICOPERTI TIN

New line of Composite Instruments TiN coated (Titanium Nitride): the special coating reduces composite or resin stickiness, thus facilitating placement modelling, sculpting and contouring steps.

Nuova linea di strumenti per composito rivestiti con TiN (Nitruro di Titanio): tale rivestimento riduce l'attaccamento del materiale composito allo strumento stesso, rendendone più facile la modellazione.

ENDODONZIA

THE DENTAL DAM / LA DIGA DENTALE

The **DENTAL DAM**, invented more than a century ago by Dr. Barnum, is used in dentistry to reduce contamination due to the need for the area to remain dry and isolated.

The main function of the rubber dam is to isolate the tooth being treated from its environment, in particular from the bacteria of the oral cavity: this permits a clean and dry operative field from saliva or blood.

Another function of the rubber dam is to protect the patient's airway from any materials which may fall into it during treatment. The dental dam improve the visibility of the tooth under treatment, reducing any risk for cheek and tongue.

For adhesive dentistry procedures involving bonding dental composite it is to be encouraged as the operative field must avoid moisture contamination in order to get the maximum bond strength from restorative material to tooth substance.

The dental dam is today considered a fundamental advantage for the dentist and for the patient to the point that a dental treatment is not considered fully correct if performed without the device.

MEDESY dental dams contain little latex protein and are powder-free to minimize the risk of skin allergies to sensitive patients.

La **DIGA DENTALE**, inventata oltre cento anni fa dal Dr. Barnum, è utilizzata in odontoiatria per ridurre il rischio di contaminazione e mantenere l'area in cui si sta operando in condizioni asciutte ed isolate.

La funzione principale della diga dentale è quella di isolare il dente da trattare dal suo ambiente, in particolare dai batteri del cavo orale: ciò consente un campo operatorio pulito ed asciutto senza contaminazione da sangue o saliva.

Un'altra funzione della diga dentale è di proteggere le vie aeree del paziente da tutti i materiali che possono essere ingeriti durante il trattamento. La diga migliora la visibilità del dente da trattare, spostando guance e lingua riducendone il rischio di tagliarle.

Per gli interventi di odontoiatria che coinvolgono l'utilizzo del composito dentale è da incoraggiare l'utilizzo della diga per evitare che il campo operatorio sia contaminato dall'umidità ed al fine di ottenere la massima resistenza e performance dal materiale di restauro.

La diga dentale è oggi considerata un vantaggio fondamentale per il dentista e per il paziente al punto che un trattamento dentale non viene considerato pienamente corretto se eseguito senza questo dispositivo.

Le dighe in lattice MEDESY sono specificamente trattate per ridurre il contenuto della proteina del lattice e quindi minimizzare il rischio di allergie cutanee.
Inoltre non contengono alcuna traccia di polvere per impedire che i fogli di diga si attacchino gli uni agli altri, la quale provocherebbe reazioni allergiche a pazienti sensibili.

Dr. Giuliano Corrozzatto, after completing the college studies and training as a dental technician he earned a degree in dentistry at the university of Trieste with a doctoral thesis on digital radiology applied for use in the dentistry procedures. A healthcare professional with a long track record of successfully diagnosing and treating patients' dental conditions gathered in many years of cooperation with several clinics and dental teams. He now practises and manages his own dental centre providing a full range of dental treatment to patients to help them maintain oral health. He has been regularly cooperating on many projects with MEDESY Research and Development Department mainly in the field of conservative dentistry spending a significant amount of time evaluating and testing specialist innovative equipment. To review Dr. Corrozzato's videos on the use and the placement of the dental dam click on www.medesy.it

Dr. Giuliano Corrozzatto, dopo aver conseguito il diploma di odontotecnico, si laurea in odontoiatria all'università di Trieste con tesi di laurea in radiologia digitale applicata all'odontoiatria. Dopo molteplici collaborazioni e ottimi risultati conseguiti nell'ambito odontoiatrico, diventa titolare di un proprio studio dentistico. Da diversi anni collabora con MEDESY, sviluppando assieme al dipartimento di ricerca e sviluppo nuovi strumenti nel settore della odontoiatria conservativa. Per visionare i video sul montaggio della diga dentale del Dr. Corrozzatto, connettersi su **www.medesy.it**

PREMOLARS / PREMOLARI

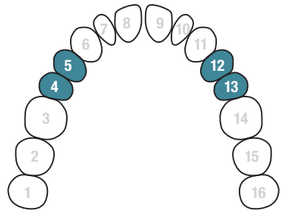
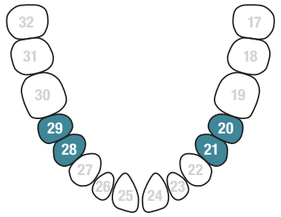
UPPER JAW / ARCATA SUPERIORE





LOWER JAW / ARCATA INFERIORE

New clamps for MEDESY dental dam, superior quality in all details.
The superior quality of the stainless steel and a special temper treatment preserve the elasticity of the new MEDESY clamps and ensure a longer endurance to stress.
The anchorage holes are compatible with any type of clamp forceps; the edges are bevelled to offer more comfort during utilisation.
Also the new rubber dam clamps, as all the other MEDESY instruments, have a life time warranty against manufacture or material defects.

Nuovi uncini per diga MEDESY, alta qualità in ogni dettaglio.
Grazie all'acciaio di prima scelta ed un trattamento termico speciale, i nuovi uncini per diga MEDESY mantengono inalterata la loro elasticità per molto tempo.
I fori di ancoraggio sono universalmente compatibili con le varie forme di pinze per uncini, mentre i bordi sono smussati per un maggior comfort.
Come tutti gli strumenti MEDESY, i nuovi uncini per diga sono garantiti contro ogni eventuale difetto di materiale o lavorazione per tutta la durata della loro vita.

MOLARS (GENERAL) / MOLARI (GENERALE)

5595/8A

SPREADERS

SPREADER: recognizable from its pointed tip and its stem, which is bended in many different ranges. The spreader is mostly used for the following applications: *cold working* to laterally compact the guttaperca into the endodontic canal; *heat carrier* to carry the heat into the endodontic canal through a previously heated tip.

SPREADER: si riconosce per la punta aguzza e stelo piegato in varie gradazioni. Le metodologie di applicazione più comuni sono: ***uso a freddo*** la cui funzione è di compattare lateralmente il cono master di guttaperca contro la parete del canale endodontico ricavando lo spazio per introdurre i coni accessori; ***porta calore*** la cui funzione è appunto di portare calore nel canale endodontico per mezzo della punta precedentemente scaldata.

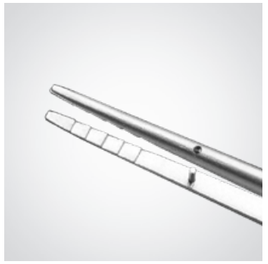
ENDODONTIC PLIERS
PINZE ENDODONTICHE

The thin and long tips bent at 60° against the handle enable the instrument to be introduced deeply into the root canal. The total length of the tips is 20 mm with a diameter of 0,8 mm.

Le punte assottigliate e curvate a 60° rispetto l'asse dell'impugnatura, permettono alla pinza di essere introdotta in profondità nel canale. La lunghezza totale delle punte è di 20 mm con un diametro di 0,8 mm.

The forceps have been equipped with a special set of serrated edges positioned at an acute angle, which enables a firm seizing of a broken instrument, or a silver pin in the root canal. The total length of the serrated working part is 5 mm.

La speciale zigrinatura con angoli acuti assicura una presa perfetta del frammento o della punta, all'interno del canale. La lunghezza totale della parte zigrinata è di 5 mm.



The internal pin prevents the side slipping of the tips.

Il rivetto interno evita l'accavallarsi delle punte.

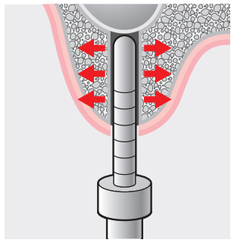
1321/5 (ø 4,2 / 5,0 mm)
Convex
Convesso

A new tip for the osteotomes of the line Medoss: the terminal portion is now conical to facilitate the insertion in the sinus cavity and has minimal/maximal diameter scale, progressive depth markings from 8 to 18 mm, by 2 mm steps.

Nuova punta degli osteotomi linea Medoss: il terminale è ora conico per agevolare l'inserimento nella cavità, avente diametro minimo e massimo; le tacche di profondità hanno scala da 8 a 18 mm, con step di 2 mm.



SINUS CONDENSING

Osteotomes conceived to compact the bone before the placement of an implant and aiming at reaching greater density, which is better for initial implant support. Thanks to the new conical shape with increasing diameters the bone condensation is obtained both laterally and apically. The terminal conical portion is slightly rounded to reduce the risk of perforation of the Schneiderian membrane.

Osteotomi progettati per compattare l'osso, prima dell'inserimento dell'impianto. La compattazione avviene sia in senso laterale che verticale, grazie alla nuova forma conica e progressiva della punta. Il terminale è arrotondato per ridurre il rischio di perforare la membrana di Schneider.

SINUS ELEVATION

Osteotomes conceived to prepare the implant site. The specific tip shape with cutting edges enables as bone grafting on the implant cavity. Concave (Cupped-ended) osteotomes are used to collect and compress bone into the apical end of the osteotomy. A far less invasive technique compared to the Sinus lift obtained by performing a "later window" approach.

Osteotomi progettati per preparare il sito implantare. La forma della punta permette di innestare l'osso della cavità e di trasportarlo alla sommità, grazie ai bordi taglienti e al terminale concavo. Tecnica meno invasiva rispetto la "lateral window".

“ MEDESY IN SPOT

Color codes for the new osteotomes

Codice colore per i nuovi osteotomi ”

New MEDOSS osteotomes, equipped with a practical and easy blocking device extremely compact if compared to the traditional system thus ensuring a larger visual and operative field. The supplied screwdriver operates the locking and unlocking on the osteotome stopping device.

Nuovi osteotomi MEDOSS, progettati con un semplice e pratico sistema di bloccaggio: tale sistema è estremamente compatto se confrontato con il sistema tradizionale, aumentando il campo visivo ed operativo. Il cacciavite fornito in dotazione serve a bloccare e sbloccare il sistema di stop dell’osteotomo.

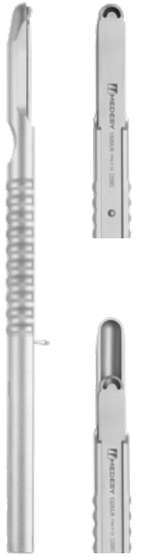
BONE SCRAPER
GRATTINO PER OSSO



Bone scraper essential instrument for collecting autogenous bone used for bone-regeneration. Its unique shape and sharp blade empower the collection of the cortical bone in the device's chamber. The graft is harvested with coagulated blood for easy and safe immediate implantation.

Grattino per osso, indispensabile strumento per utilizzare osso autologo. Grazie alla sua struttura permette di rimuovere l'osso per mezzo della lama affilata e raccoglierlo nell'apposito contenitore. L'utilizzo di osso autologo sarà poi immediato.

KIT PERIMPLANTITE

The bacterial aggression observed on the neck portion of the implants is similar to the bacterial aggression observable at the muco-gingival junction of the tooth. The stainless steel instruments may contaminate the titanium made implants while plastic instruments do not fully remove the failing tissues around the implant. Hence the need of using instruments made of titanium, the unique solution for a real efficient and fully safe handling on and close to the implants sites. Blue colour for a simple and fast identification of titanium tips, from standard gray of stainless steel.

L'aggressione batterica osservata nel collo degli impianti è simile a quella presente a livello della giunzione muco gengivale del dente. Gli strumenti in acciaio possono contaminare il titanio degli impianti, mentre quelli in plastica non sono in grado di rimuovere in modo efficiente la parte in oggetto. Da qui la necessità di usare strumenti in titanio, la soluzione sicuramente più adeguata per una gestione del problema efficiente ed in piena sicurezza in prossimità degli impianti. Il colore blu delle punte, serve per identificare in modo semplice e sicuro il titanio impiegato, rispetto al tradizionale acciaio.

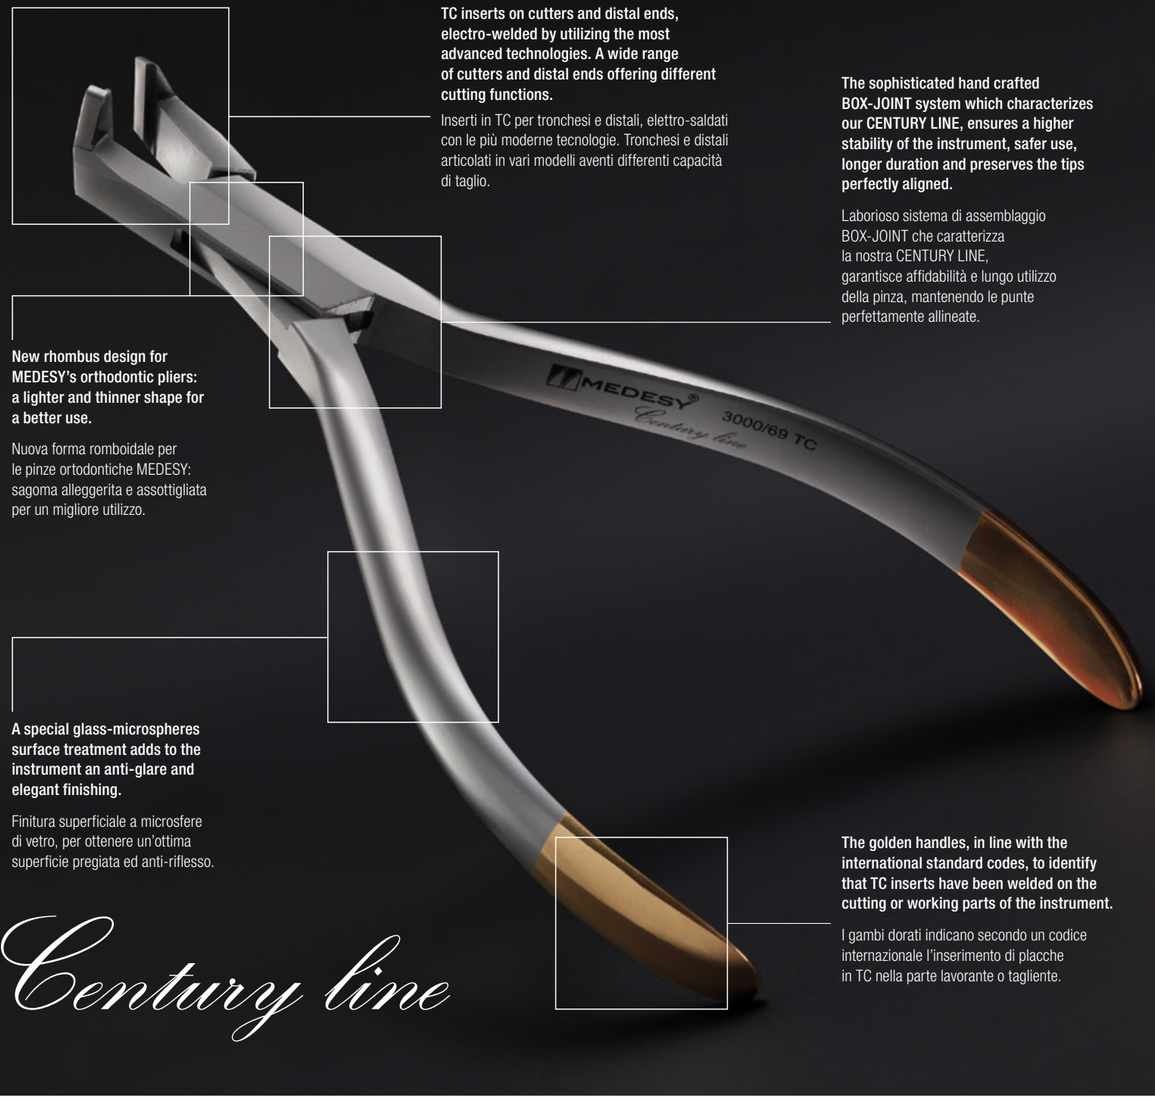
ORTHODONTICS
ORTODONZIA



TC inserts on cutters and distal ends, electro-welded by utilizing the most advanced technologies. A wide range of cutters and distal ends offering different cutting functions.

Inserti in TC per tronchesi e distali, elettro-saldati con le più moderne tecnologie. Tronchesi e distali articolati in vari modelli aventi differenti capacità di taglio.

The sophisticated hand crafted BOX-JOINT system which characterizes our CENTURY LINE, ensures a higher stability of the instrument, safer use, longer duration and preserves the tips perfectly aligned.

Laborioso sistema di assemblaggio BOX-JOINT che caratterizza la nostra CENTURY LINE, garantisce affidabilità e lungo utilizzo della pinza, mantenendo le punte perfettamente allineate.

New rhombus design for MEDESY's orthodontic pliers: a lighter and thinner shape for a better use.

Nuova forma romboidale per le pinze ortodontiche MEDESY: sagoma alleggerita e assottigliata per un migliore utilizzo.

A special glass-microspheres surface treatment adds to the instrument an anti-glare and elegant finishing.

Finitura superficiale a microsfere di vetro, per ottenere un'ottima superficie pregiata ed anti-riflesso.

Century line

The golden handles, in line with the international standard codes, to identify that TC inserts have been welded on the cutting or working parts of the instrument.

I gambi dorati indicano secondo un codice internazionale l'inserimento di placche in TC nella parte lavorante o tagliente.

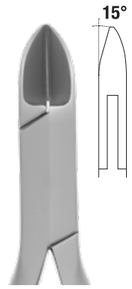
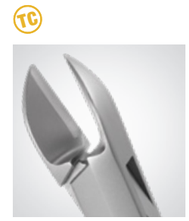
ø max 0,3 mm / .012"
mm 120

Delicate cutter, specially designed for the removal of soft stainless steel ligatures.

3000/91 TC
ø max 0,3 mm / .012"
mm 125

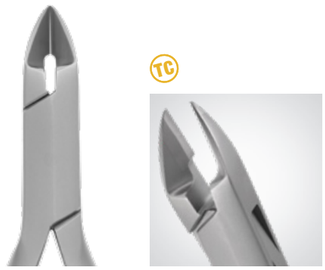
Delicate cutter with a fine tip for easier access to difficult areas. Cut elastics, ligatures, pins and wire.





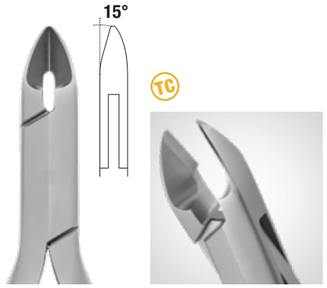
3000/99 TC
Angled 15°
ø max 0,4 mm / .016"
mm 130

Medium cutter ensuring accurate and precision cutting of elastics, ligatures, pins and wire.



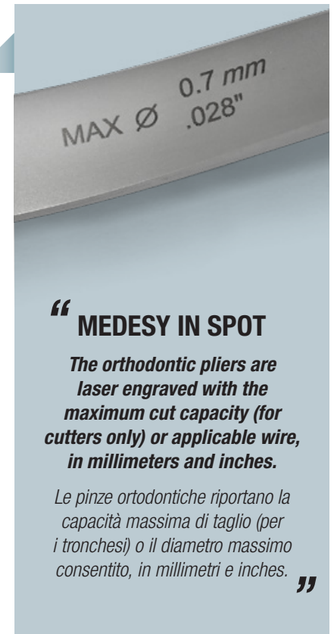
3000/85 TC
ø max 0,3 mm / .012"
mm 130

Standard cutter with slim profile, allowing an easy access and better view of the oral cavity.



3000/85 TC 15°
Angled 15°
ø max 0,3 mm / .012"
mm 130

Same as 85TC, but with a 15° offset tip enhancing a better access in difficult areas



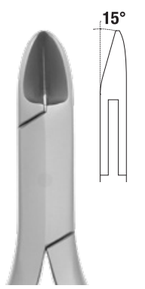
"MEDESY IN SPOT

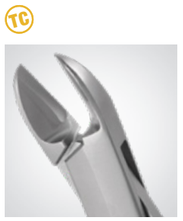
The orthodontic pliers are laser engraved with the maximum cut capacity (for cutters only) or applicable wire, in millimeters and inches.

Le pinze ortodontiche riportano la capacità massima di taglio (per i tronchesi) o il diametro massimo consentito, in millimetri e inches."

HARD WIRE CUTTERS

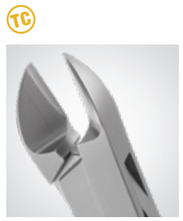
3000/87 TC
(**1:1 scale** / scala 1:1)





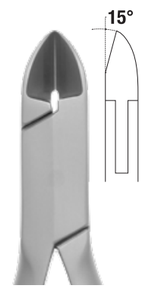
3000/94 TC
Angled 15°
ø max 0,4 mm / .016"
mm 130

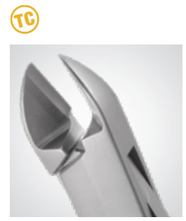
Medium cutter with rounded and slim tip. 15° offset tips help in posterior area.



3000/87 TC
ø max 0,7 mm / .028"
mm 130

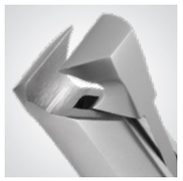
Suitable for cutting archwires or pins of any size. TC inserts ensuring longer duration.





3000/87 TC 15°
Angled 15°
ø max 0,7 mm / .028"
mm 130

Same as 87TC, but with a 15° offset tip enhancing a better access in difficult areas



3000/92 TC
ø max 1,0 mm / .040"
mm 140

For front cutting of heavy wires.

3000/18 TC
ø max 1,0 mm / .040"
mm 155

For an easy cutting of any size of archwire or pin.
15° offset tips for an easier access to the posterior area.

9952/160 TC
ø max 1,5 mm / .060"
mm 170

Double action system for heavy wires, reduce effort on cutting.

UTILITY PLIERS
PINZE AUSILIARIE

3000/31
(**1:1 scale** / scala 1:1)

3000/31
Weingart
ø max 0,7 mm / .028"
mm 145

Versatile utility plier with very fine serration.

3000/32
Weingart – Slim
ø max 0,5 mm / .020"
mm 145

Weingart with fine points.

3000/25 TC
Weingart angled
ø max 0,5 mm / .020"
mm 140

Weingart with TC tips, indicated also for placement and removal of archwires, because of the tapered angular design.

3000/84
How plier – Straight
ø max 0,7 mm / .028"
mm 140

Utility plier with round and serrated tips. Ideal for removal and placement of the archwires. Grasping all types of auxiliaries attachments.

3000/72
How plier – Angled
ø max 0,7 mm / .028"
mm 140

45° angled tips for convenient access to lingual and others difficult posteriors areas.

WIRE BENDING PLIERS
PINZE PIEGA FILI

3000/39 TC
(**1:1 scale** / scala 1:1)

3000/23
Adams
ø max 0,7 mm / .028"
mm 125

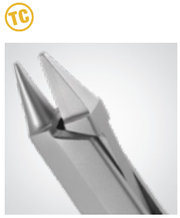
Squared beaks, clasp and wire bending plier.

3000/23 TC
Adams
ø max 0,7 mm / .028"
mm 125

Squared beaks, clasp and wire bending plier, TC inserts.

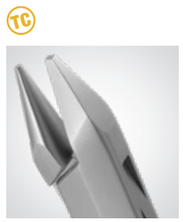
3000/47 TC
N.64
ø max 1,0 mm / .040"
mm 140

Squared beaks, heavy type, TC inserts.



3000/39 TC
Angle N.139
ø max 0,7 mm / .028"
mm 125

Bird beak plier, cone and pyramidal tips in TC. Indicated for loops and general bending of round wires.



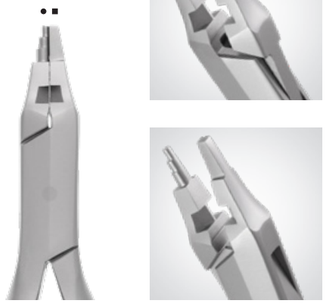
3000/86 TC
Angle N.138
ø max 1,0 mm / .040"
mm 130

Long bird beaks for heavy wire. TC inserts.

3000/21
ø max 0,7 mm / .028"
mm 130

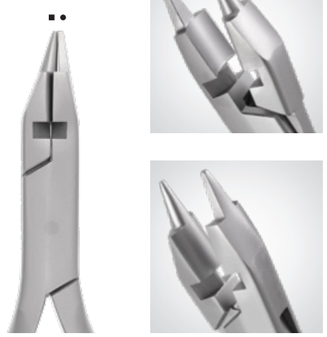
4 grooved bird beaks used to form precise loops in round, squared or rectangular light wire.

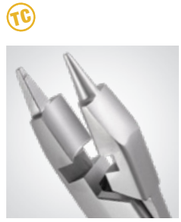
3000/54
(**1:1 scale** / scala 1:1)



3000/40C TC
Tweed
With cutter
ø max 0,4 mm / .016"
mm 130

Ideal with round and square wire, for making consistent uniform loops.
Section tips 1,2-1,8-2,0 mm.





3000/38C TC
With cutter
ø max 0,6 mm / .024"
mm 135

Light wire cutting and contouring plier. For round wire, to bend small ø loops. Contouring of loops and arches up to 0,55 × 0,64 mm.

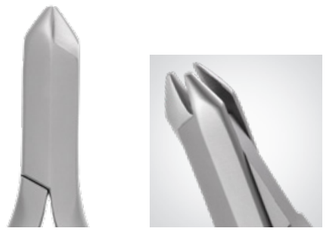
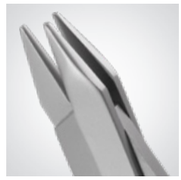
”



3000/57
Aderer – Short
ø max 0,6 mm / .024"
mm 120

3 jaw plier – Short. Slightly rounded tips, for contouring and bending without damaging the archwire.



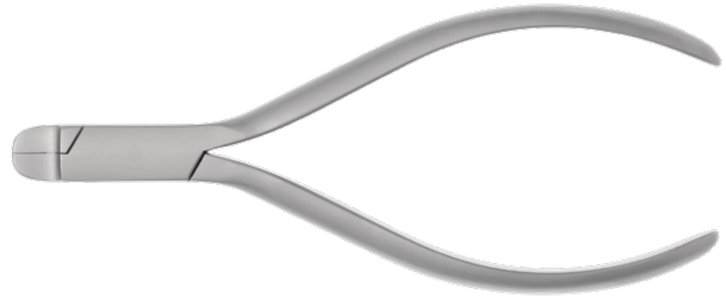
3000/54
Aderer – Long
ø max 0,7 mm / .028"
mm 130

3 jaw plier – Long. Slightly rounded tips, for contouring and bending without damaging the archwire.

3000/20
Jarabak
ø max 0,7 mm / .028"
mm 140

Light wire bending plier. Versatile in different uses, as bending or closing loops. One beak partially serrated for safe grip.

3000/51
(**1:1 scale** / scala 1:1)



3000/51
Tweed – Short
ø max 0,5 mm / .020"
mm 125

Arch forming plier – Short. Ideal for torquing and bending squared or rectangular wire. Parallel blades prevents crushing of wires.

3000/52
Tweed – Long
ø max 0,7 mm / .028"
mm 130

Arch forming plier – Long. As 3000/51 but for bigger wires size.

3000/30
Schwarz
ø max 0,7 mm / .028"
mm 130

Arrow clasp bending plier.

3000/34
De La Rosa
ø max 0,5 mm / .020"
mm 125

Contours and forms archwires, of light wire without torquing.

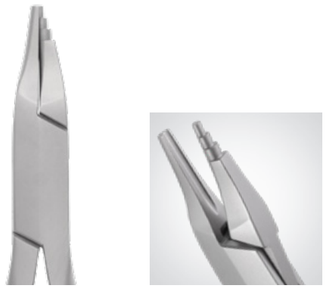
3000/35
De La Rosa
ø max 0,5 mm / .020"
mm 125

Same as 3000/34 with additional grooves measuring respectively 0,41-0,46-0,56 mm.

3000/58
ø max 0,7 mm / .028"
mm 125

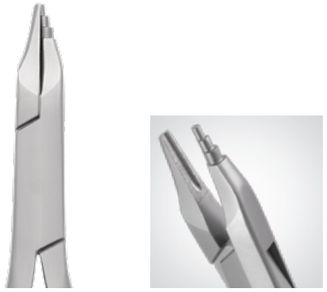
Lingual arch forming plier for fast forming all lingual retainers.

3000/98
(**1:1 scale** / scala 1:1)



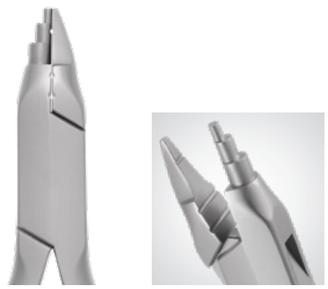
3000/98
Tweed – Short
ø max 0,5 mm / .020"
mm 135

Designed to form precise omega loops. Long grooved beak internally smoothed. Short type.



3000/95
Tweed – Short
ø max 0,5 mm / .020"
mm 135

Designed to form precise omega loops. Short grooved beak internally serrated. Short type.



3000/55
Young
ø max 0,7 mm / .028"
mm 130

Ideal for labial arches and face bow. Universal plier for different size loops.

3000/96
Tweed – Long
ø max 0,5 mm / .020"
mm 145

Designed to form precise omega loops. Long grooved beak internally smoothed. Long type.

3000/97
Tweed – O'Brein
ø max 0,7 mm / .028"
mm 140

Graduated cone to form precise omega and closing loops. Micro serrated beaks to prevent wire slippage.

3000/81
(**1:1 scale** / scala 1:1)

ø 0,7 mm

3000/53
Optical
ø max 0,7 mm / .028"
mm 140

Concave/convex loop forming plier, small-medium.

ø 1,2 mm

3000/79
Optical
ø max 0,7 mm / .028"
mm 135

Concave/convex loop forming plier, medium-large.

3000/70
Hollow chop
ø max 0,7 mm / .028"
mm 140

Contours and form arches of all sizes.

ø 0,5 mm

3000/81
ø max 0,5 mm / .020"
mm 135

Long and delicate beaks plier.

3000/28
ø max 0,5 mm / .020"
mm 140

2 round beaks long.

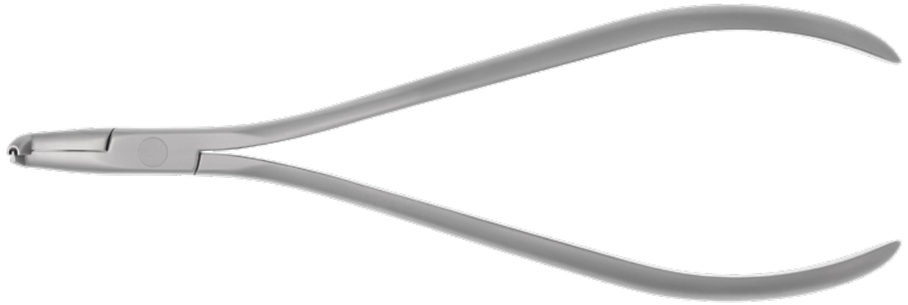
" MEDESY IN SPOT

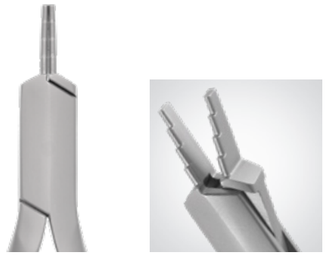
The new lubricant oil for orthodontic instruments. If used regularly it ensures a long product lifespan and optimal performances: facilitates the smooth and perfect function for all hinged instruments and helps to prevent freezing from corrosion and sediments.

Nuovo olio lubrificante per pinze ortodontiche. Se usato regolarmente prolunga la durata e l'efficienza dello strumento: l'olio favorisce il movimento scorrevole e delicato degli strumenti a snodo, proteggendo al tempo stesso da corrosione e sedimenti. "

4155
12 ml

3000/63
(**1:1 scale** / scala 1:1)





3000/80
Nance
ø max 0,7 mm / .028"
mm 125

Loop bending plier.
Four step tips (3, 4, 5, 6 mm) for loops forming.
Round and rectangular wire.

3000/63
Cinch back
ø max 0,55 × 0,64 mm
ø max .021" × .025"
mm 155

Cinch back utility plier.
For closing arches or cinch down a wire.
Use on round or rectangular wire.

3000/43
ø max 0,5 mm / .020"
mm 140

Closing loop plier.
Different loops in only one plier.

● ø 2,0 mm

3000/60
ø max 1,4 mm / .055"
mm 130

3 prong plier. For hard wires.
Round tips prevents any damage of archwire.

3000/56
Nance
ø max 0,7 mm / .028"
mm 135

Loop closing plier.
For bending of stop loops and ideal for Adams clasps.

3000/61
(**1:1 scale** / scala 1:1)

3000/59
Johnson
ø max 0,7 mm / .028"
mm 135

Crown and band contouring plier.

3000/61
Reynolds
ø max 0,7 mm / .028"
mm 130

Crown and band contouring plier.

3000/29
Schwarz
ø max 0,7 mm / .028"
mm 125

Arrow clasp former plier.

3000/15
Step plier
ø max 0,55 × 0,64 mm
ø max .021" × .025"
mm 140

Double side head to create steps in archwire.
The step is 1,0 mm.

3000/171
V-Stop
ø max 0,55 × 0,64 mm
ø max .021" × .025"
mm 130

For bending archwire in V-form, in order to avoid any movement.

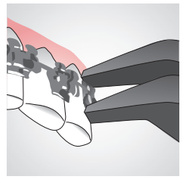
3000/49
(**1:1 scale** / scala 1:1)

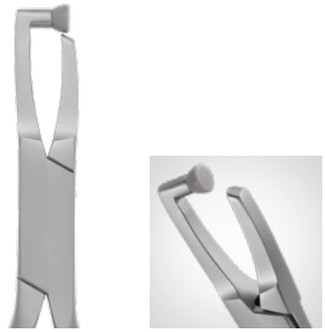
3000/83
Bracket remover – Straight
mm 135

3000/82
Bracket remover – Angled
mm 130

Pliers to remove the brackets: the extremely sharp tips allow an easy access under the flange of the bracket and facilitate its detachment.

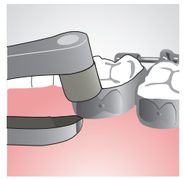
Pinze per rimozione attacchi: le punte affilate permettono di entrare sotto la flangia dell'attacco e ne consentono il distacco con estrema facilità.





3000/49
Posterior band remover – Short
mm 135

3000/50
Posterior band remover – Long
mm 135



Pliers to remove the bands available in two sizes, short and long. The rubber insert fully autoclavable sticks perfectly to the crown and allows an optimal position of the tip during the removal of the band.

Pinze per la rimozione di bande disponibili in 2 misure, lunga e corta. Il gommino sterilizzabile, rimane perfettamente in contatto con la corona, permettendo una ottimale posizione della punta, per la rimozione della banda.

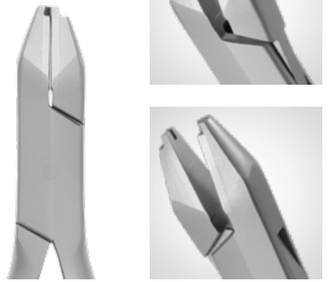
Torquing plier A
mm 125

3000/10B
Torquing plier B
mm 125



3000/62
Crimpable archwire hook
mm 130

For ball hooks and auxiliaries.

3000/36
Crimping plier
mm 125

For crimping bands or hooks, for placing stops and tubing on archwires.

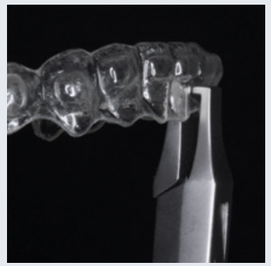
PLIERS FOR ALIGNERS
PINZE PER ALLINEATORI

3000/11
Vertical shape
mm 130

Vertical pressure point plier enabling the control of the rotation through a couple created on the aligner using vertical indents in the mesial / distal line angles
pinza pressure point verticale, permette di controllare la rotazione attraverso una "cupola" creata nella mascherina, nell'angolo mesiale / distale

3000/12
Horizontal shape
mm 130

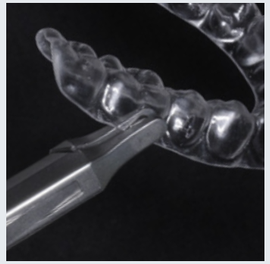
NEWS

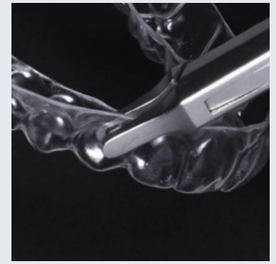


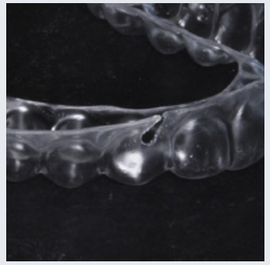
Horizontal pressure point enhancing retention of the aligner below a bonded attachment
pinza pressure point orizzontale, permette una maggior ritenzione della mascherina se creato sotto un attacco.

Special thanks to: Dr. Marco Rosa

3000/13
Drop shape
mm 130



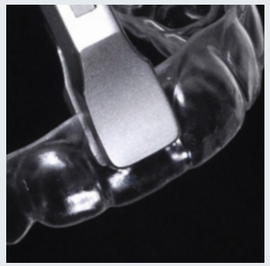




Cutting a reservoir section at the gingival margin anywhere elastic hooks are required.
Taglia una sezione in corrispondenza del bordo gengivale, laddove hooks per elastici dovessero servire.

3000/14
Circle shape
mm 130

NEWS



Creating half-moon cut-outs for relief of clear aligners around bonded attachments or elastics.
Taglia sezioni semi-circolari in corrispondenza di attacchi o elastici.

ARTICULATOR
ARTICOLATORE

NEWS

Medesy new articulator non-Arcon average value, solidly manufactured in cast aluminium, about 580gr in weight. Projected and realized to ensure the largest visual field on the lingual surfaces as well as maintaining complete stability of the upper frame also at full open position: coiled springs facilitate the return to starting aligned position. Additional features guarantee an exact simulation of the condylar path with a high fitting accuracy, giving the necessary occlusion function throughout the full range of mandibular movements.
Technical details:

- ▷ **Stable 60° operation for technician comfort.**
- ▷ **Ideal for class III patients.**
- ▷ **Compatible with any pressure polymerizers.**
- ▷ **Anti-rotation system for incisal rod.**
- ▷ **Template with elliptic references for lower arches models.**
- ▷ **Occlusal table with elliptic references for upper arches models.**

Questo è il nuovo articolatore non-Arcon a valor medio di Medesy, prodotto in alluminio pressofuso dal peso di 580gr circa. È stato progettato e realizzato in modo da lasciar ampia visibilità alle superfici linguali, preservando la stabilità in posizione aperta: il ritorno in asse è agevolato grazie a delle molle di richiamo. Le regolazioni di questo articolatore permettono di simulare esattamente il tragitto condiloideo per garantire precisione e occlusione ottimali, qualunque sia il movimento mandibolare del paziente.
Dettagli tecnici:

- ▷ Design per posizione di lavoro ergonomica a 60°.
- ▷ Compatibile per dimensione con i polimerizzatori a pressione in commercio.
- ▷ Sistema anti-rotazione per asta incisale.
- ▷ Calotta con traiettorie ellittiche di riferimento per modelli a partire da arcata inferiore.
- ▷ Piano occlusale con traiettorie ellittiche di riferimento per modelli a partire da arcata superiore.

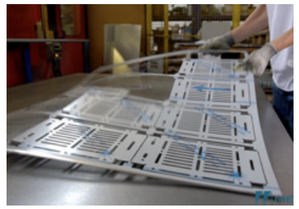
STAINLESS STEEL TRAYS GAMMAFIX
VASSOI IN INOX GAMMAFIX

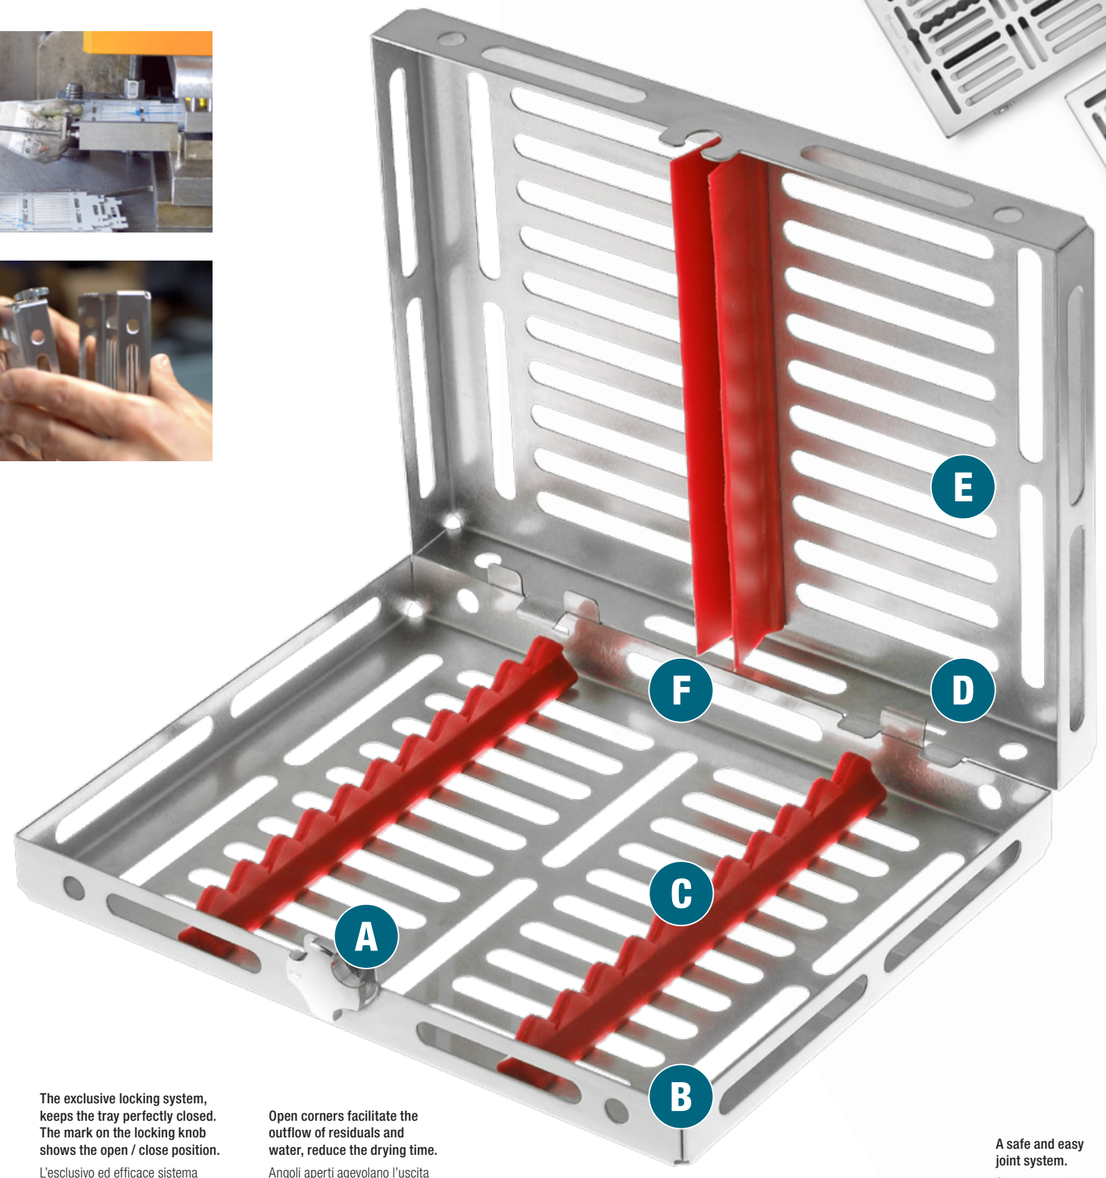


WATCH THE VIDEO ON YouTube MEDESY CHANNEL!

The revolutionary GAMMAFIX trays are characterized by excellent quality and functionality features, specifically conceived to facilitate the cleaning and sterilization process. Their special shape ensures a fully safe handling of the surgical instruments during the washing and sterilization phase, considerably reducing the risk of accidental injures for the user. Thanks to the GAMMAFIX trays you can reduce the preparation time as you can organize them in handy and practical set-ups including the different items for each specific dental treatment. The range consists of 5 modular models, studied to offer the best versatility and efficiency. The type of silicone we selected for our trays meets the approval of the strictest Food & Drug standards (FDA).

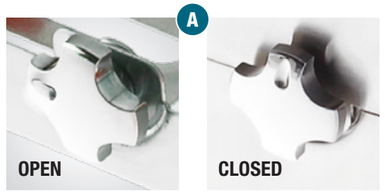
I rivoluzionari vassoi della linea GAMMAFIX si caratterizzano per l'alta qualità e funzionalità, specificatamente studiati per facilitare il processo di pulizia e sterilizzazione. La loro speciale forma permette di maneggiare lo strumentario chirurgico in massima sicurezza, anche durante le procedure di disinfezione e sterilizzazione, riducendo considerevolmente il rischio di ferite accidentali per l'utilizzatore. Grazie ai vassoi GAMMAFIX si riesce a limitare il tempo di preparazione, in quanto gli strumenti necessari per ogni attività odontoiatrica potranno essere riposti in pratici sets pronti all'uso. La gamma si articola in 5 modelli modulari, studiati al fine di offrire la massima versatilità. Il tipo di silicone prescelto è conforme ai severi requisiti Food & Drug (FDA).

GAMMAFIX® by MEDESY®



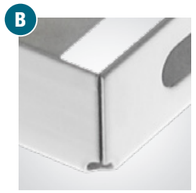
A **The exclusive locking system, keeps the tray perfectly closed. The mark on the locking knob shows the open / close position.**

L'esclusivo ed efficace sistema di chiusura. La fresatura indica la posizione di apertura / chiusura.



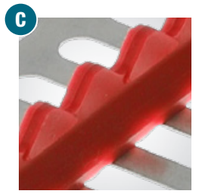
B **Open corners facilitate the outflow of residuals and water, reduce the drying time.**

Angoli aperti agevolano l'uscita di acqua e residui, riducendo i tempi di asciugatura.



C **The type of silicone we use for our trays meets the approval of the strictest Food & Drug standards (FDA).**

Il silicone utilizzato rispetta la severa normativa Food & Drug (FDA).



D **A safe and easy joint system.**

Sicuro e semplice meccanismo di chiusura.

E **The enlarged holes offer more open space for a perfect washing process and a safe sterilization.**

I fori di dimensione maggiore assicurano una maggiore capacità di lavaggio ed una efficace sterilizzazione.

F **Improved top flexible V-Shape for the silicone profile, specifically conceived for storing instruments having different sizes.**

Barretta in silicone forma V migliorata, concepita per trattenere strumenti di sezioni diverse.

The contrast blades, made of anodized black aluminum, increase visibility on details and higher quality pictures while eliminating non-essential objects.

Le lame di contrasto, realizzate in alluminio anodizzato nero, migliorano le fotografie mettendo in risalto i dettagli ed eliminando gli elementi non d'interesse.

The line has been created in collaboration with Dr. Kevin Chacón Pérez of México, expert in orthodontics, ortho-odonthopediatrics and aesthetics odontology; a well-known opinion leader in dentistry.

La linea è stata creata in collaborazione con il Dr. Kevin Chacón Pérez – México, esperto in ortodonzia, ortodonzia pediatrica ed estetica; noto opinion leader nel settore odontoiatrico.

Mayo instrument table for practice and operating room.
Table's dimensions: mm 630 × 450 × 25 h
Table's elevation: mm 900 to mm 1250

Tavolo di Mayo, per studio e sala operatoria.
Dimensioni del tavolo: mm 630 × 450 × 25 h
Elevazione del tavolo: mm 900 a mm 1250

LUBRICANT OIL WITH SPECIAL THIN DISPENSER NOZZLE

Lubricant oil: when used regularly it protects reliably from wear and prolongs the efficiency of the instrument. The lubricant oil ensures that all hinged and jointed instruments keep operating smoothly and delicately and also protects them from corrosion and residues. It is advisable to use the oil prior to sterilization procedures. Physically inert.

OLIO LUBRIFICANTE CON SPECIALE EROGATORE SOTTILE

Olio lubrificante: se usato regolarmente prolunga la durata e l'efficienza dello strumento.
L'olio lubrificante di Medesy favorisce il movimento scorrevole e delicato degli strumenti a snodo, proteggendo al tempo stesso da corrosione e sedimenti.
Si raccomanda di utilizzarlo antecedentemente la fase di sterilizzazione.
È fisicamente inerte.

R
Ramus retrattori A110
Rastrelliere porta pinze F26
Regnell-Davis retrattori A114
Retrattori A108-A115
Reynolds pinze F13
Rifinitori per amalgama D23
Rochester-Kocher pinze A100-A102
Rochester-Péan pinze A101
Rohdes scalpelli C30
Rowe per osso E16
Russian pinzette A107

S
Sanders bisturi C32
Scalers C21-C24
Scalers titanio C27
Scalpelli chirurgici C30-C31
Scalpelli per osso E10
Schluger bisturi C33
Schmackebier leve per radici A44
Schwarz pinze F9, F13
Scollaperiostei A56-A58
Seghetto per gessi G9
Seldin leve per radici A43-A48
Seldin scollaperiostei A58
Semken pinzette A105
Senn-Miller retrattori A114
Shoshan per amalgama D24
Sickle forbici A74
Silicone anelli C24
Sindesmotomi A58-A60
Siringhe A118-A121
Siringhe per elastomeri G20
Smaha per legature F18
Sonde parodontali B11-B14
Spatola per cementi G8
Spatole per gessi e alginati G9
Specchi fotografici H16-H19
Specchietti B2-B3
Specilli B6-B10
Specilli endodontici D46
Spencer forbici A84
Spingi amalgama D28-D29
Spreader endodontici D43, D45
Sprengel per amalgama D24
Square ring forbici A75
Standard forbici A79
Stecca G22
Stecca endodontica D55
Steiner per legature F19
Step pinze F13
Sternberg retrattori A111
Stieglitz pinze A25
Strumenti ausiliari F20-F21
Strumenti di riporto D21
Strumenti per attacchi F22
Strumenti per ceramica G6-G7
Strumenti per composito D2-D11
Strumenti per corone D30-D31
Strumenti per filo retrattore D27
Strumenti per modellare D18-D19
Strumenti per modellare cera G2-G5
Strumenti per rialzo seno E8-E9
Strumenti per tunneling C28-C29
Strumenti taglia smalto dentina D17
Student forbici A79
Sugarman bisturi C33
Superior Cut forbici A80-A81
Swiss scaler C23

T
Tanner otturatori D18
Tavolo di Mayo H22
Taylor pinzette A104
Taylor scaler C21
Tazze per alginato e gesso H12
Telai per diga D39
TG scalpelli C31
Tomes pinze estrazione A23
Torquing pinze F15
Towner scaler C22
Tronchesi ortodontici F4-F5
Tucker per legature F20
Tunneling C28-C29
Tweed pinze F8-F10

U
Uncini endodontici D35-D39
University north Carolina sonde B12
USC per amalgama D24
USC Towner bisturi C32

V
Vassoi porta strumenti H2-H11
Vestibulum retrattori A111
Volkmann cucchiai alveolari A70
V-Stop pinze F13

W
W. Barry leve per radici A49
Wahl lime per osso A64
Ward per amalgama D23
Warwick-James leve per radici A51
Wassmund retrattori A110
Wedelstaedt taglia smalto D17
Weingart pinze F6
Westcott otturatori D22
White leve per radici A41
White otturatori D22
Who sonde B11
Wieder retrattori A113
Wiland per amalgama D24
Williams sonde B11
Williger cucchiai alveolari A70
Williger scaler C24
Williger scollaperiostei A58
Winter leve per radici A49
Witzel pinze estrazione A13-A17
Woodson spatole D5
Wynman per corone D30

Y
Young pinze A117
Young pinze ortodontiche F11
Younger-Good curettes C19

Z
Zahle per modellare G5
Zerfing scalpelli C31
Zuricher calibri G22
