

ELASTICS AND LIGATURES

K

Leone offers elastics manufactured with the best quality of latex available.

The innovative low friction **SLIDE*** ligatures are manufactured in a special medical grade polyurethane mix providing all the advantage of low friction biomechanical properties with faster therapeutic times and without the need of extractions. These ligatures are especially indicated for use with Logic Line brackets.

Leone modules for ligatures are stamped from elastomer offering the best elasticity and resistance to oral liquid absorption.

Leone wires for metal ligatures are manufactured out from a high vacuum annealed alloy for the best fit and higher mechanical load.

SLIDE
LOW FRICTION LIGATURES

SLIDE is a product manufactured with a special polyurethane mix for medical use. It is applied similarly to conventional elastic ligatures. Once placed on the bracket, it creates a passive ligature on the slot that makes the archwire free to slide and to produce its effects on the dentoalveolar structures. This ligature is especially indicated for use with Logic Line brackets which are featuring a housing to keep **SLIDE** ligature in place for integration in the bracket profile. The particular conformation of the **SLIDE** ligature considerably improves patient's comfort during the first phases of treatment.

SLIDE AQUA**

- K6214-10** extra-small
- K6211-10** small
- K6212-10** medium

Thanks to an innovative manufacturing process, the new **SLIDE** low friction ligatures **AQUA** are not subject to corrosion by oral liquids and are now even more resistant to discoloration (a recurring issue with transparent elastomers). Changing ligatures frequently is no longer necessary and perfect aesthetics is guaranteed. This ligature is indicated for use with Logic Line aesthetic brackets (pages 123-126) which are featuring a housing to keep Slide ligature in place for the integration in the bracket's profile.

K6378-03 RADIOPAQUE SEPARATORS

The circular section, combined with excellent and constant elasticity, allows easy application by means of P1141-00 pliers, ensuring gradual and comfortable separation of teeth before applying bands. Supplied in a practical pouch, ready-separated and ready for use, not in modules. Radiopaque for safe radiographic localization.

Pack of 1000

K6461-01 TIE-BACK

For the application of elastic tractions on treatments with **STEP** technique. Easy insertion on molar tube. The four anterior holes allow a perfect dosage of force on archwire hook. Colour: blue.
